

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

Aim:- Creating Interactive Dashboards and Data Stories

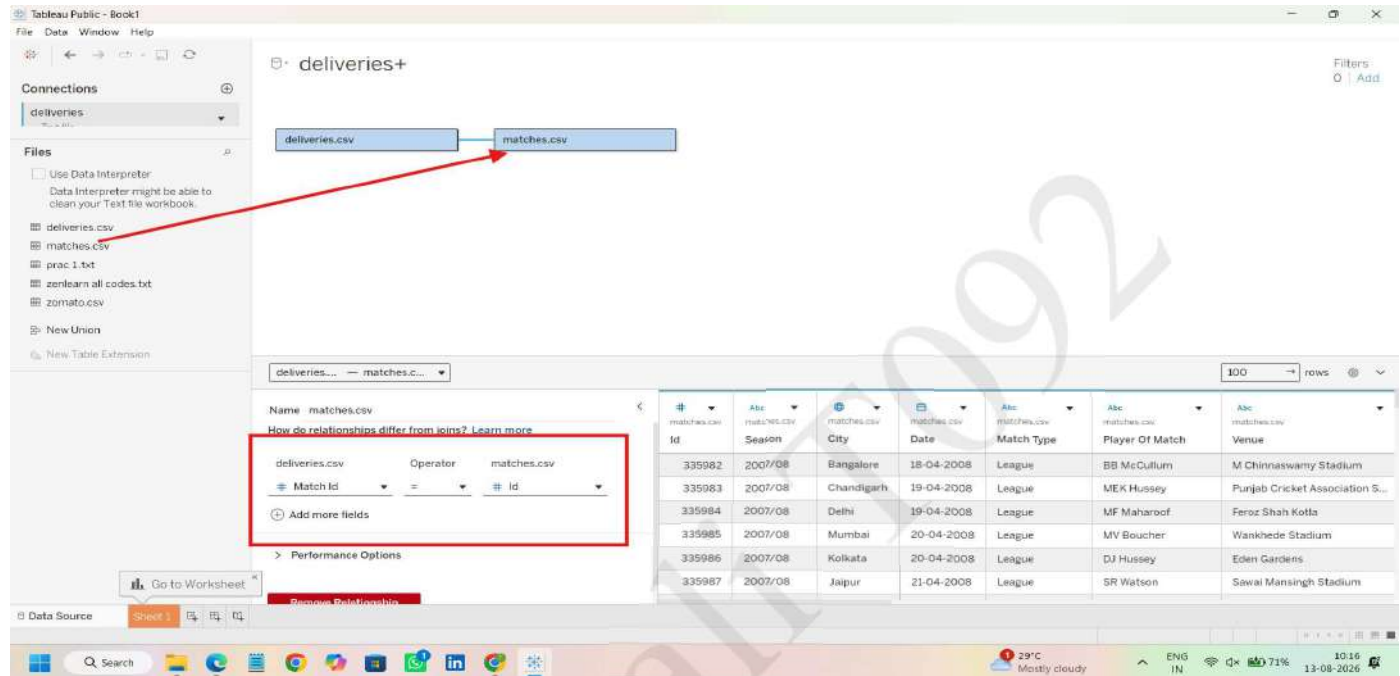

Step 1:- Open Tableau And Connect The Dataset

Name:- Vinod Manohar Mali
Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

Step 2:- Connect The matches.csv To deliveries.csv And Select The match_id in relationship

A: Design a basic dashboard layout using sheets

Step 1:- Open a new worksheet and rename it: Matches Won by Team. Drag Winner from Dimensions to the Rows shelf.

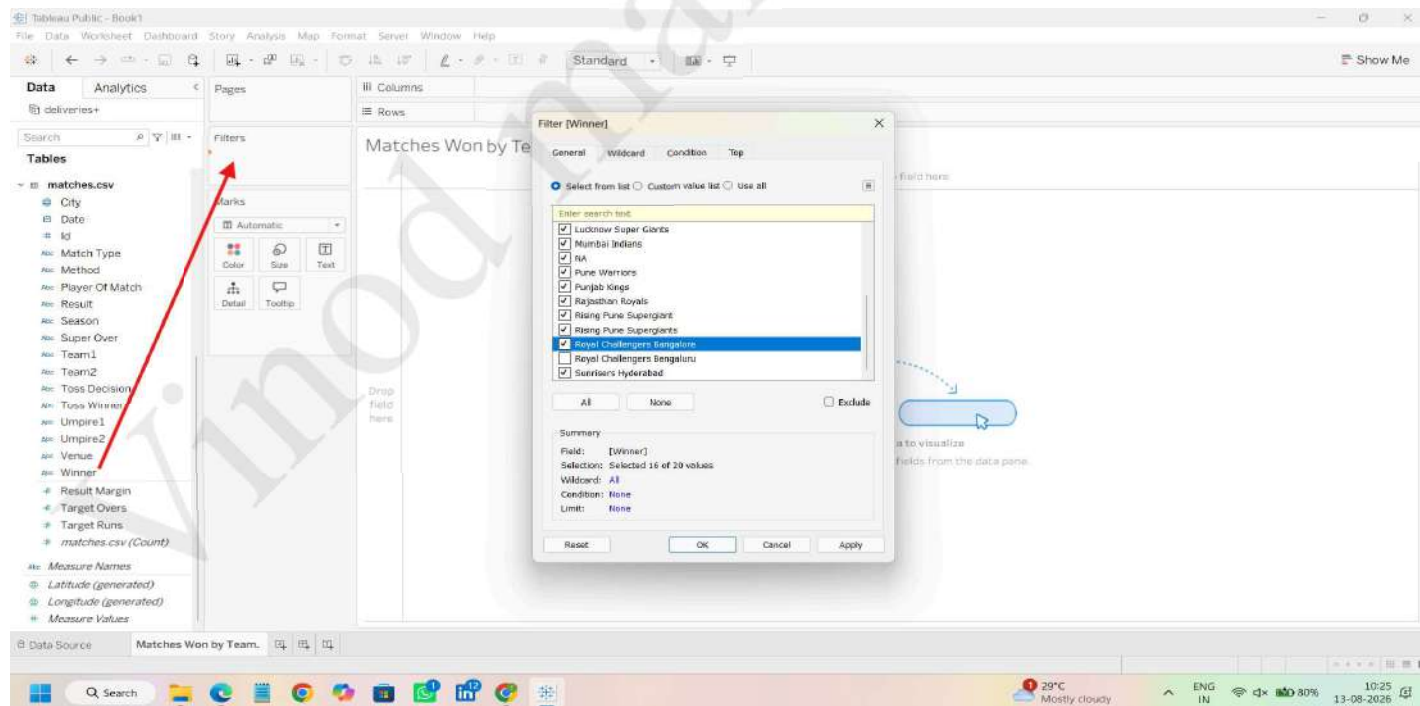

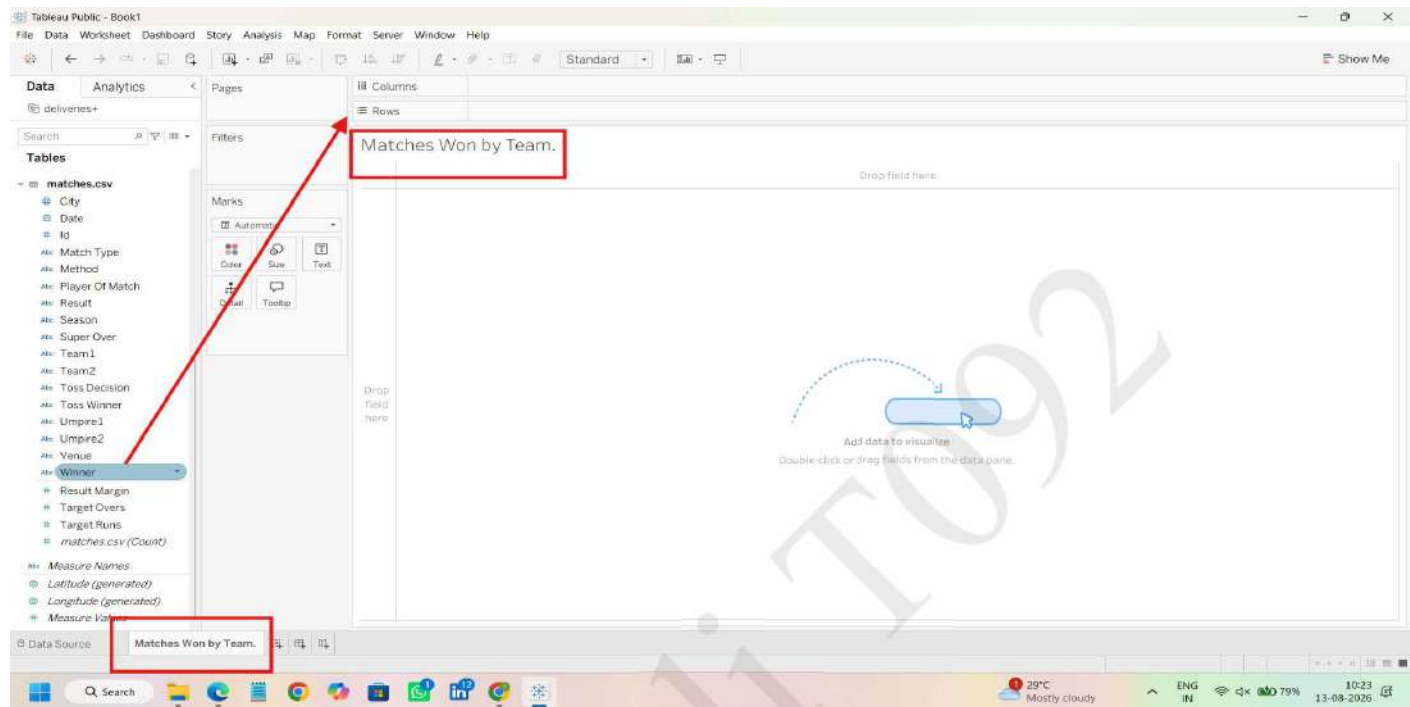

o Quick Filter: Drag Winner to the Filters shelf and uncheck Null (to clear matches with no result/abandoned).

Name:- Vinod Manohar Mali
Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science

Subject:- Data Visualization With Power BI And Tableau

Practical No 7

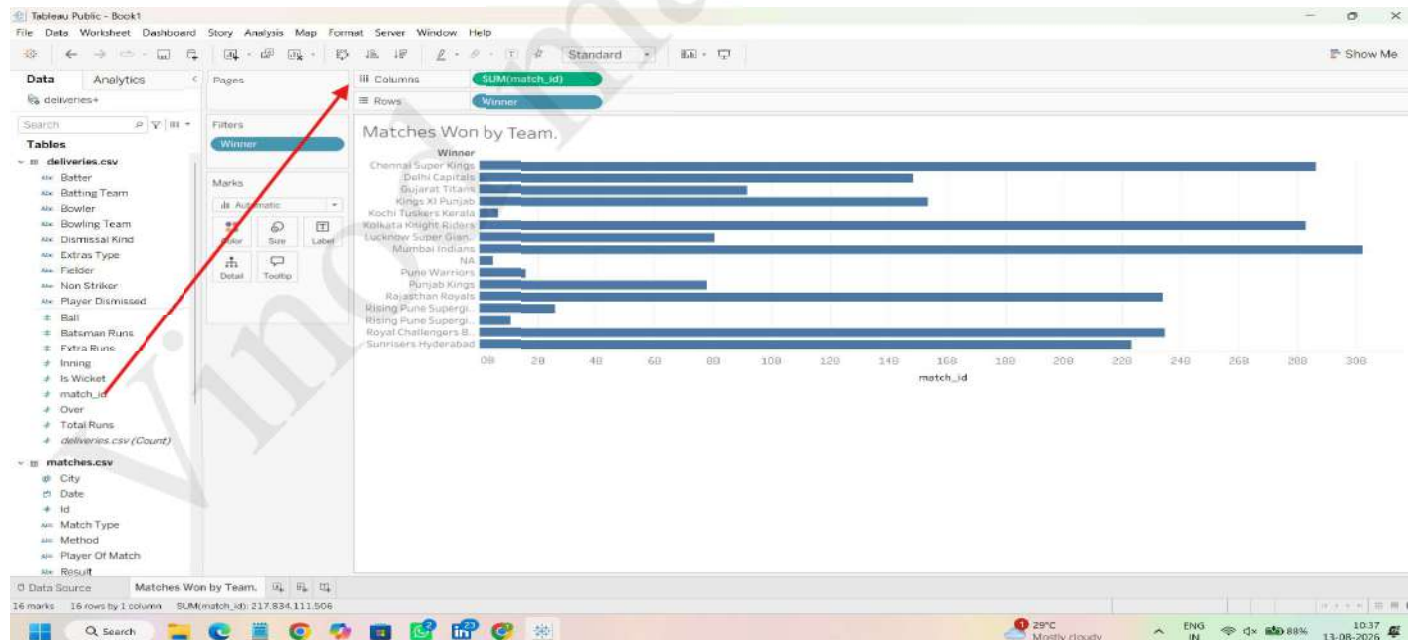

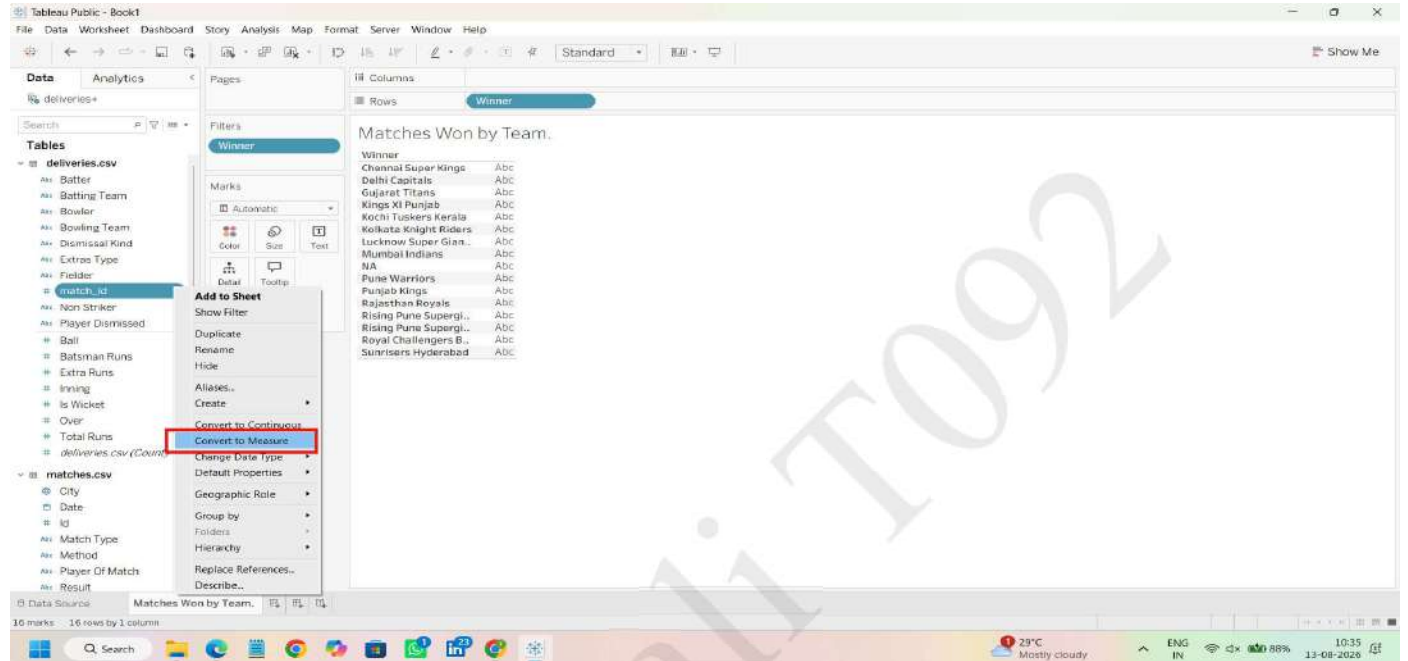

Name:- Vinod Manohar Mali

Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

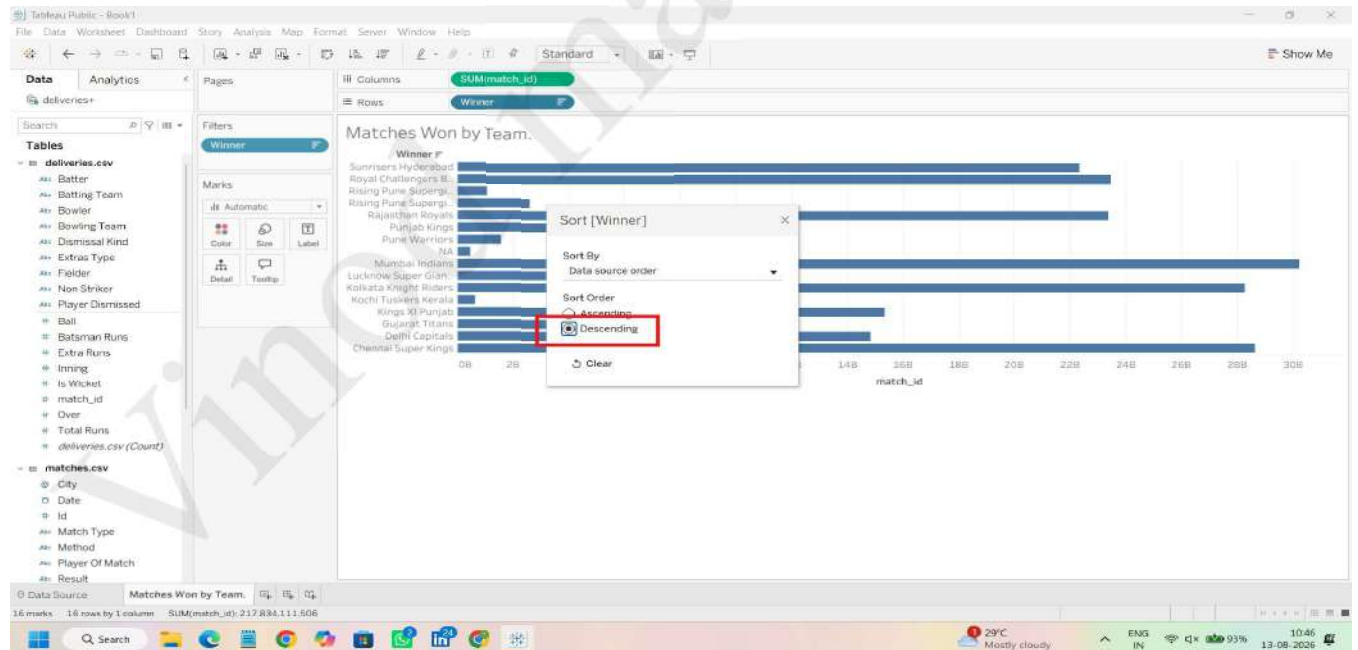

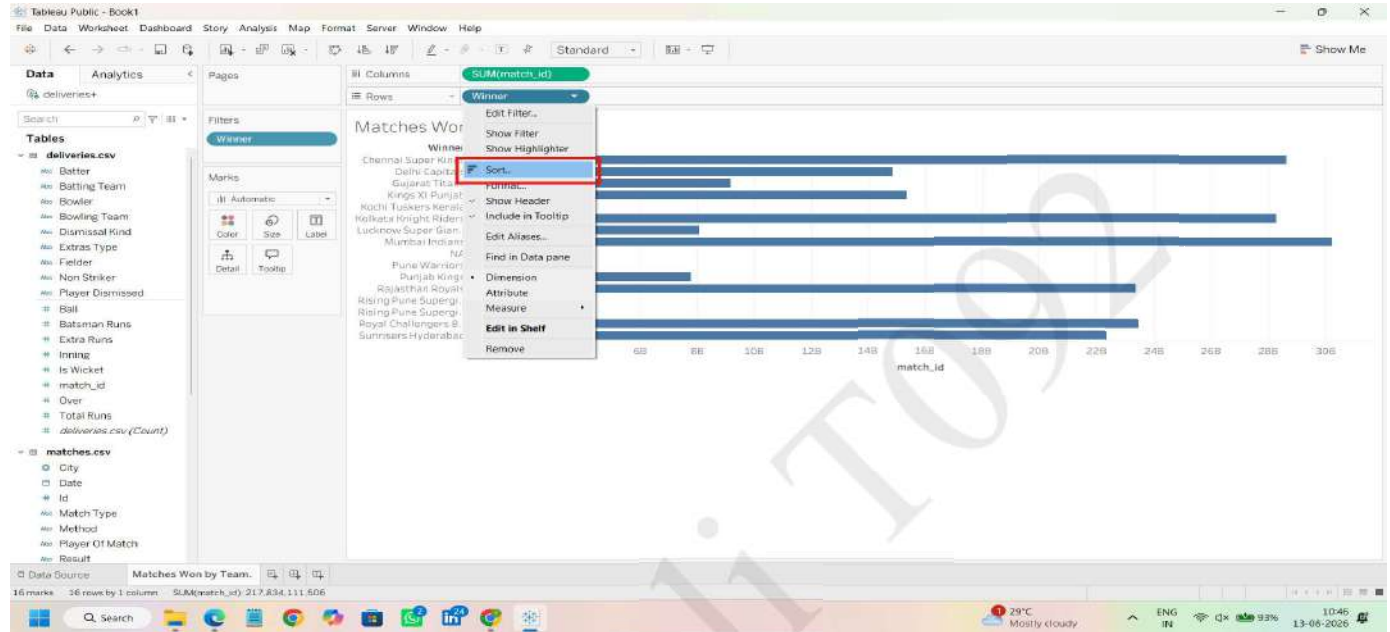

Step 2:- Convert The Match Id Column Into Measure And Drag Matches (Count) to the Columns shelf.

Name:- Vinod Manohar Mali
Roll No:- T092

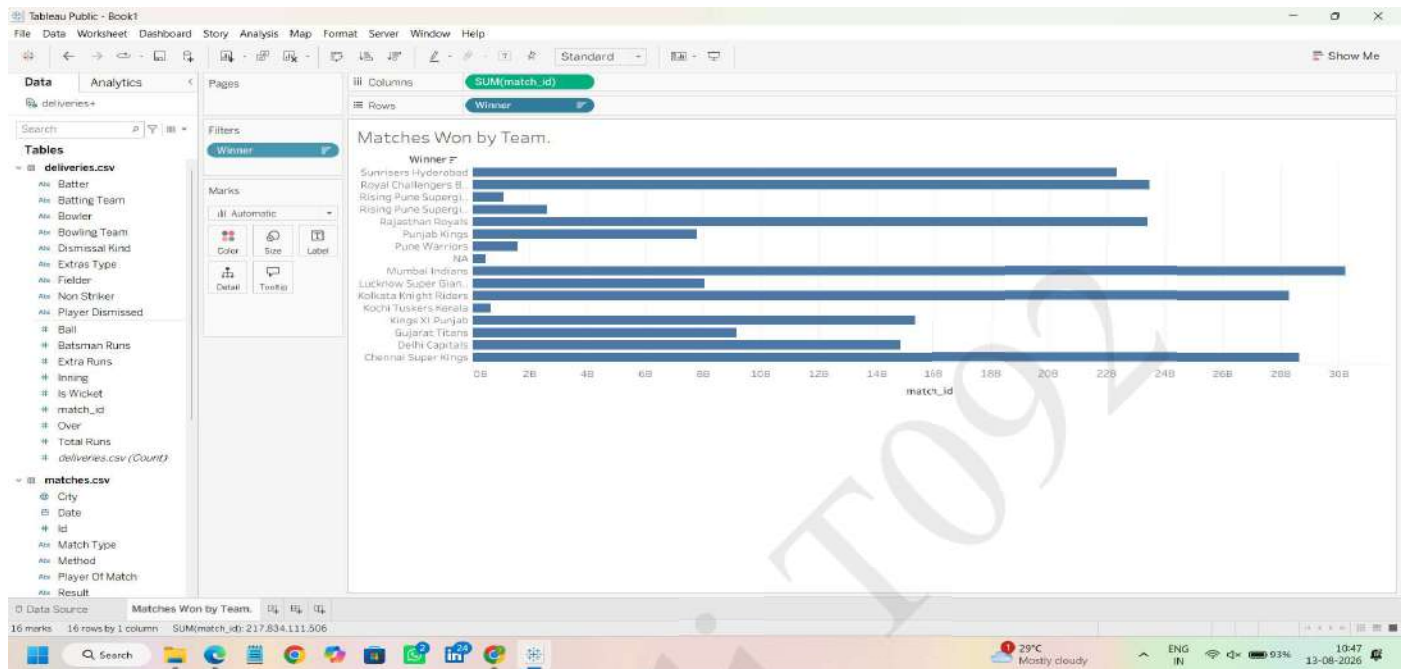

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

Step 3:-Right Click On The Winner Field And Click On Sort Descending so the team with the most wins (e.g., Mumbai Indians) appears at the top.

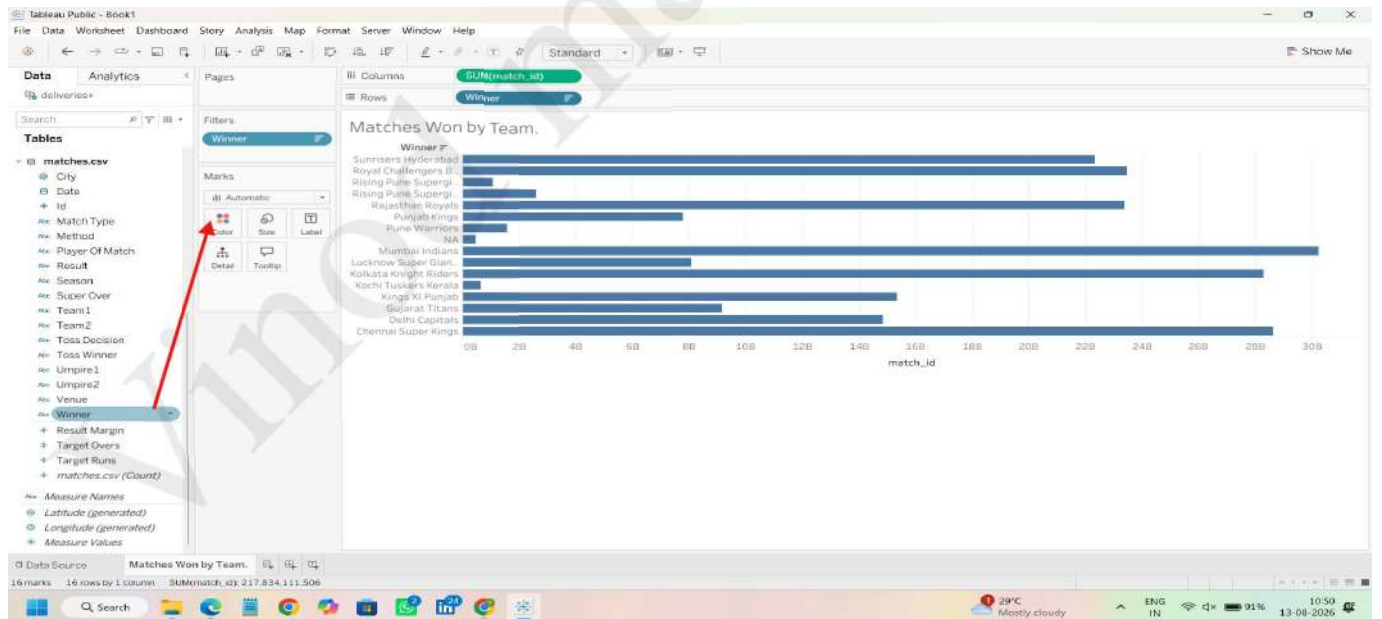

Name:- Vinod Manohar Mali
Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

Step 4:- Drag Winner to Color on the Marks card to give each team its distinct color. Click Label on the Marks card Check Show mark labels.

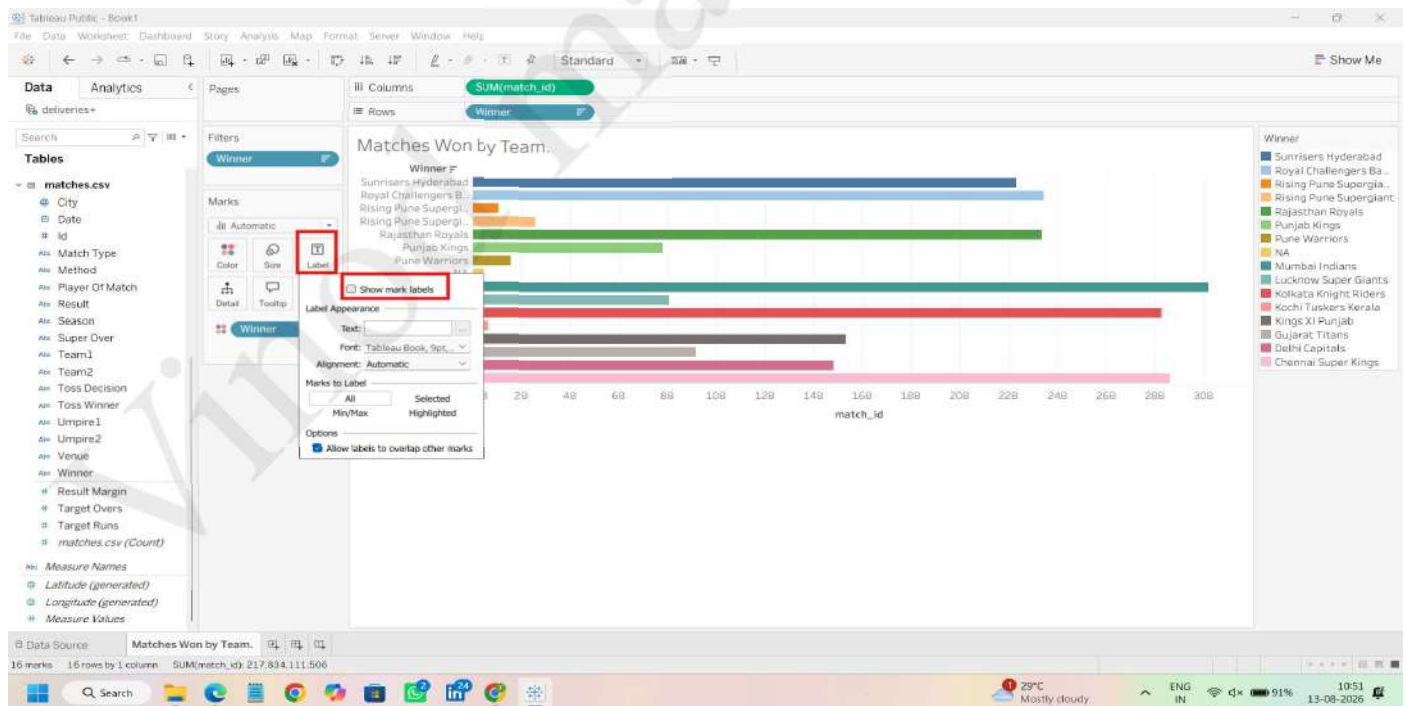

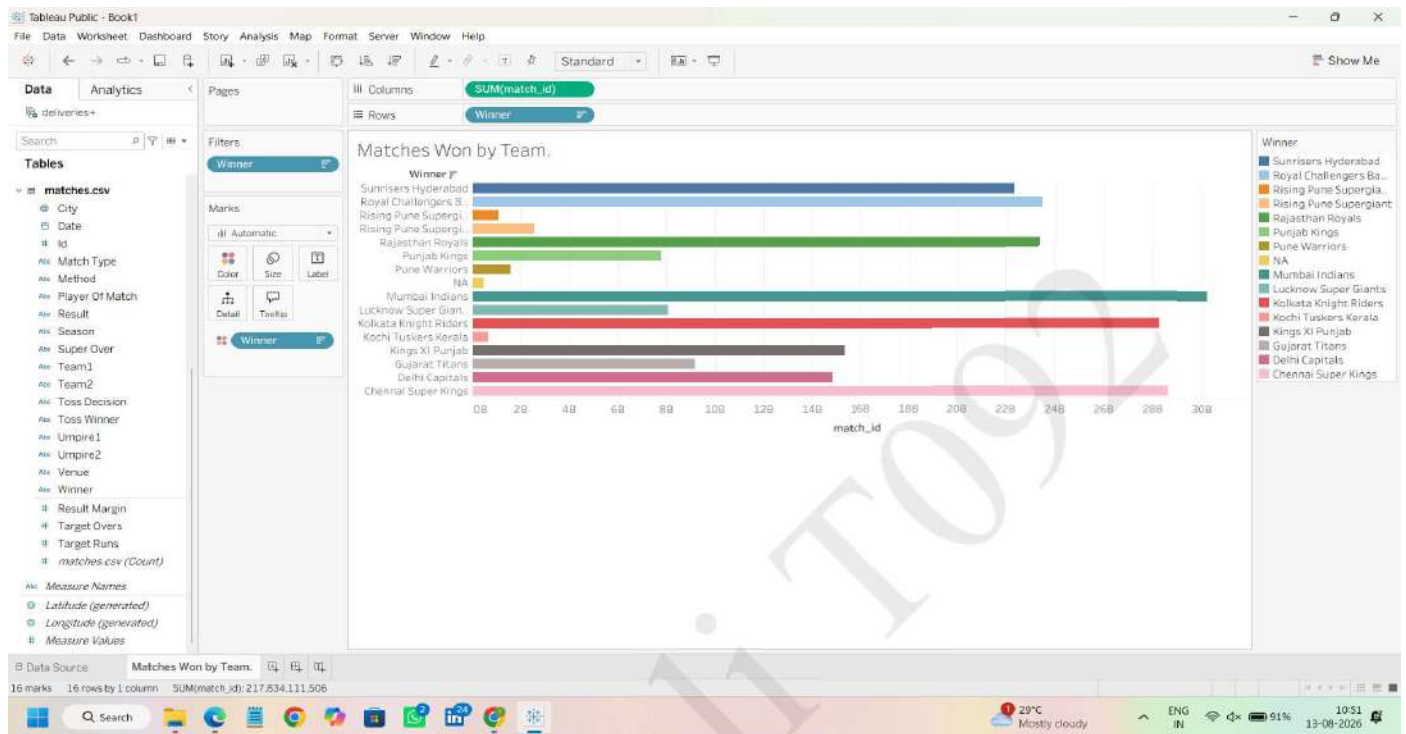

Name:- Vinod Manohar Mali
Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science

Subject:- Data Visualization With Power BI And Tableau

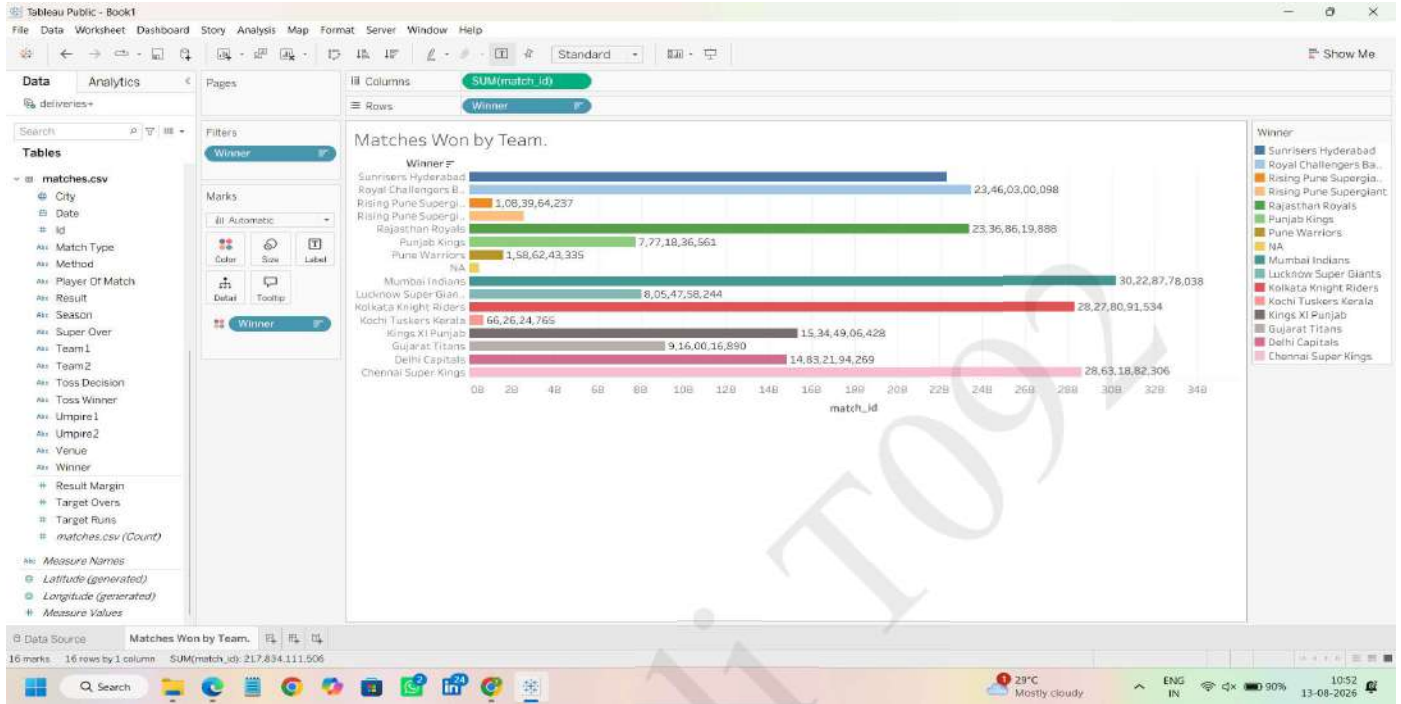

Practical No 7

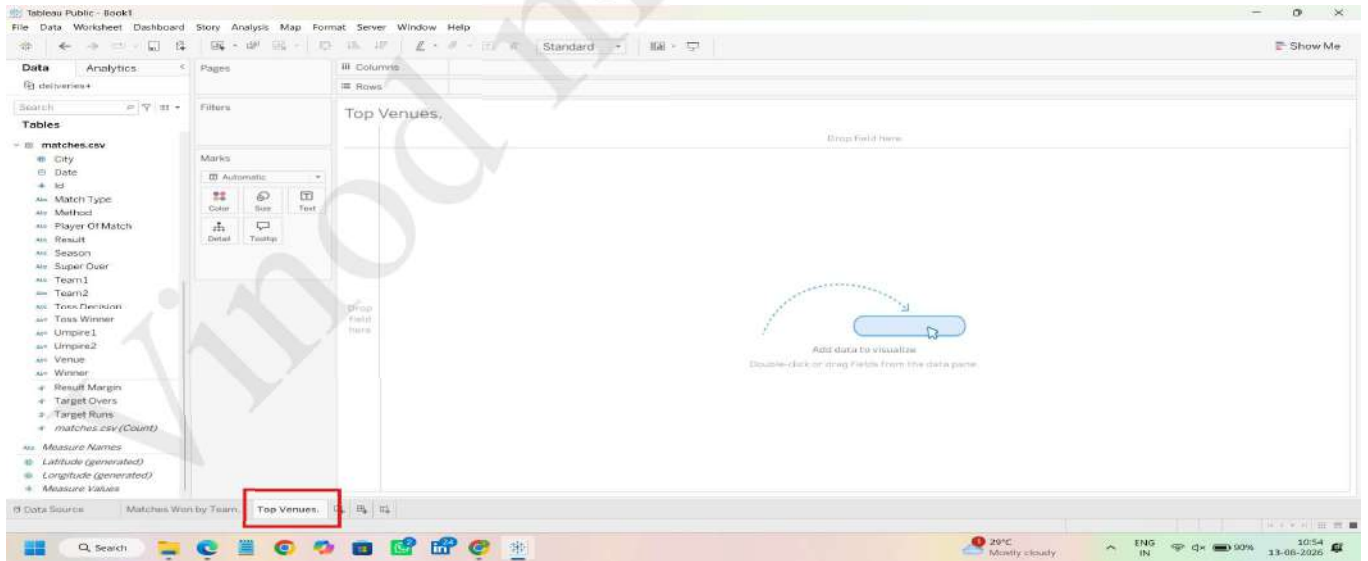

Name:- Vinod Manohar Mali

Roll No:- T092

Practical No 7

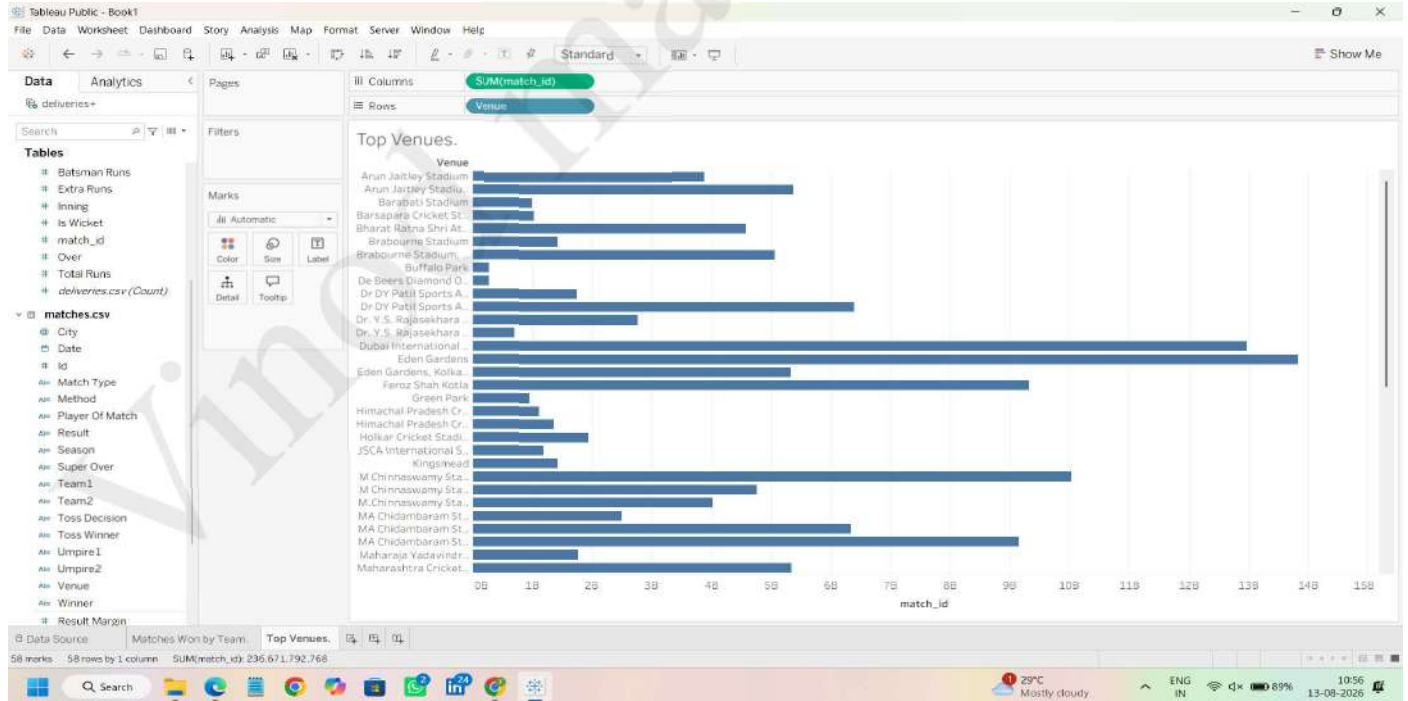

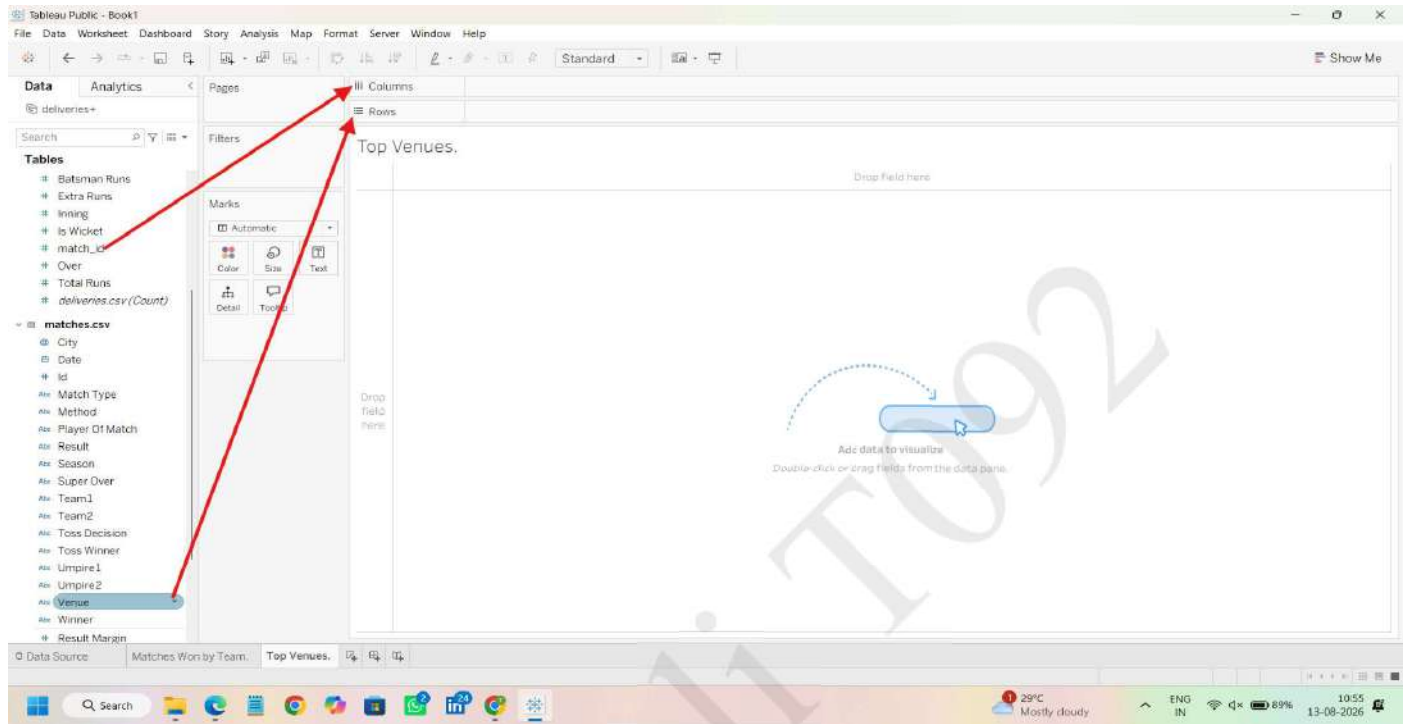

Step 5:- Open a new worksheet and rename it: Top Venues. Drag Venue to the Rows shelf. Drag Matches (Count) (or Id using CNTD) to the Columns shelf.

Name:- Vinod Manohar Mali

Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

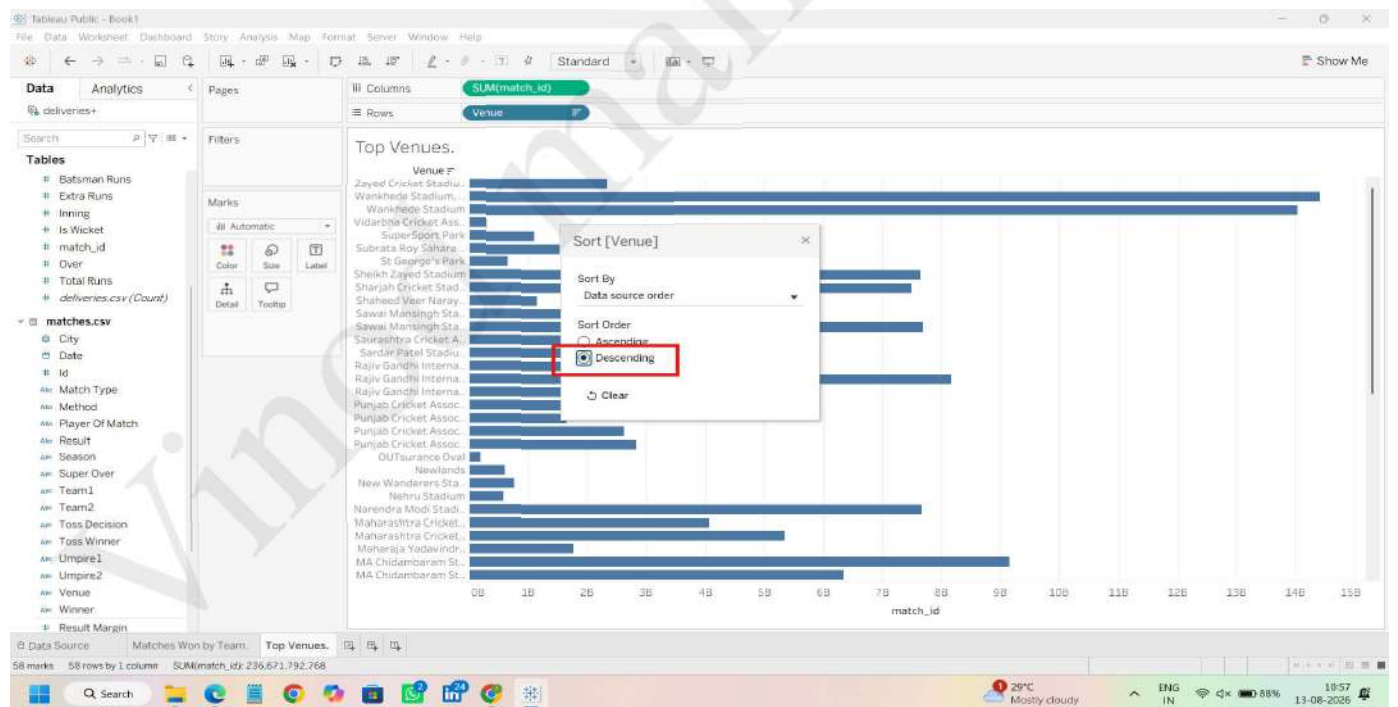

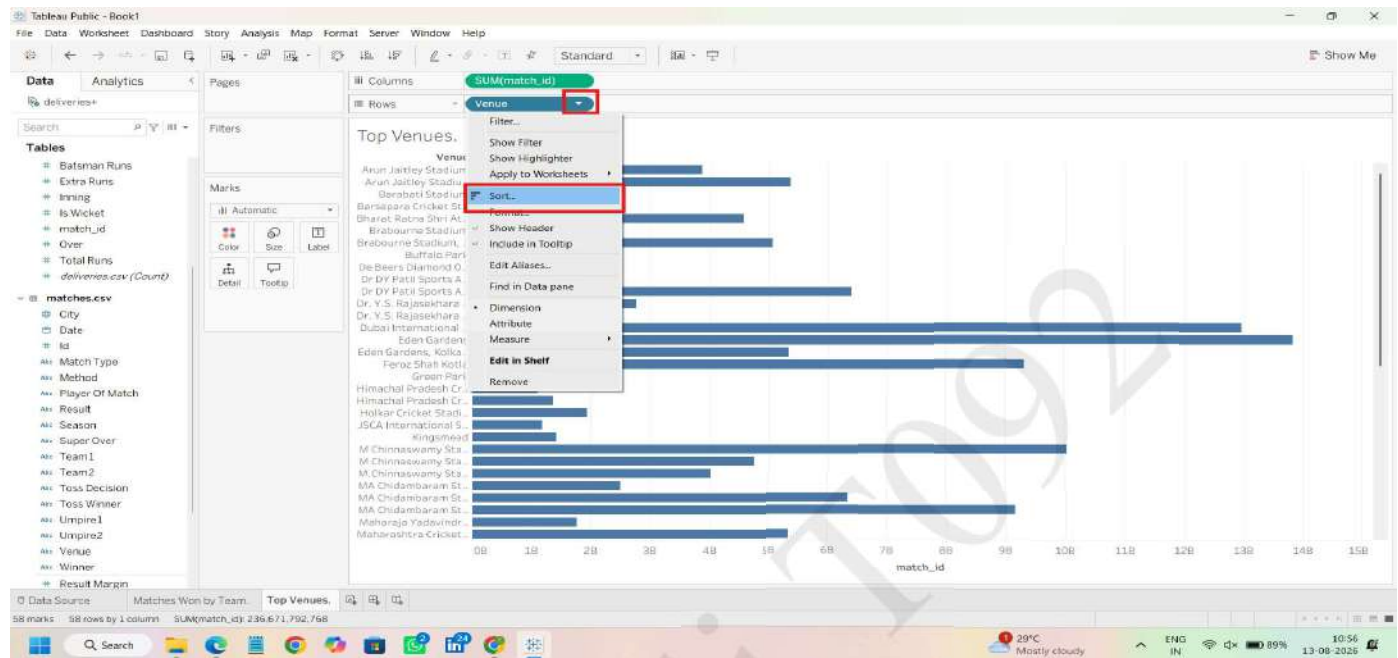

Sort in Descending order (Left Click on Venue on The Rows and Navigate to Sort).

Name:- Vinod Manohar Mali

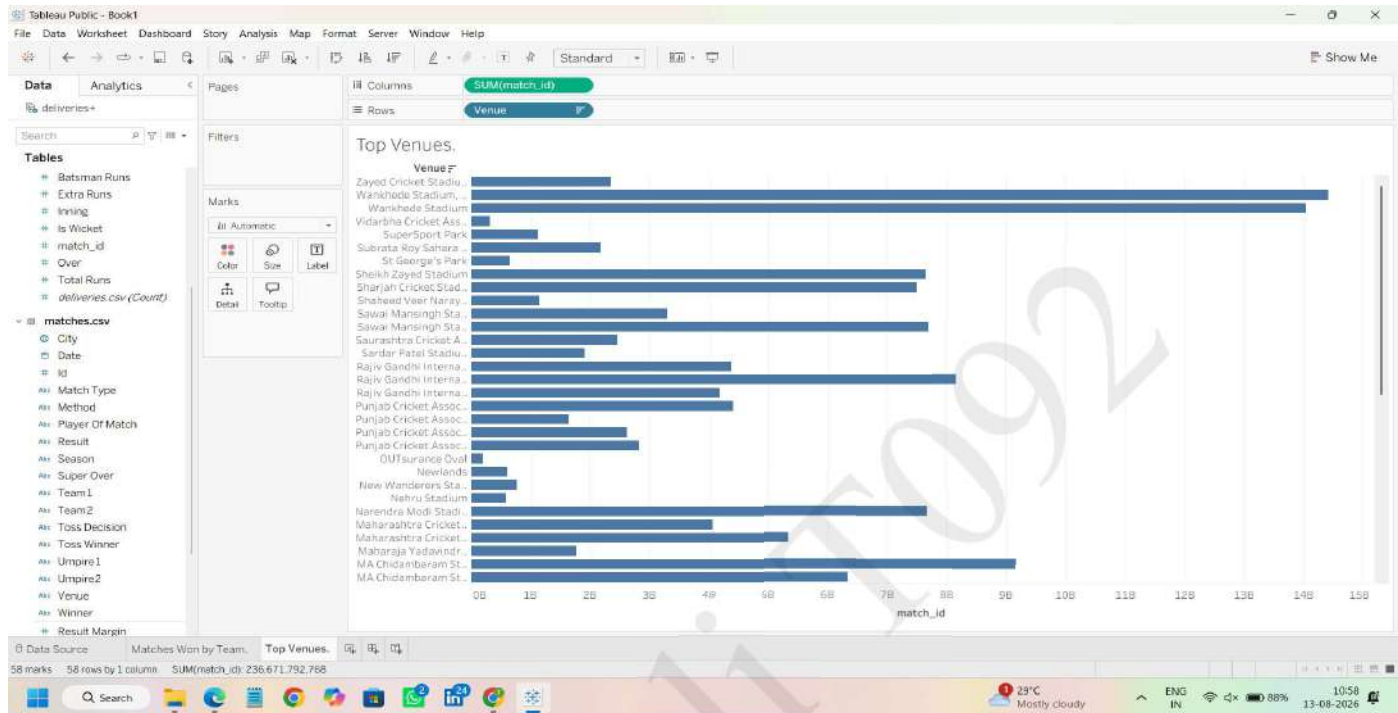

Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

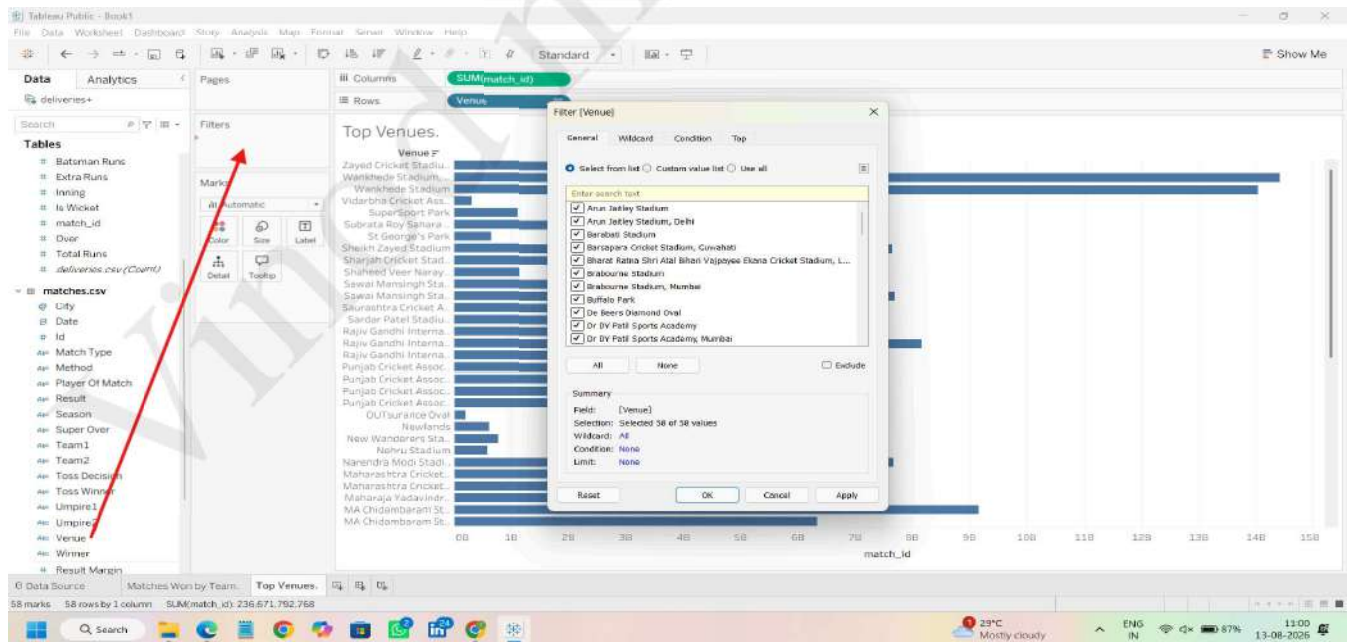

Name:- Vinod Manohar Mali
Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

Step 6:- Drag Venue to the Filters shelf, go to the Top tab select By field Top 10 by Matches (Count).

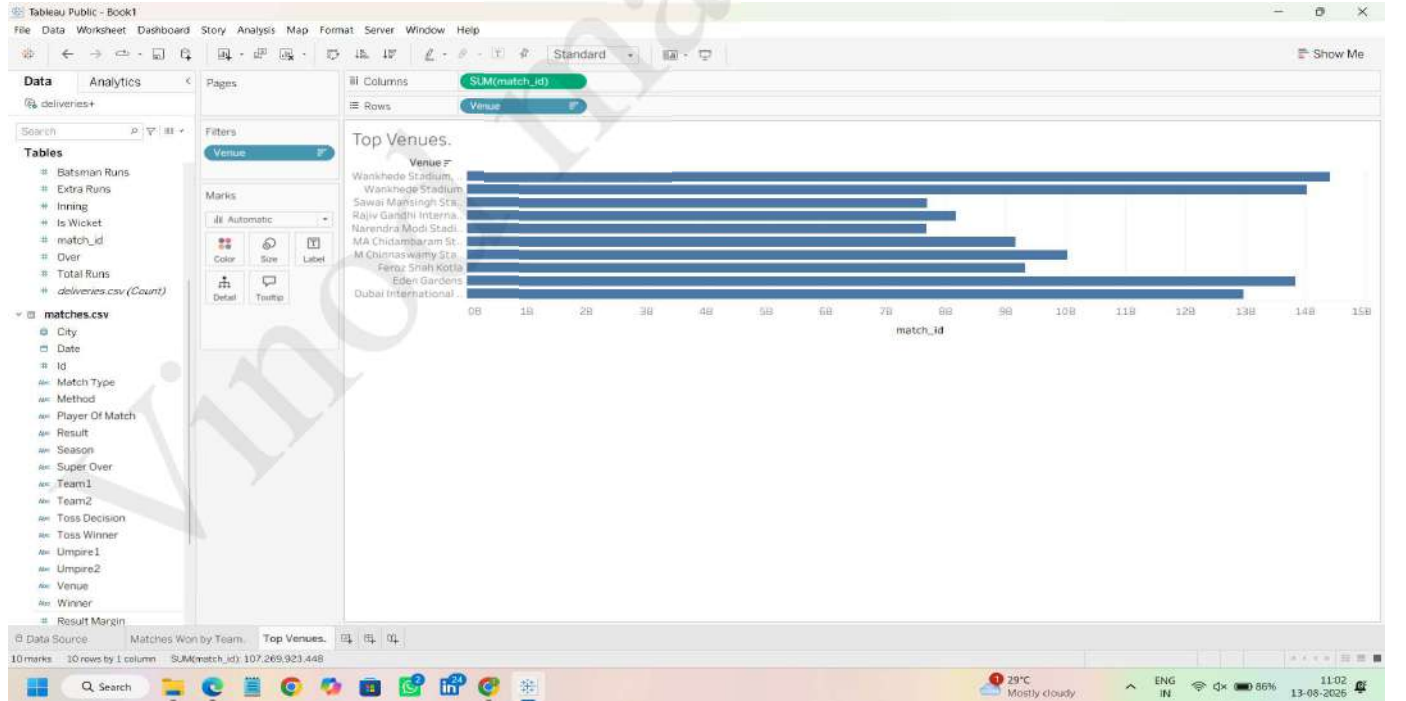

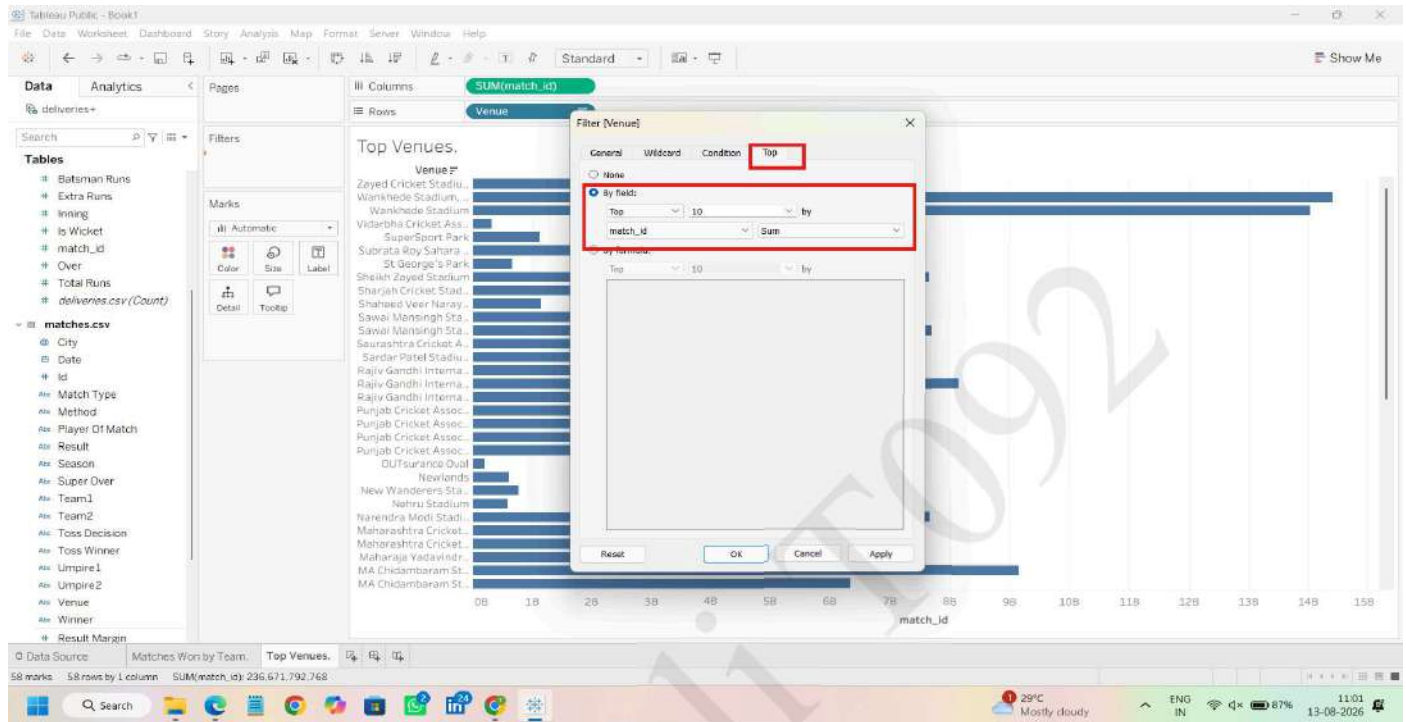

Name:- Vinod Manohar Mali
Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science

Subject:- Data Visualization With Power BI And Tableau

Practical No 7

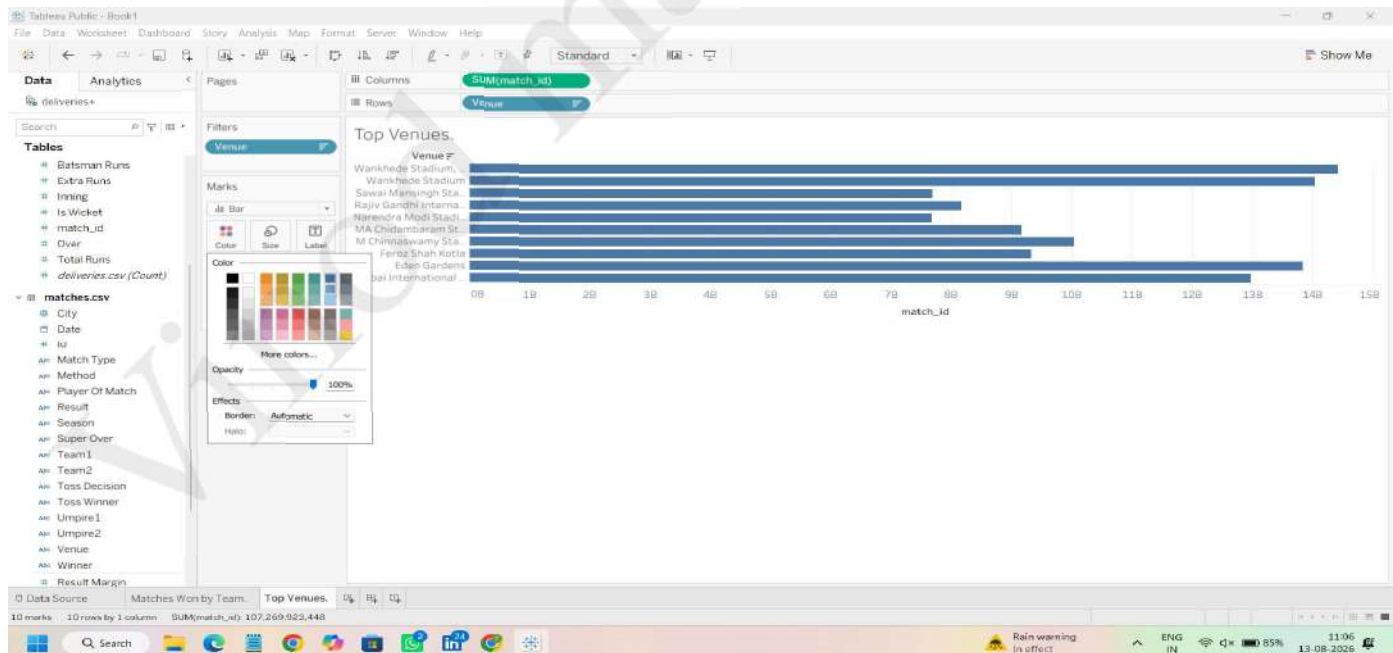

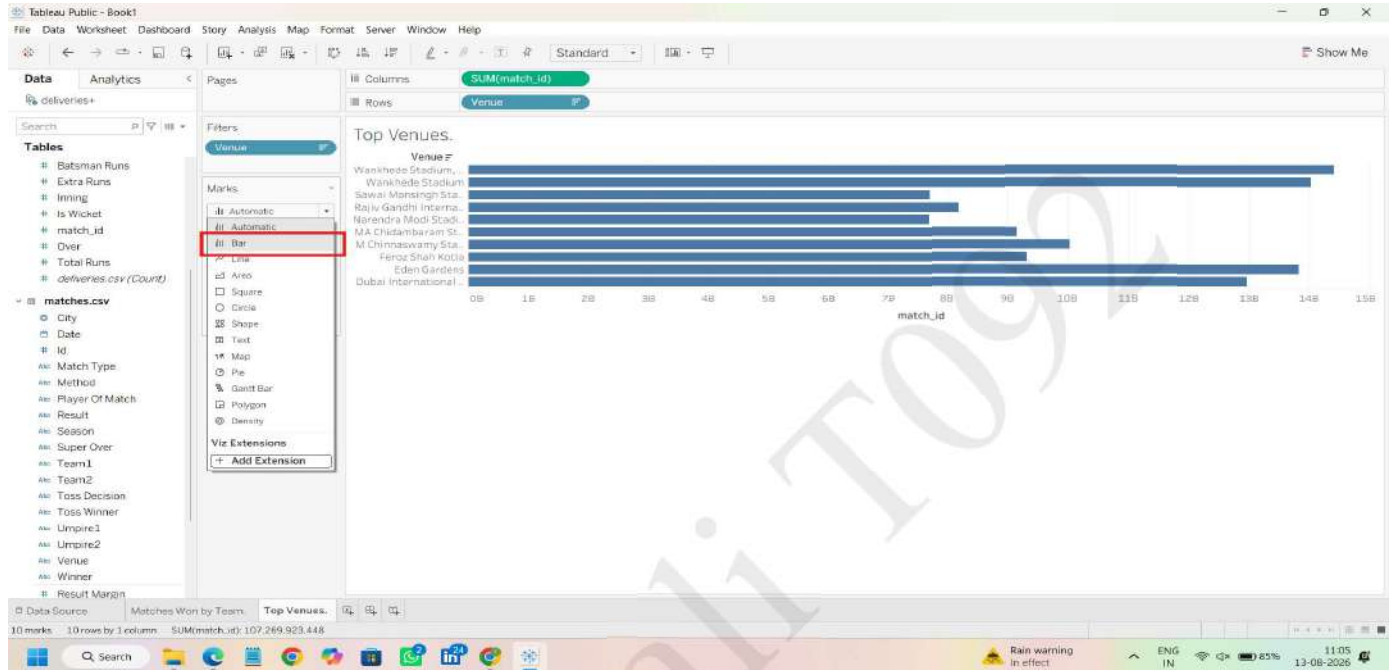

Name:- Vinod Manohar Mali

Roll No:- T092

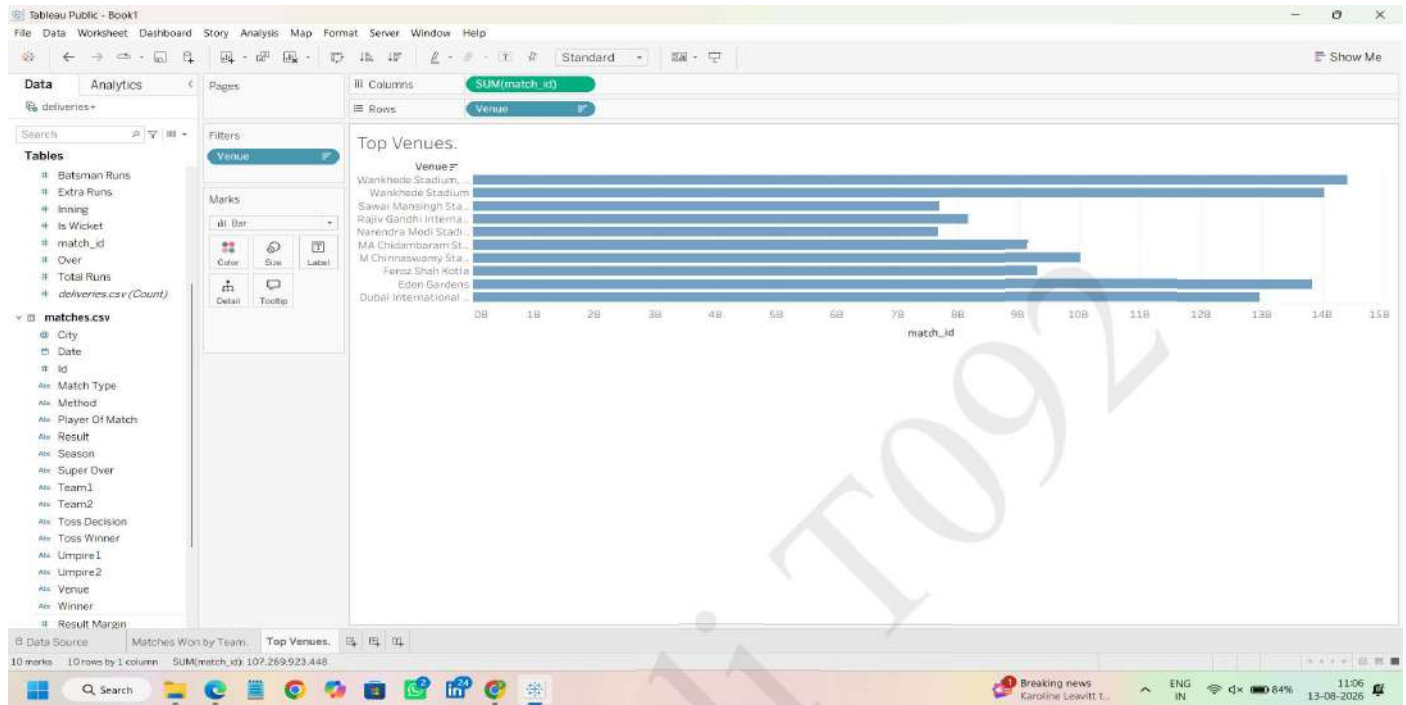

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

Step 7:- Change the mark type on the Marks card to Bar and color it a neutral shade (e.g., Navy Blue).

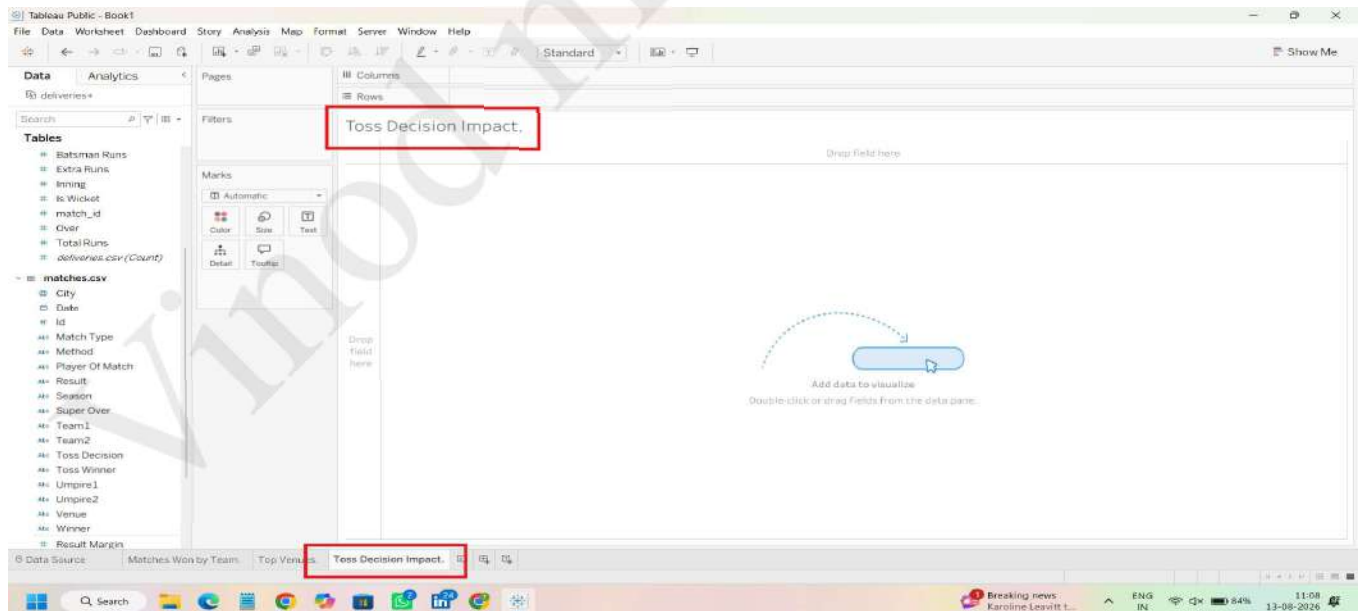

Name:- Vinod Manohar Mali
Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

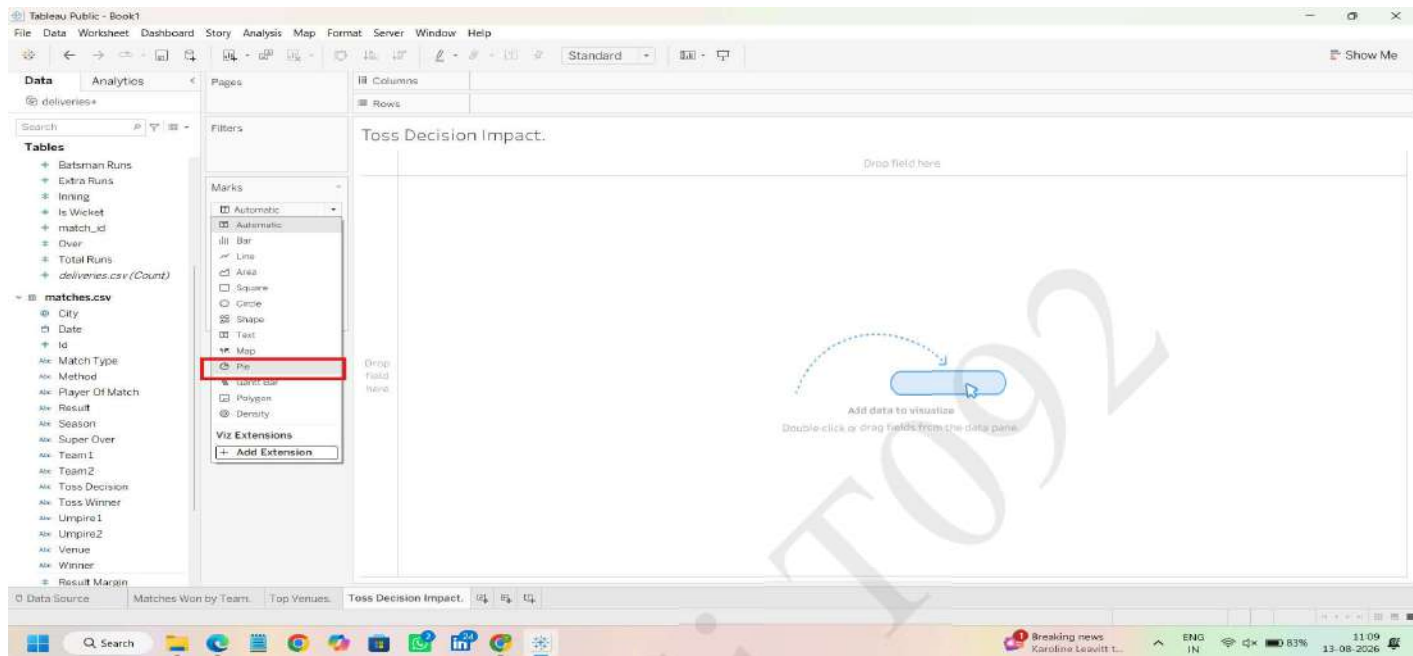

Step 8:- Open a new worksheet and rename it: Toss Decision Impact. Change the Marks card drop-down from Automatic to Pie.

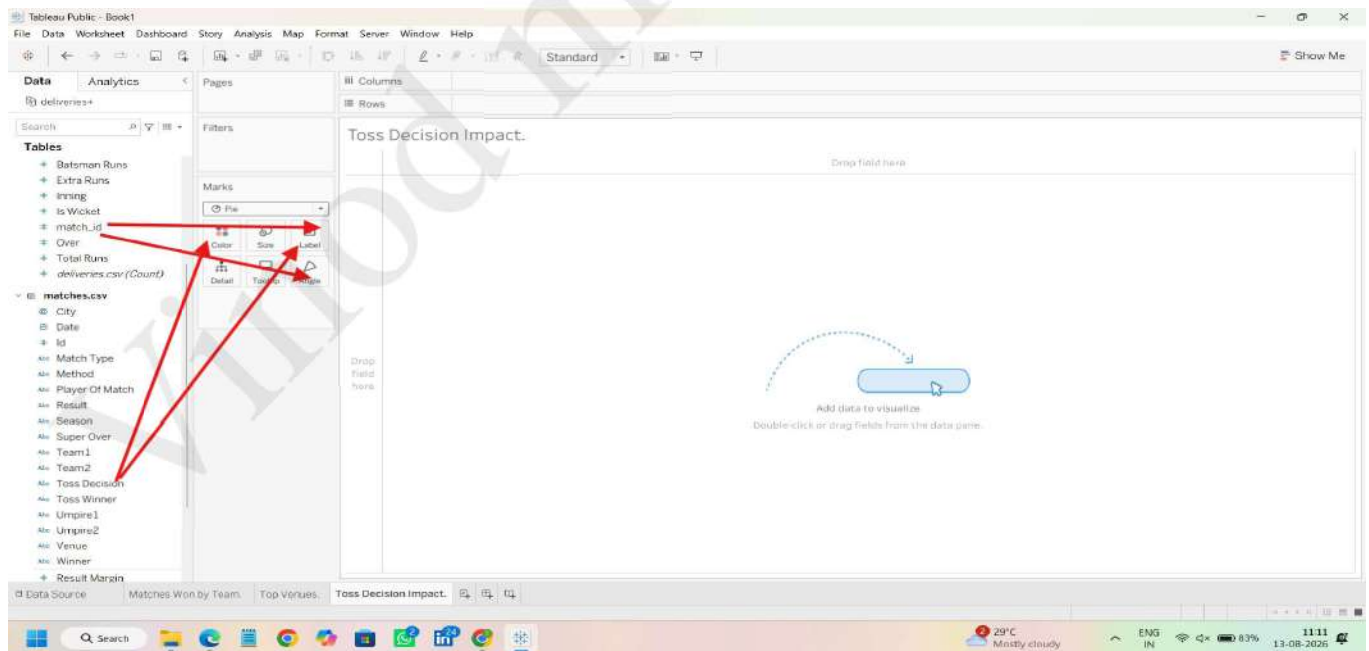

Name:- Vinod Manohar Mali
Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

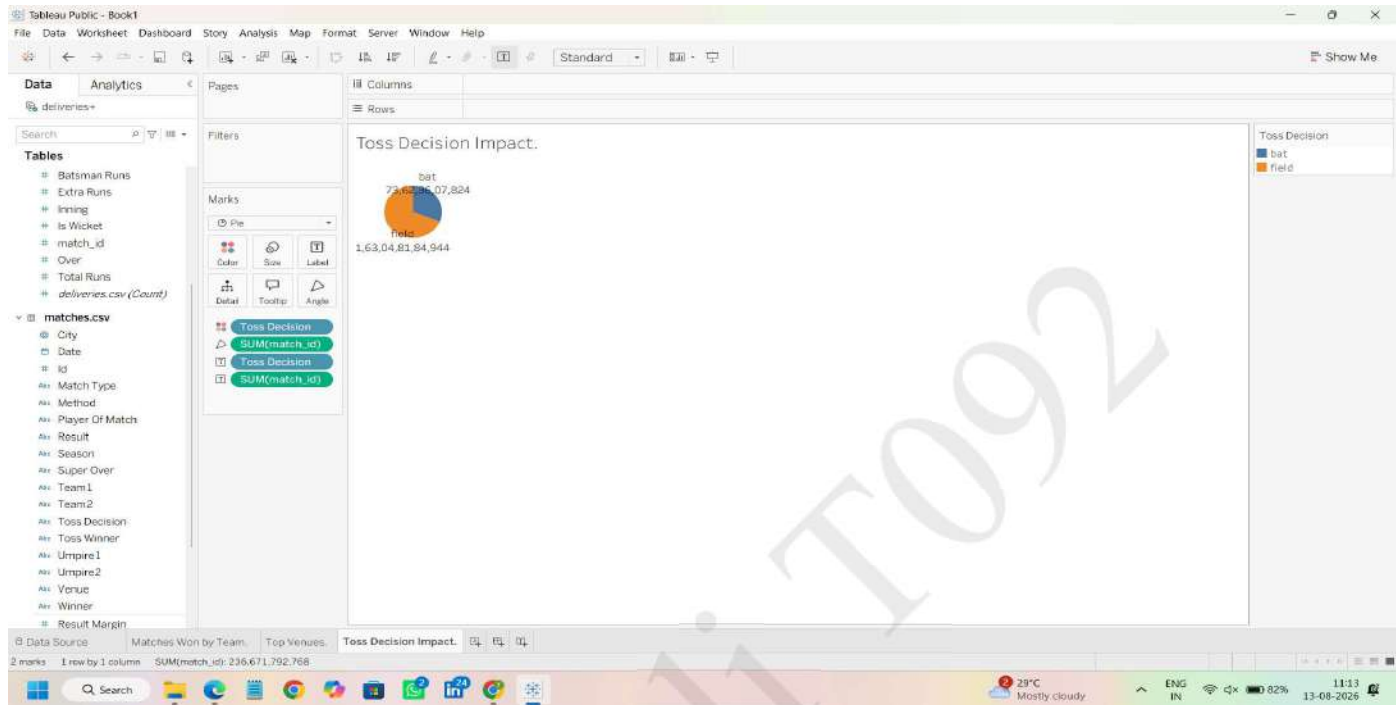

Step 9:- Drag Toss Decision (bat/field) to Color on the Marks card. Drag Matches (Count) to Angle on the Marks card. Drag Toss Decision and Matches (Count) to Label on the Marks card

Name:- Vinod Manohar Mali
Roll No:- T092

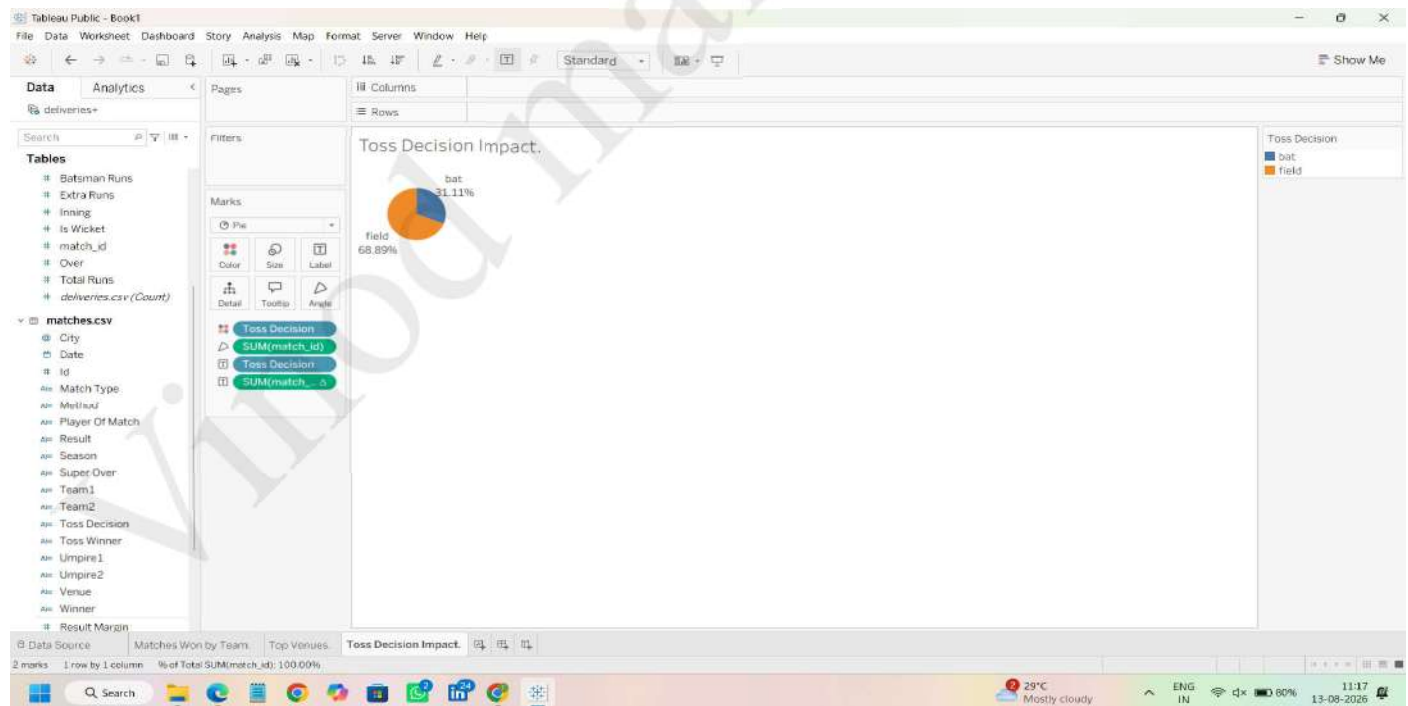

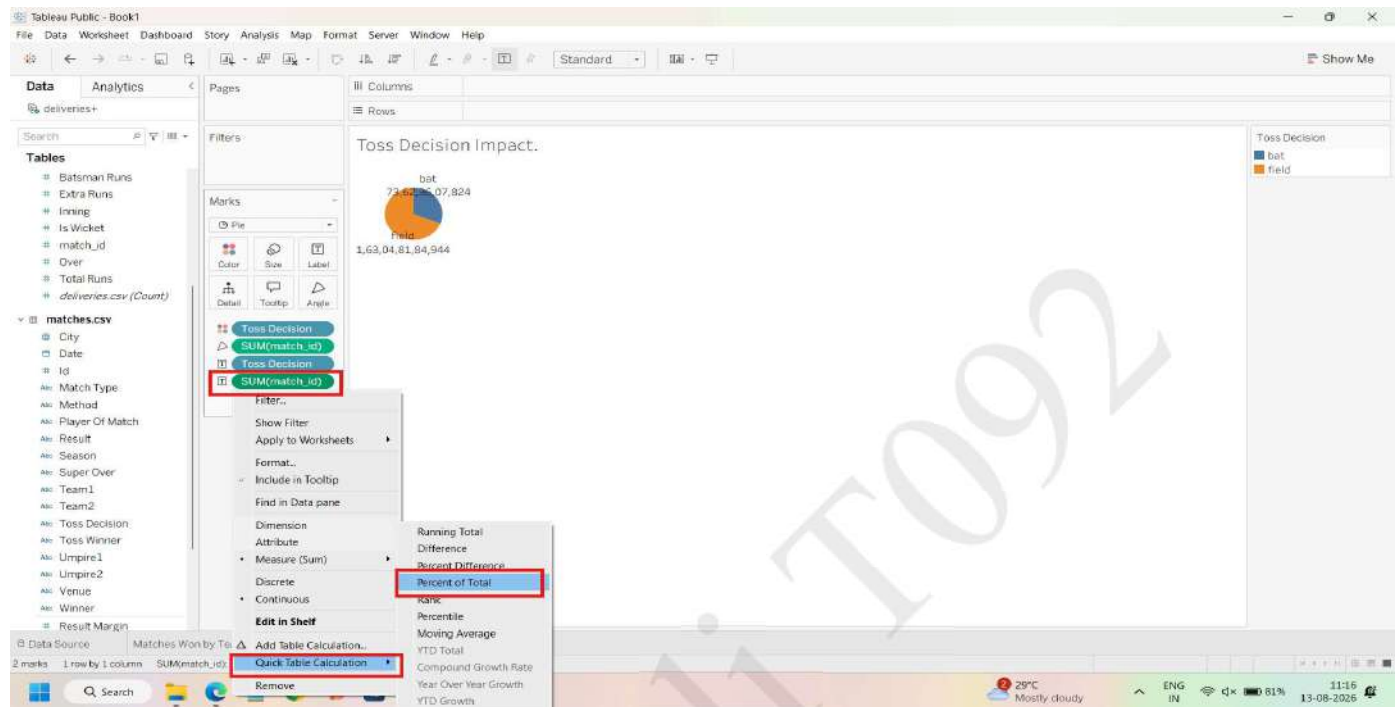

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

Step 10:- Look at the Marks card on the left side of your chart view. Find the green pill named CNT(Matches) (or CNTD(Id)) that has a small T or Label icon next to it. Right-click directly on that green pill (or click its small drop-down arrow). In the pop-up menu, hover over Quick Table Calculation. Select Percent of Total.

Name:- Vinod Manohar Mali
Roll No:- T092

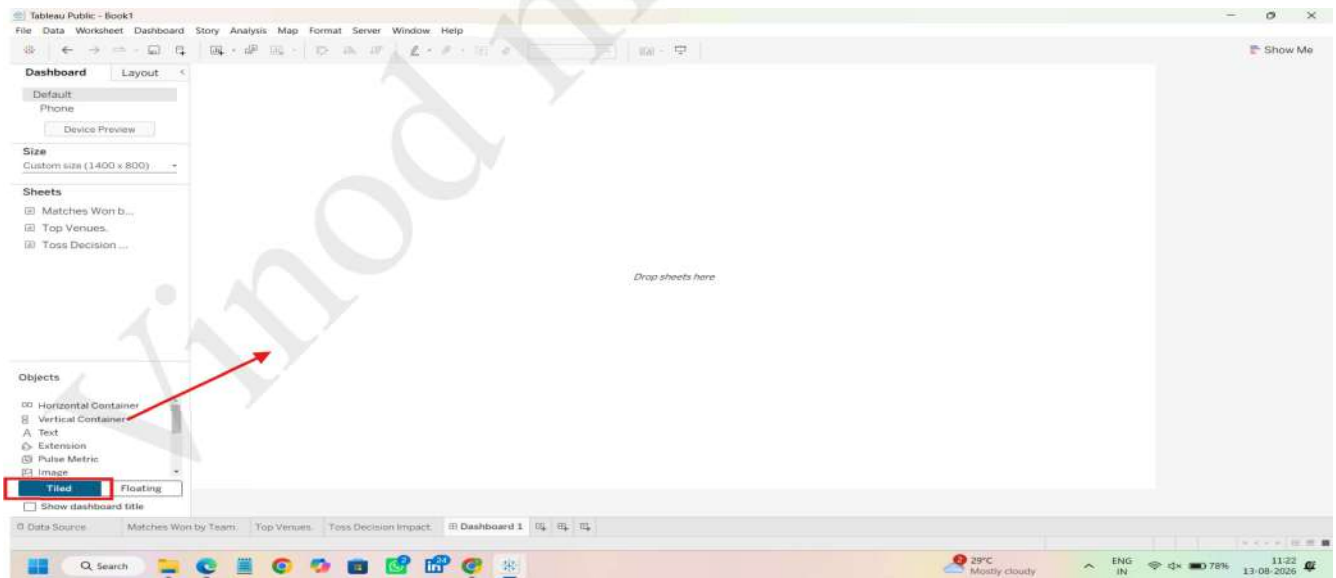

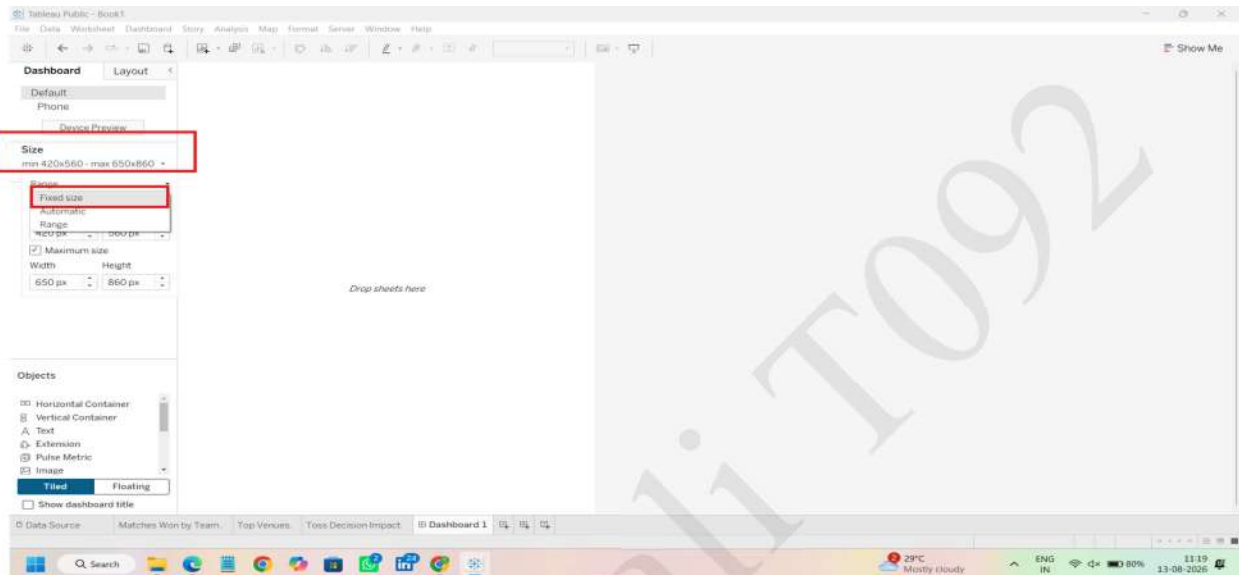

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

Name:- Vinod Manohar Mali
Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

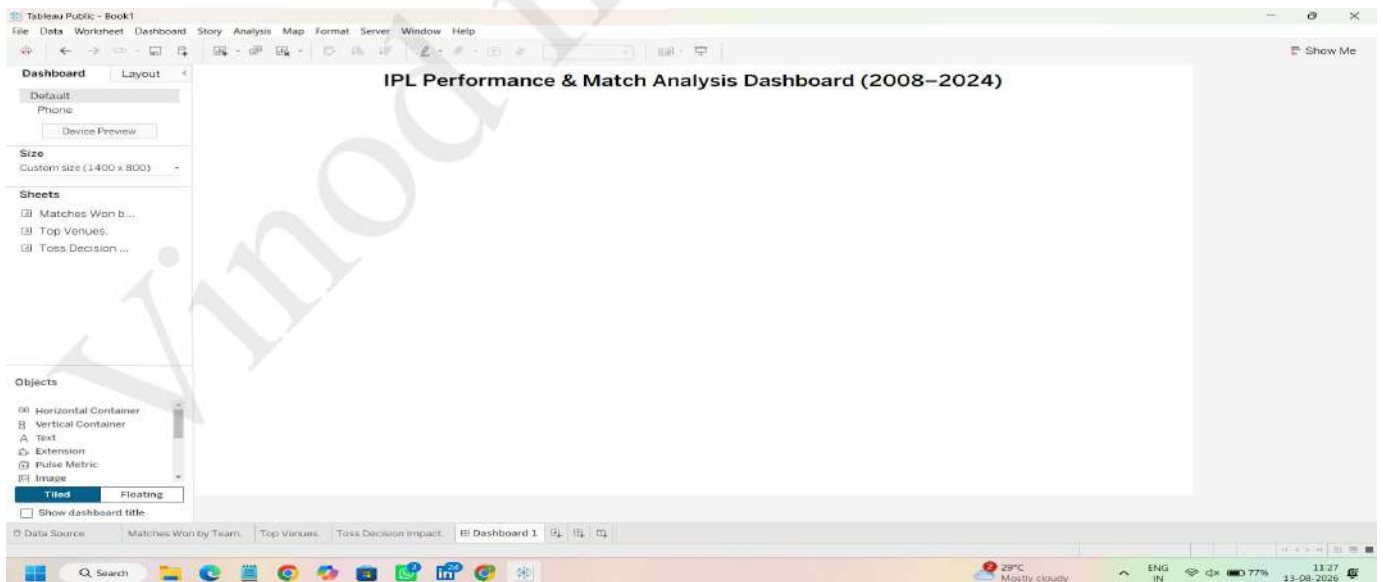

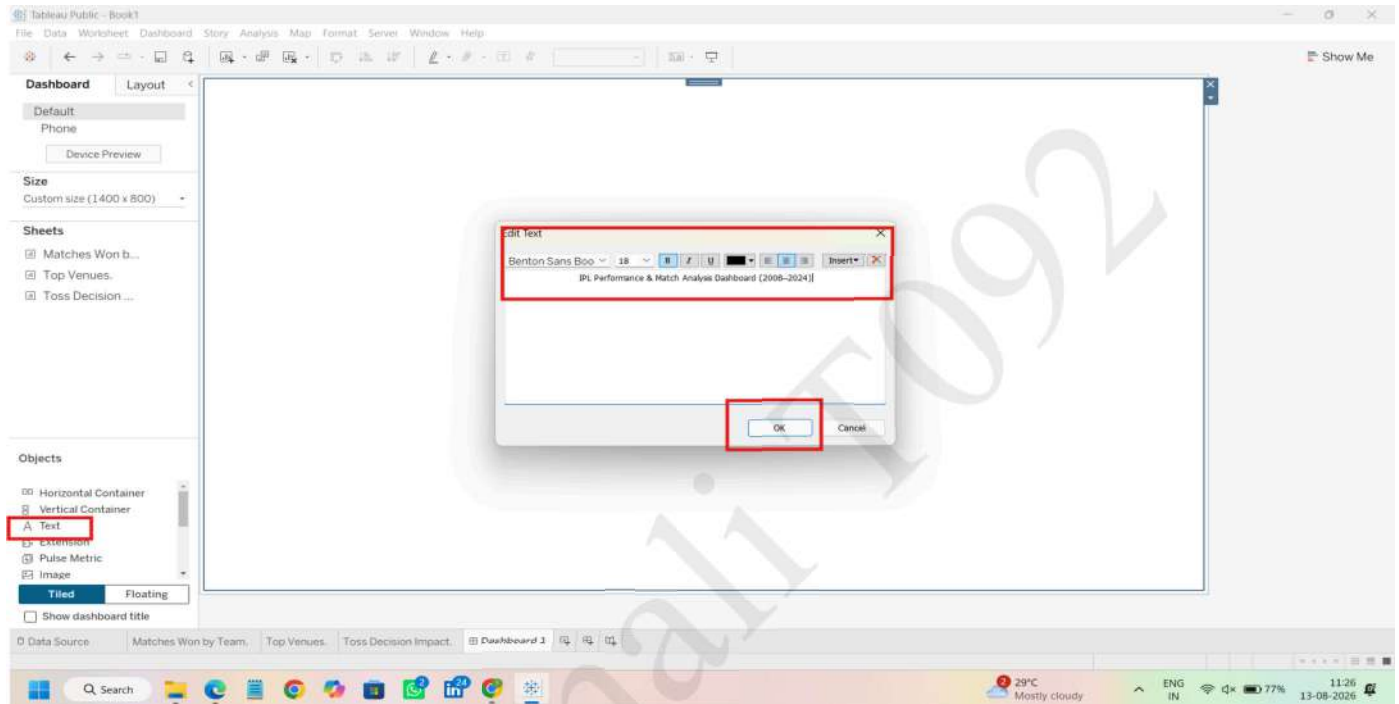

Step 11:- Create a new Dashboard (click the middle icon at the bottom tab area). On the left sidebar under Size, set Fixed Size to Desktop Browser (1000 x 800) or Automatic. Under Objects on the bottom left, ensure Tiled is selected. Drag a Vertical Container into the blank dashboard area

Name:- Vinod Manohar Mali
Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

Step 12:- Add a Text object at the top inside the container: Header Text: IPL Performance & Match Analysis Dashboard (2008–2024)
Format: Bold, 18pt, centered.

Name:- Vinod Manohar Mali
Roll No:- T092

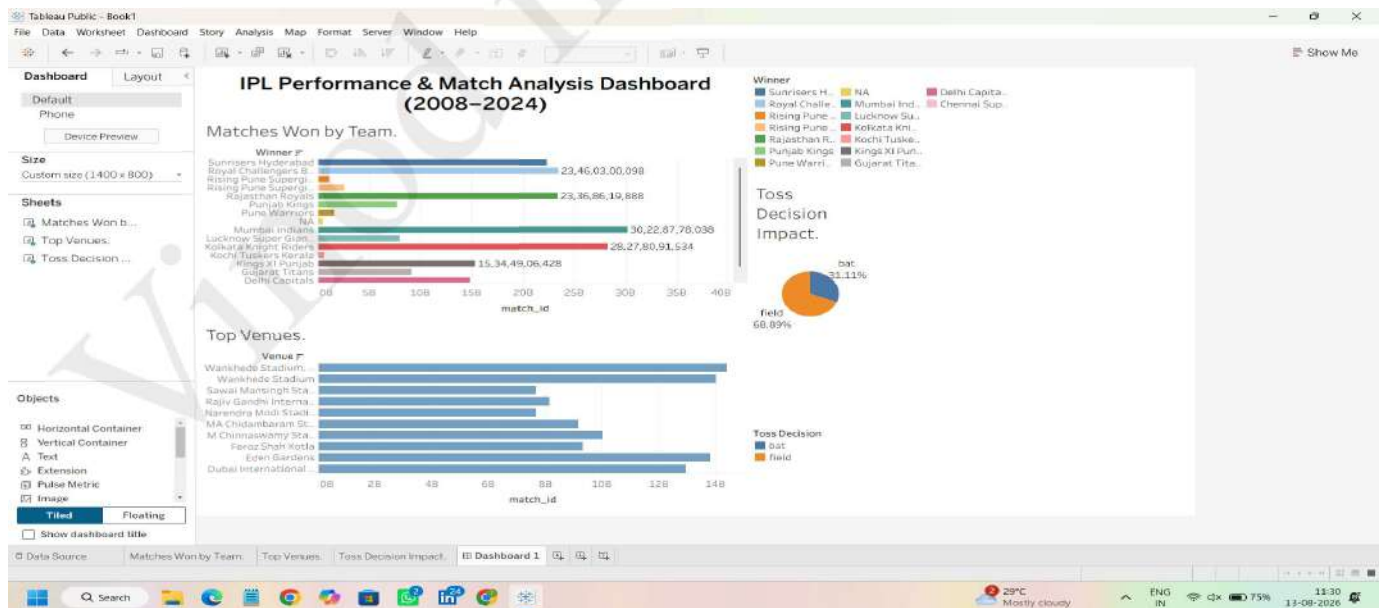

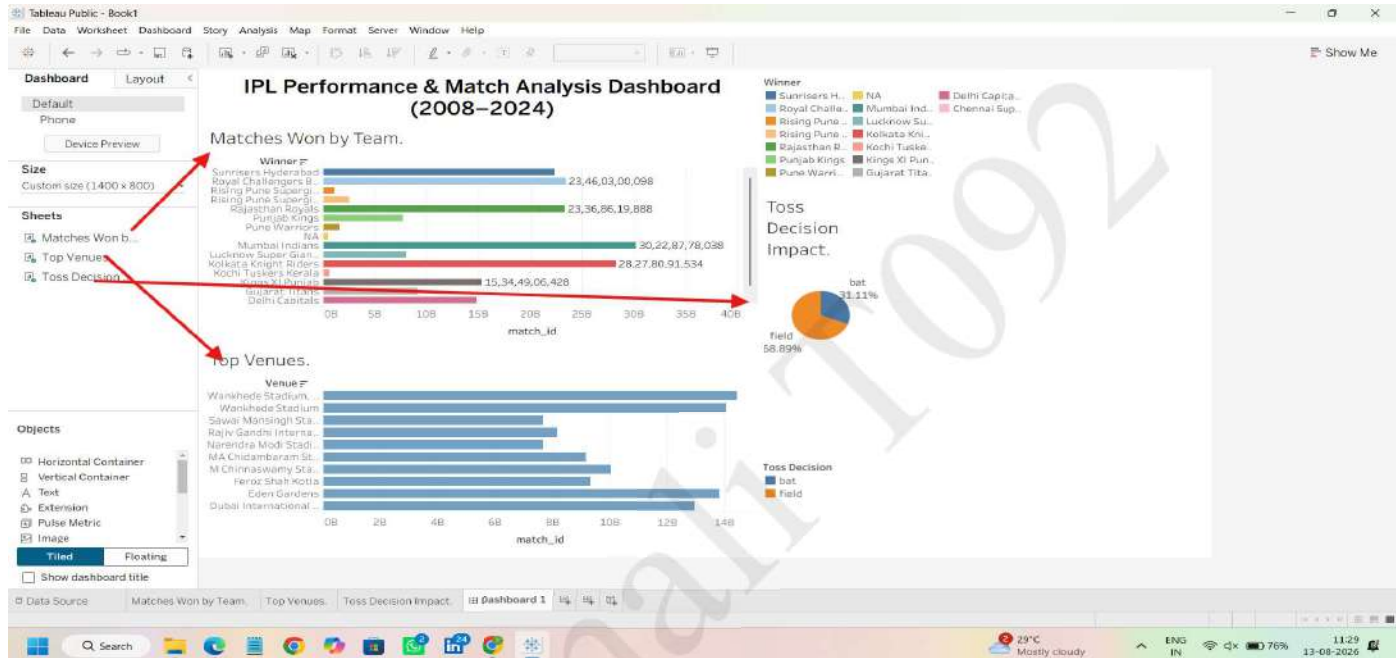

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

Step 13:- Drag your three sheets into the layout:

Drag Matches Won by Team into the top/left area.

Drag Top Venues next to or below it.

Drag Toss Decision Impact to the side panel.

Name:- Vinod Manohar Mali

Roll No:- T092

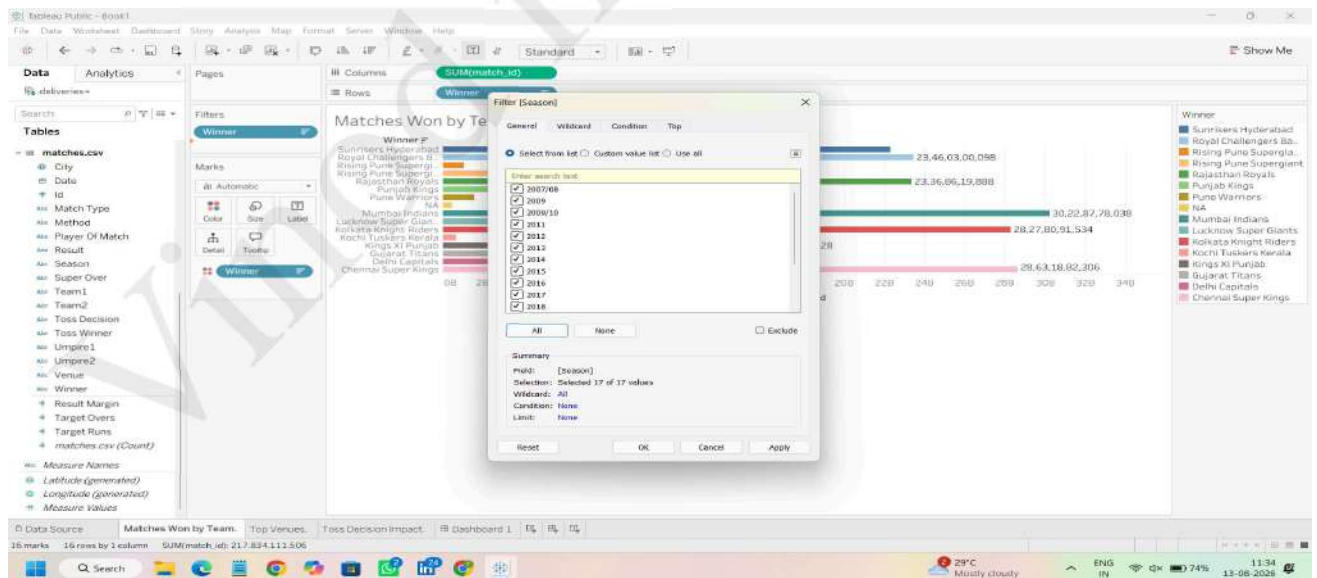

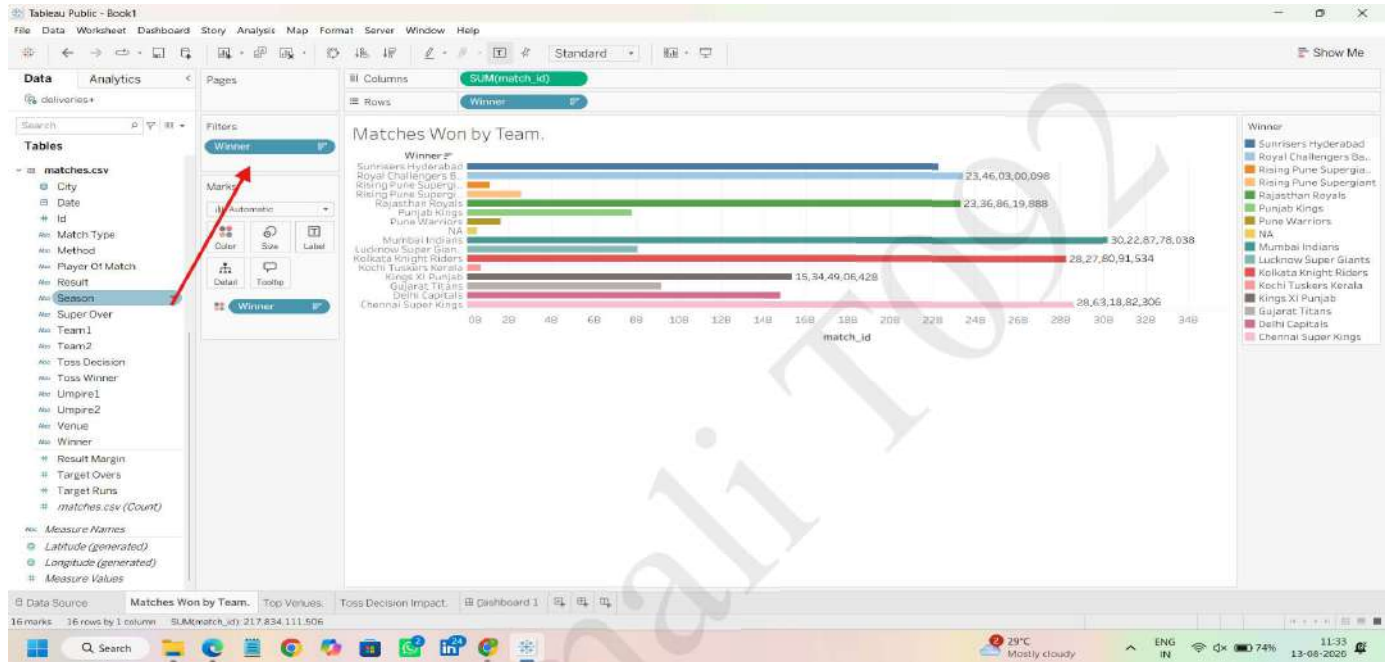

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

B: Add filters and interactive controls

Step 1:- Go back to your Matches Won by Team worksheet.

Drag Season from the Data pane onto the Filters card.

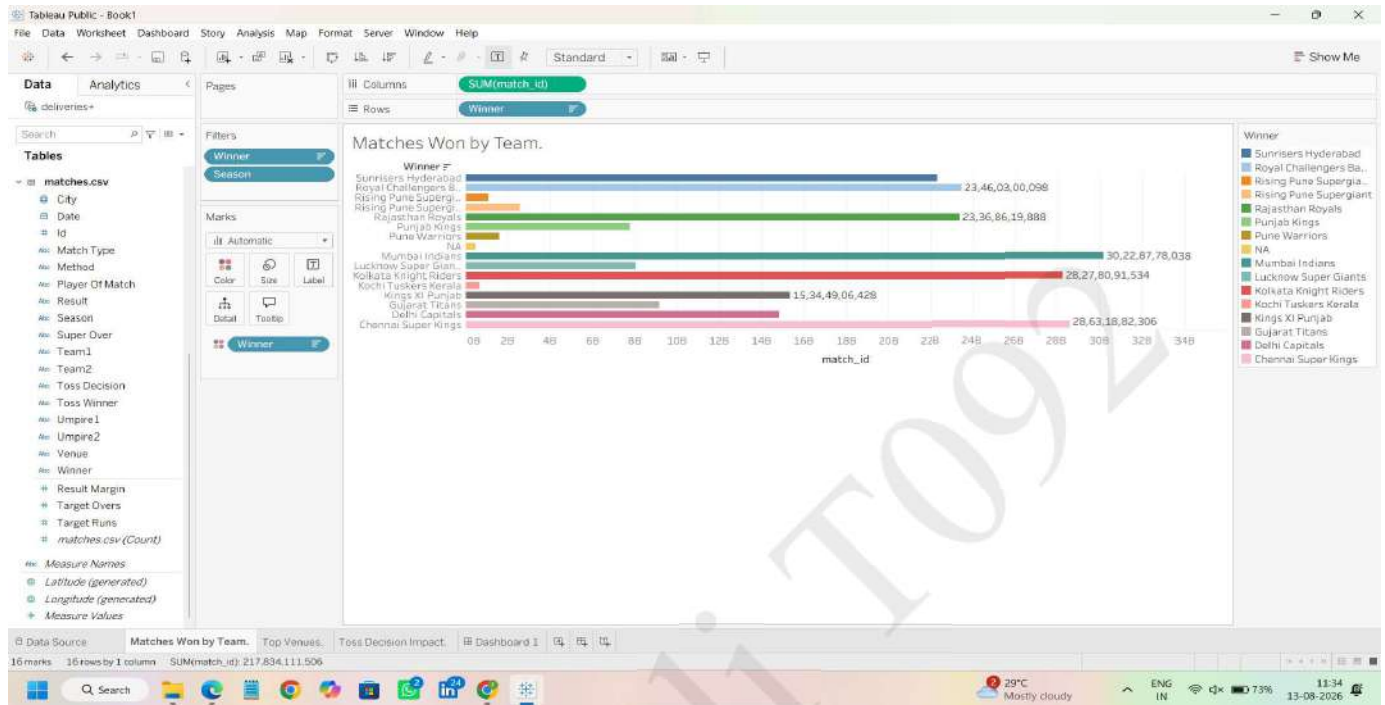

Select All and click OK.

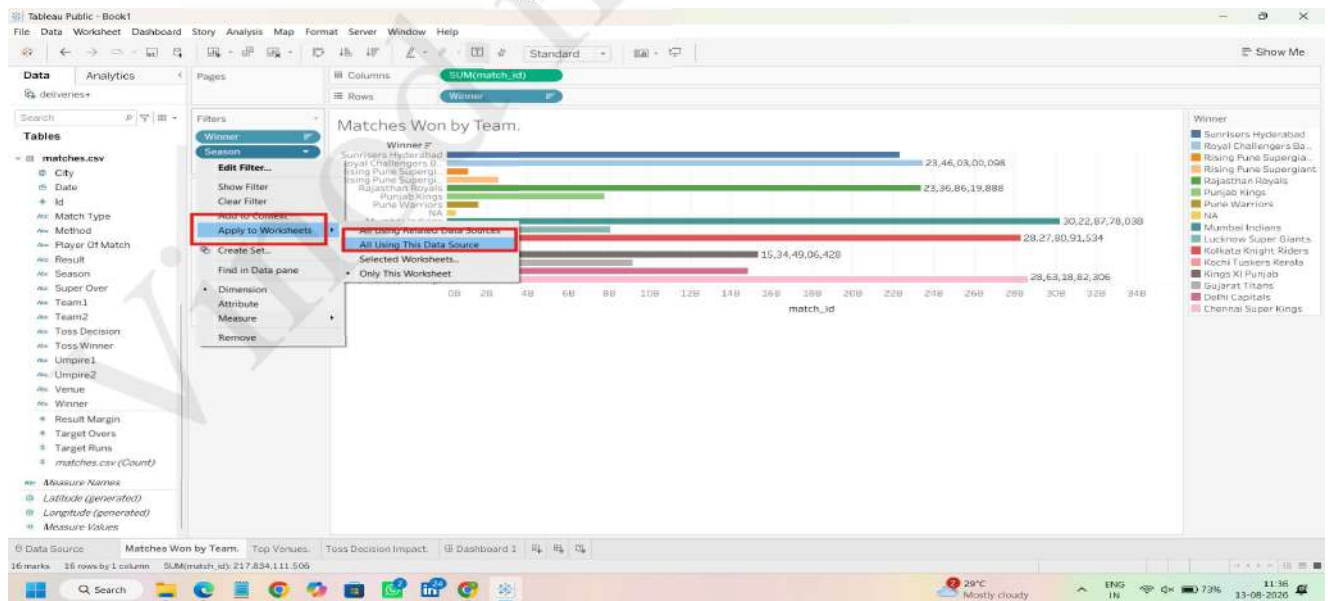

Name:- Vinod Manohar Mali

Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

Step 2:- Right-click the Season pill on the Filters card and select Apply to Worksheets All Using This Data Source (This ensures changing the season updates all dashboard charts simultaneously).

Name:- Vinod Manohar Mali
Roll No:- T092

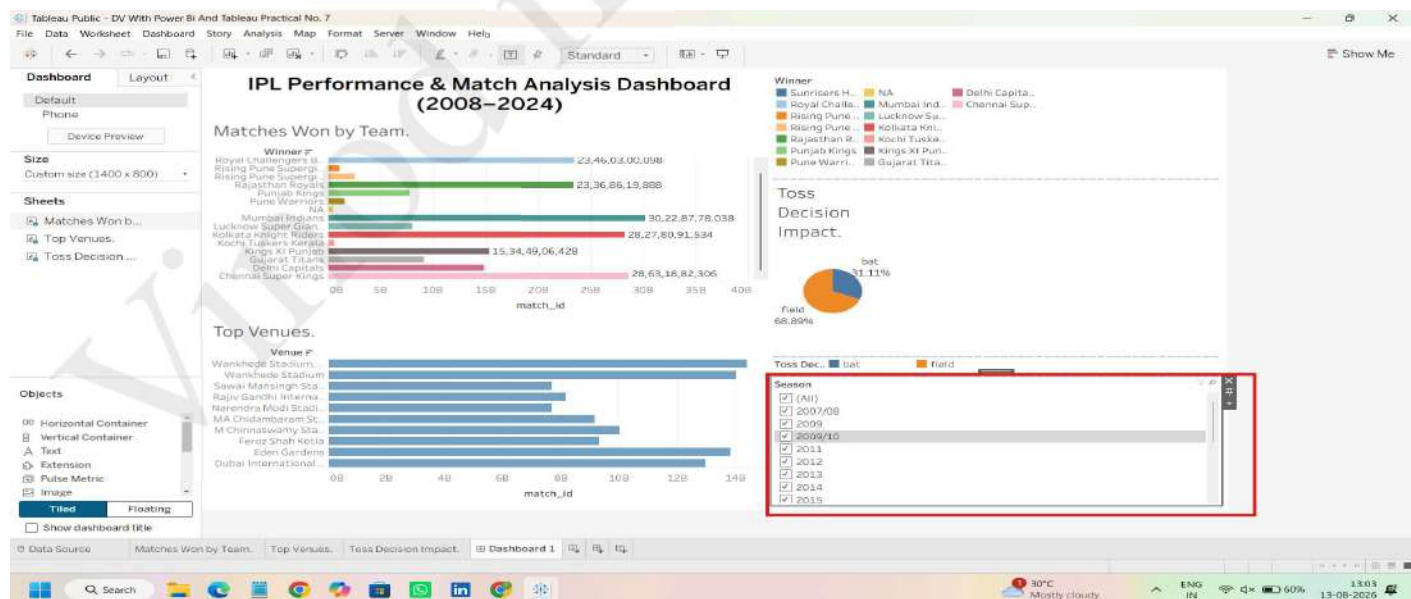

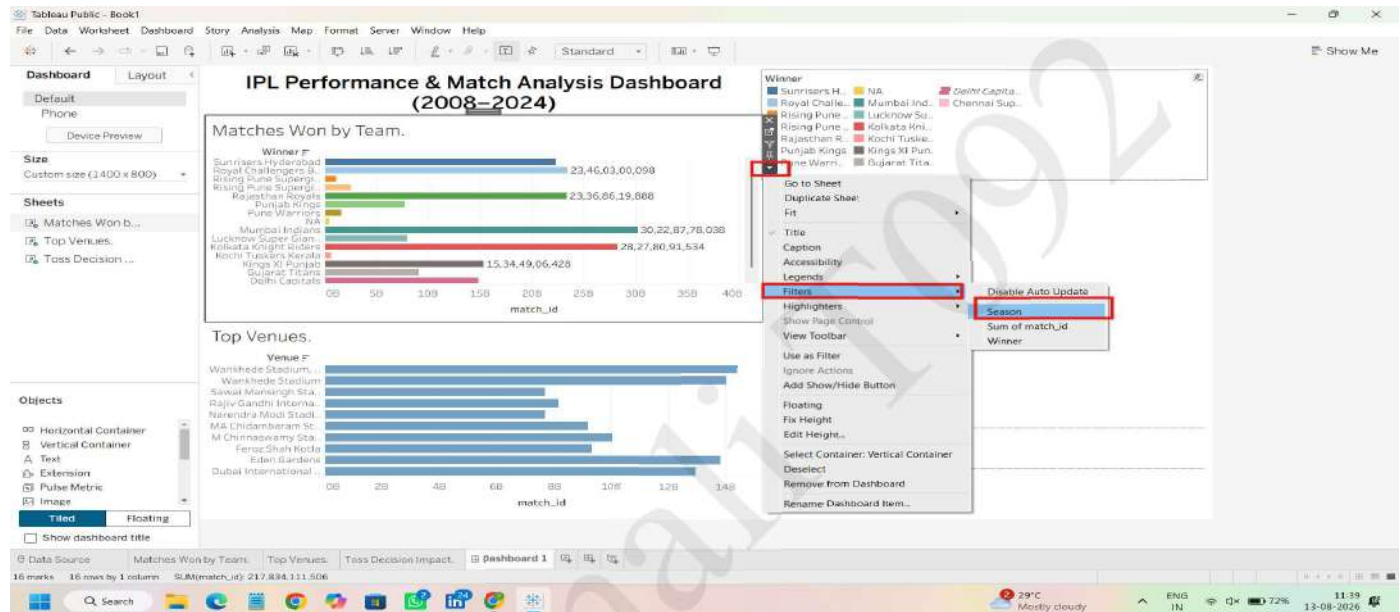

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

Step 3:- Switch back to your main Dashboard tab.

Click on the Matches Won by Team chart box to select it.

Click the small More Options drop-down arrow in the top-right corner of the chart outline box. Go to Filters select Season.

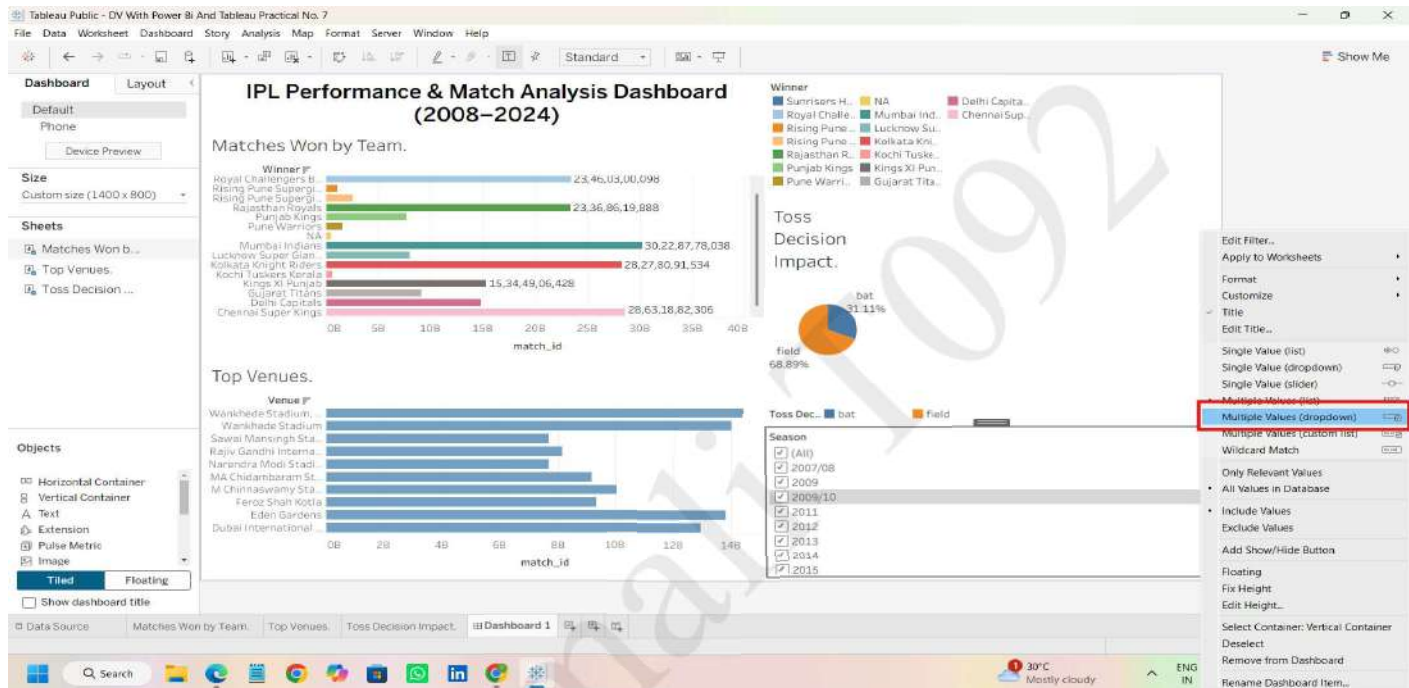

The Season filter box will appear on your right sidebar.

Name:- Vinod Manohar Mali
Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

Step 4:- Click the drop-down arrow on the top right of the new Season filter container box on your dashboard. Change the filter style to Multiple Values (Dropdown) or Wildcard Match / Single Value List (Dropdown keeps the dashboard clean)

Step 5:- Repeat the process to add two more interactive filters:

- o Click once anywhere inside your Matches Won By Team bar chart. A gray border will appear around it, indicating it is selected.

- o Click the downward-pointing triangle (More Options) located on the top right edge of that gray border.

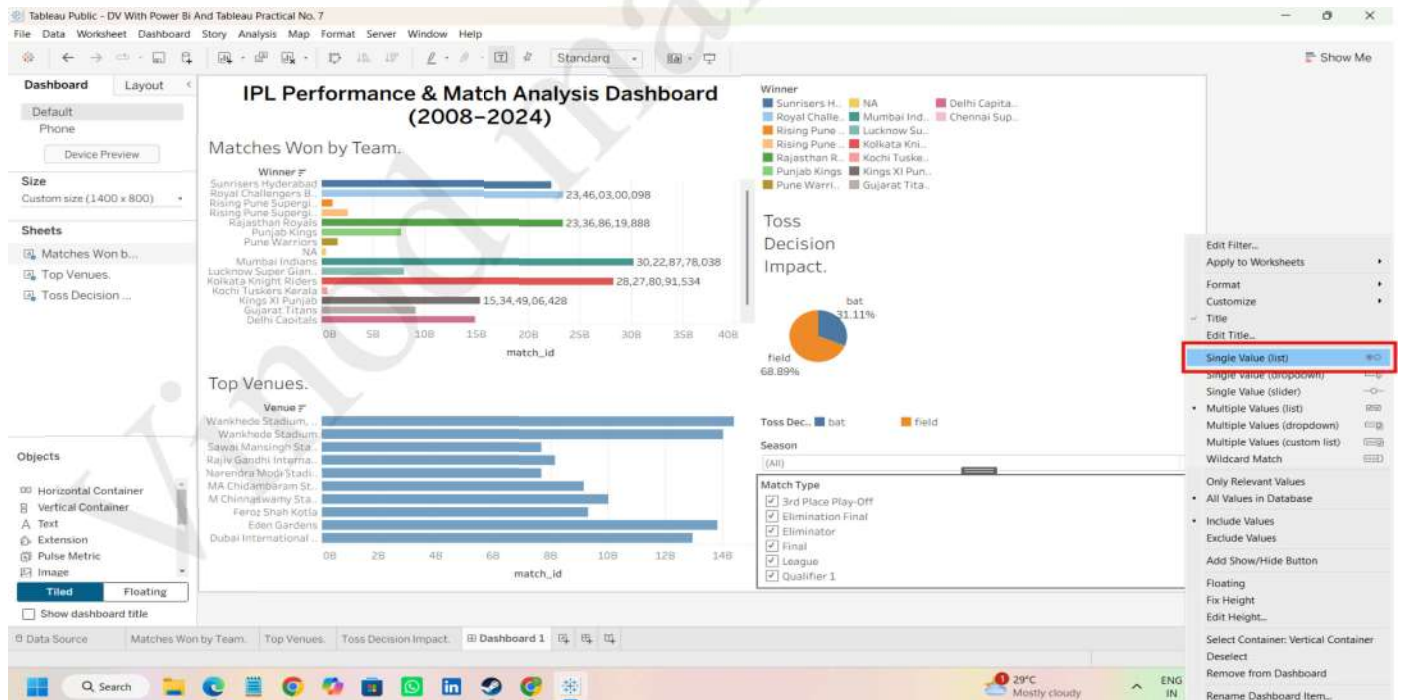

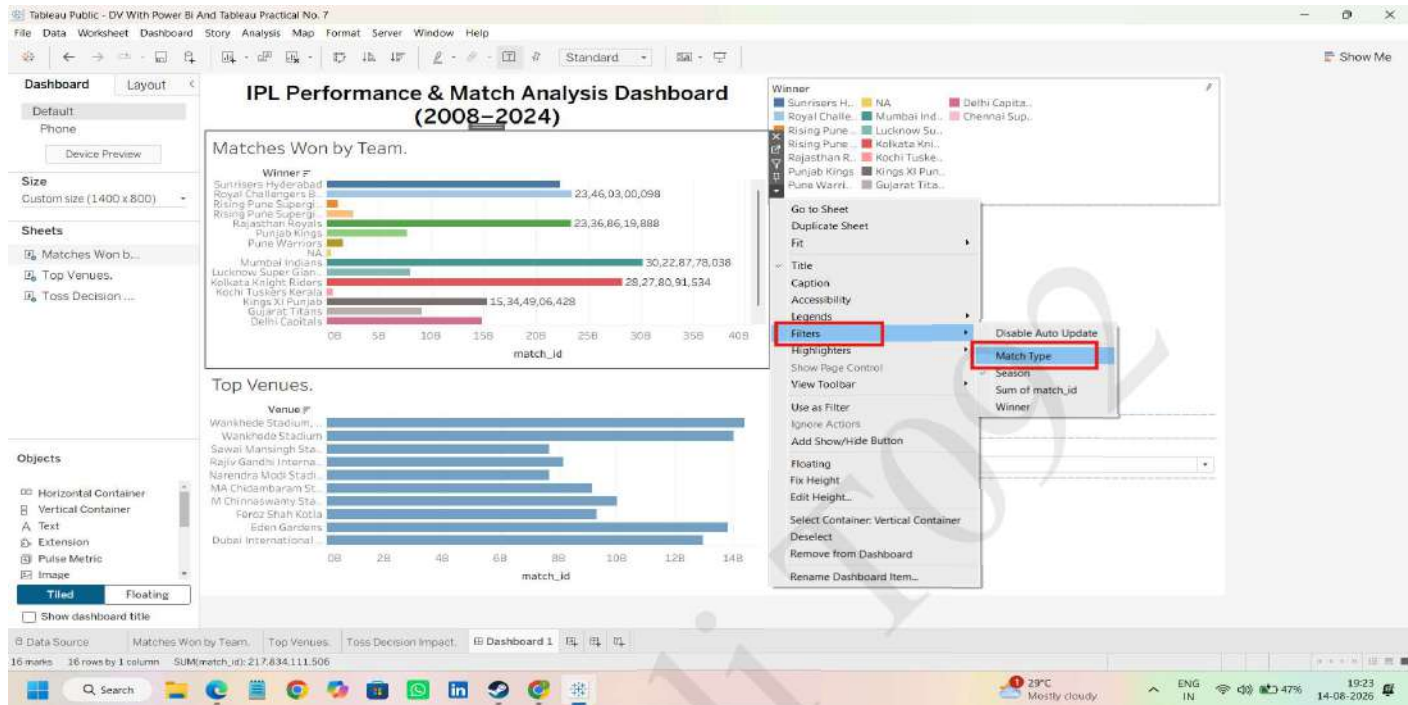

- o Hover over Filters in the menu and select Match Type. (Note: If it is not listed, you will need to navigate back to your "Matches Won By Team" worksheet, drag Match Type to the Filters shelf there, and then return to your dashboard).

Match Type (Filter by League vs. Playoff / Final matches) - set control type to Single Value (List) or Radio Buttons.

Name:- Vinod Manohar Mali

Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

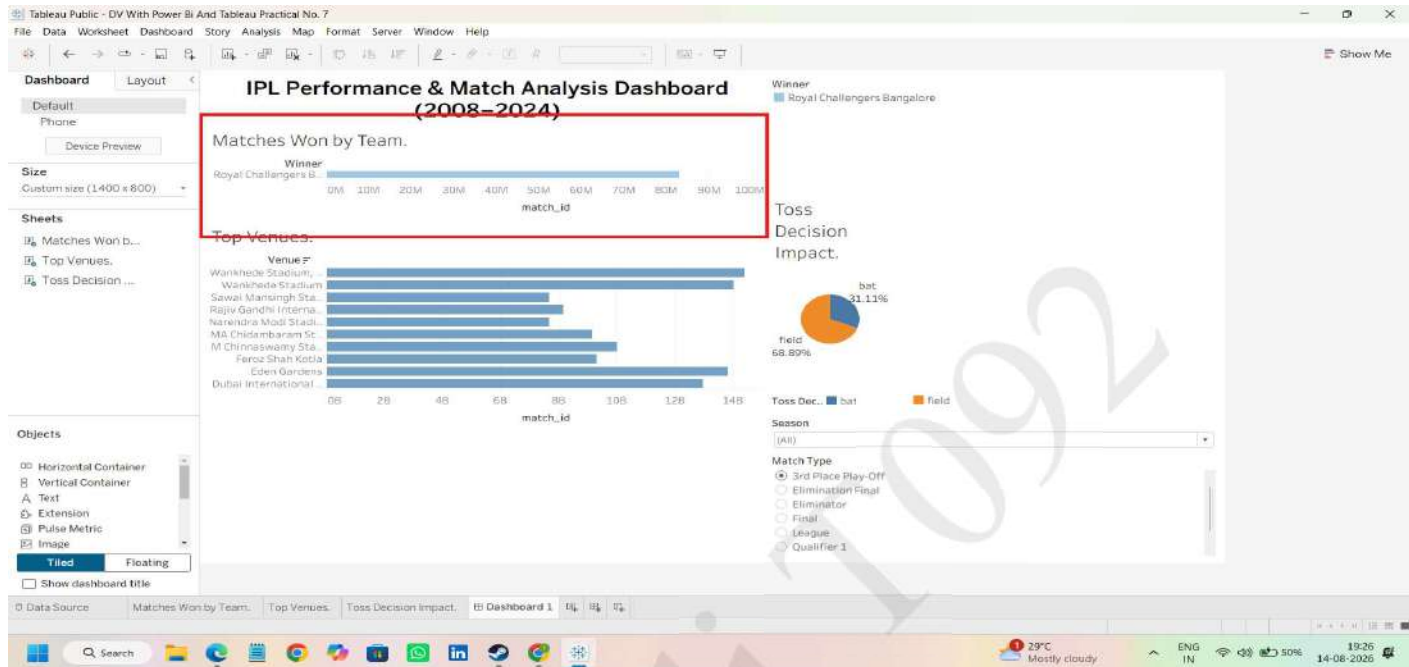

Name:- Vinod Manohar Mali
Roll No:- T092

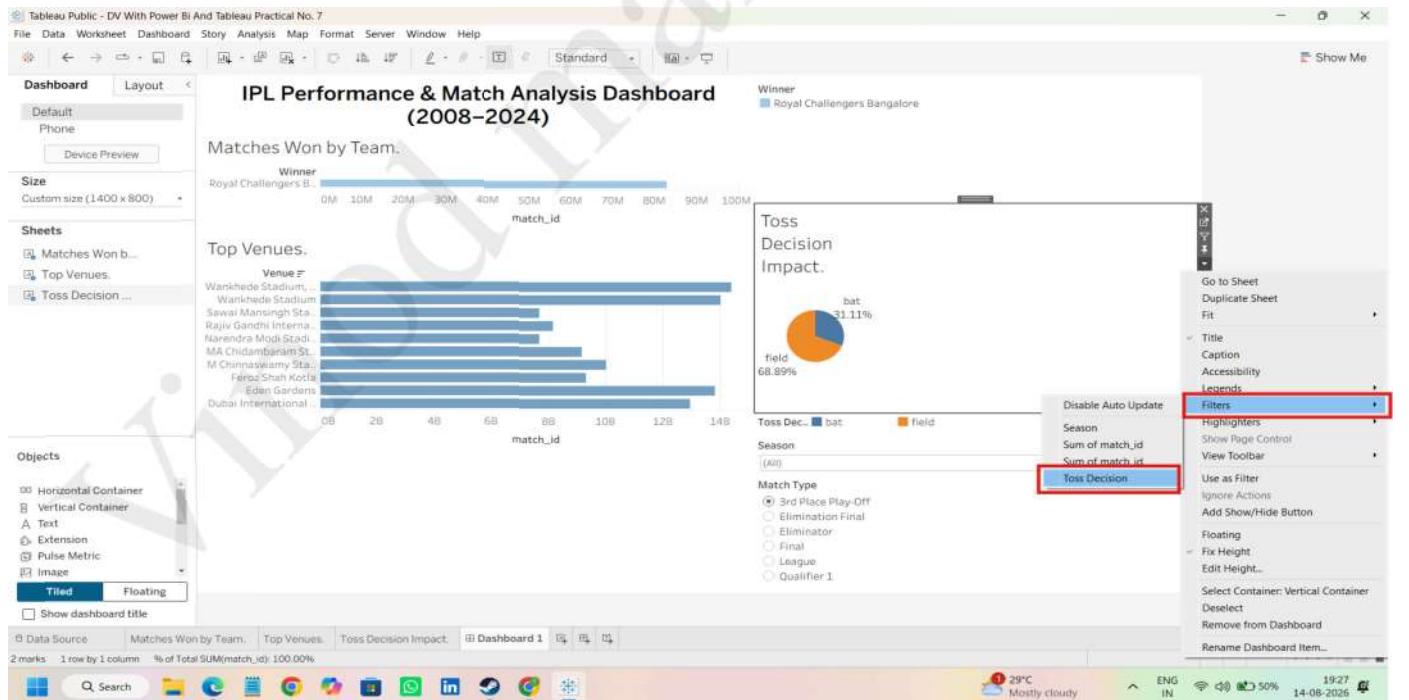

Sheth L.U.J. And Sir M.V. College of Science

Subject:- Data Visualization With Power BI And Tableau

Practical No 7

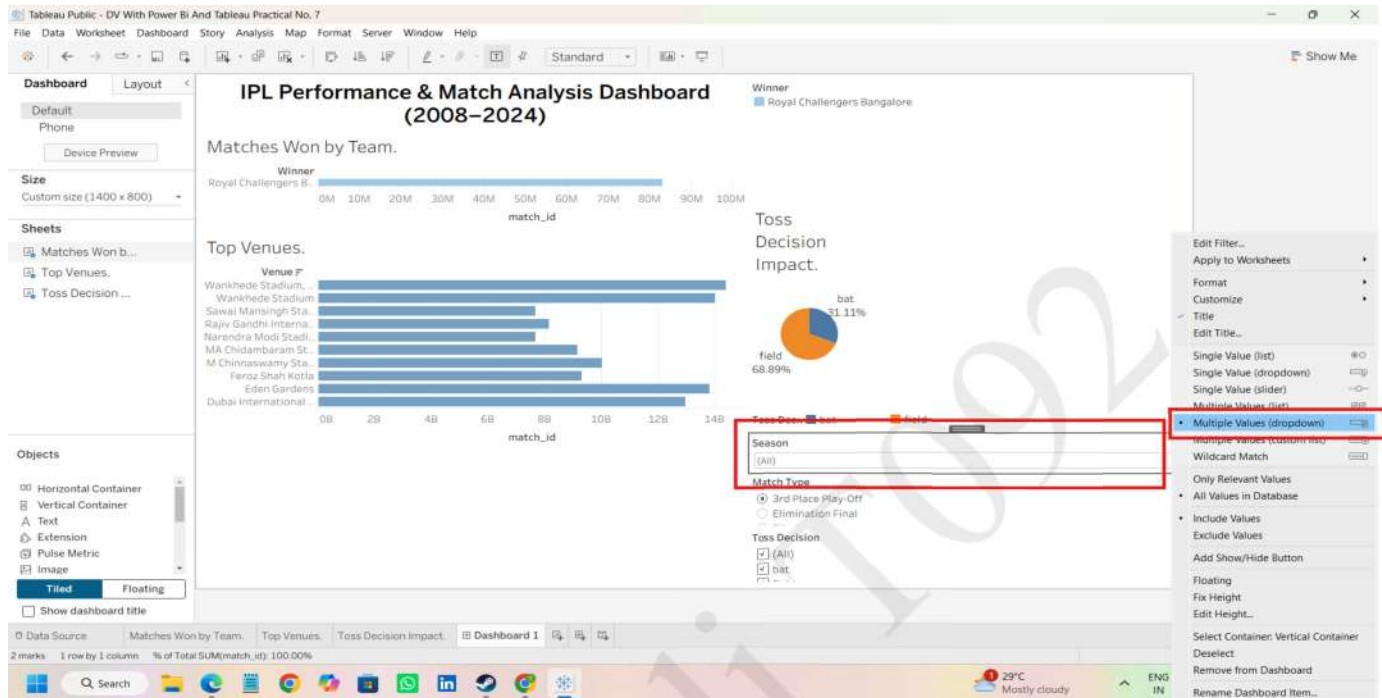

City or Toss Decision - set as a Multiple Values (Dropdown).

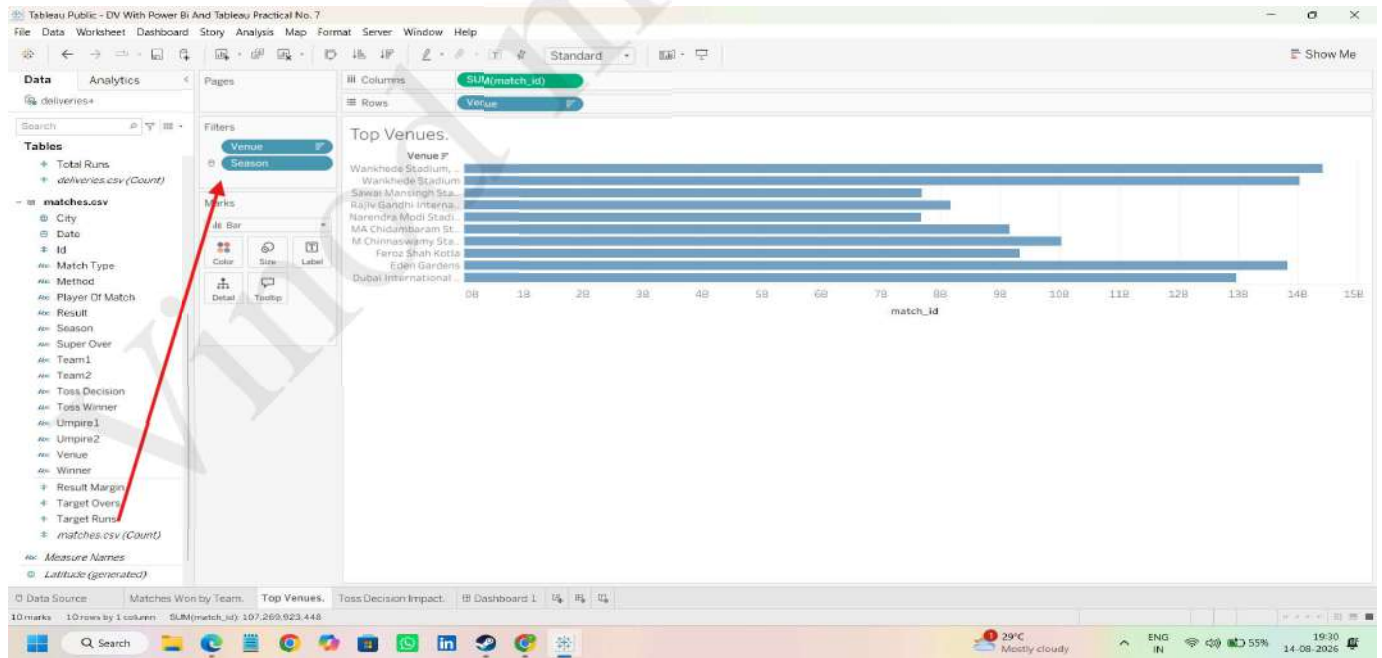

Name:- Vinod Manohar Mali

Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

Step 6:- Go to the Top Venues sheet. Drag Target Runs to the Filters card. Choose Range of Values and click OK.

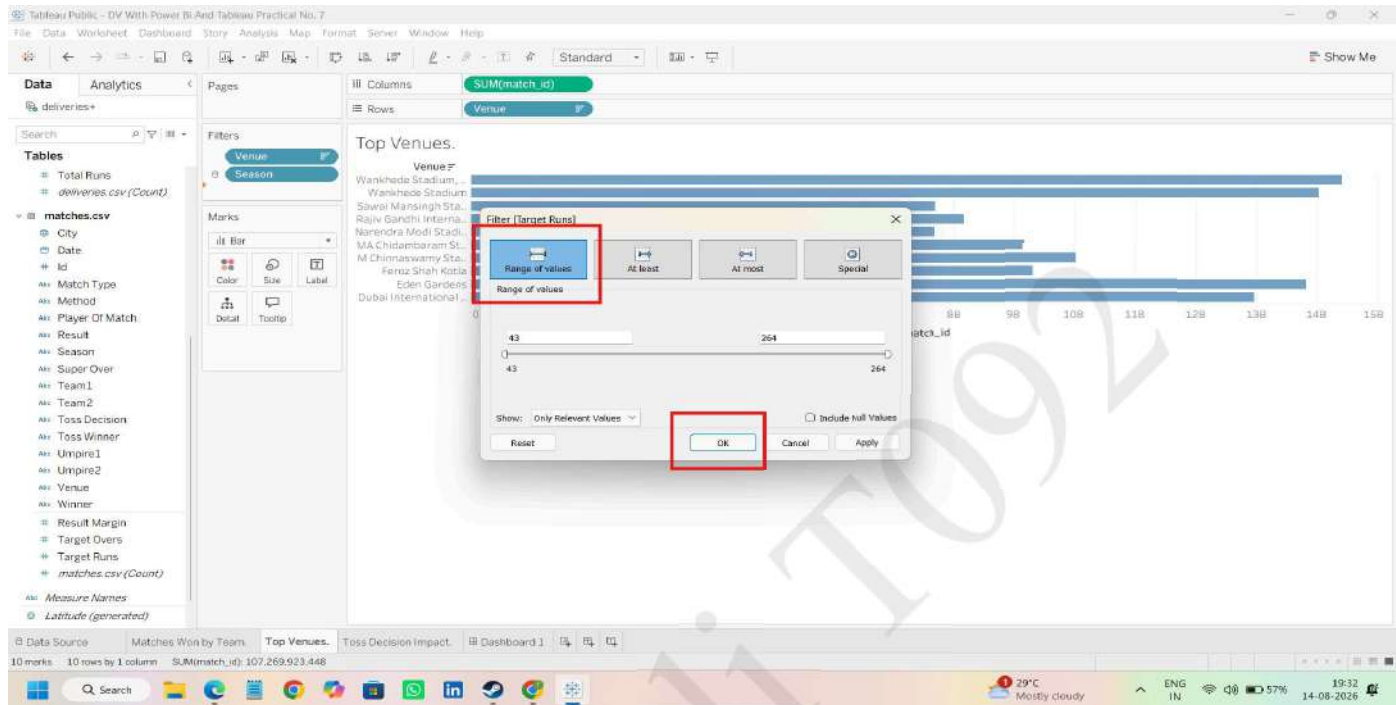

Name:- Vinod Manohar Mali
Roll No:- T092

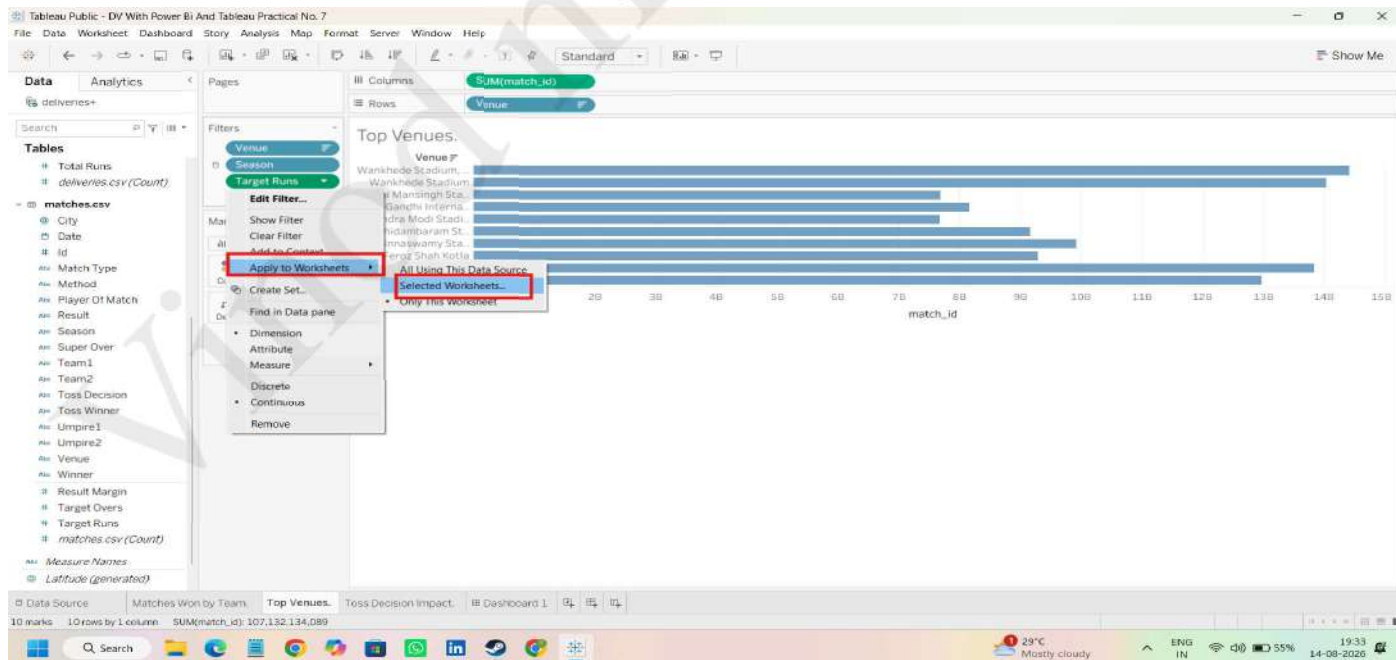

Sheth L.U.J. And Sir M.V. College of Science

Subject:- Data Visualization With Power BI And Tableau

Practical No 7

Step 7:- Right-click the Target Runs filter pill Apply to Worksheets Selected Worksheets (check all 3 dashboard sheets).

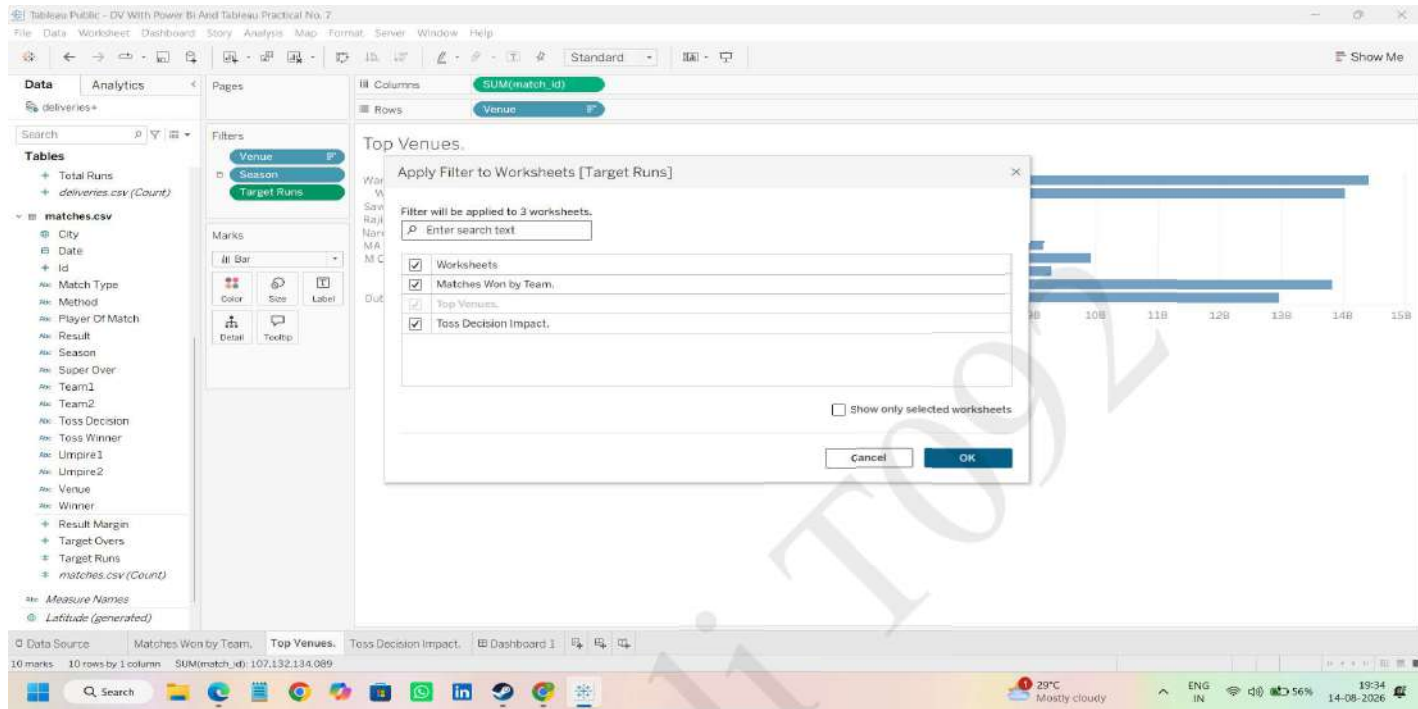

Name:- Vinod Manohar Mali

Roll No:- T092

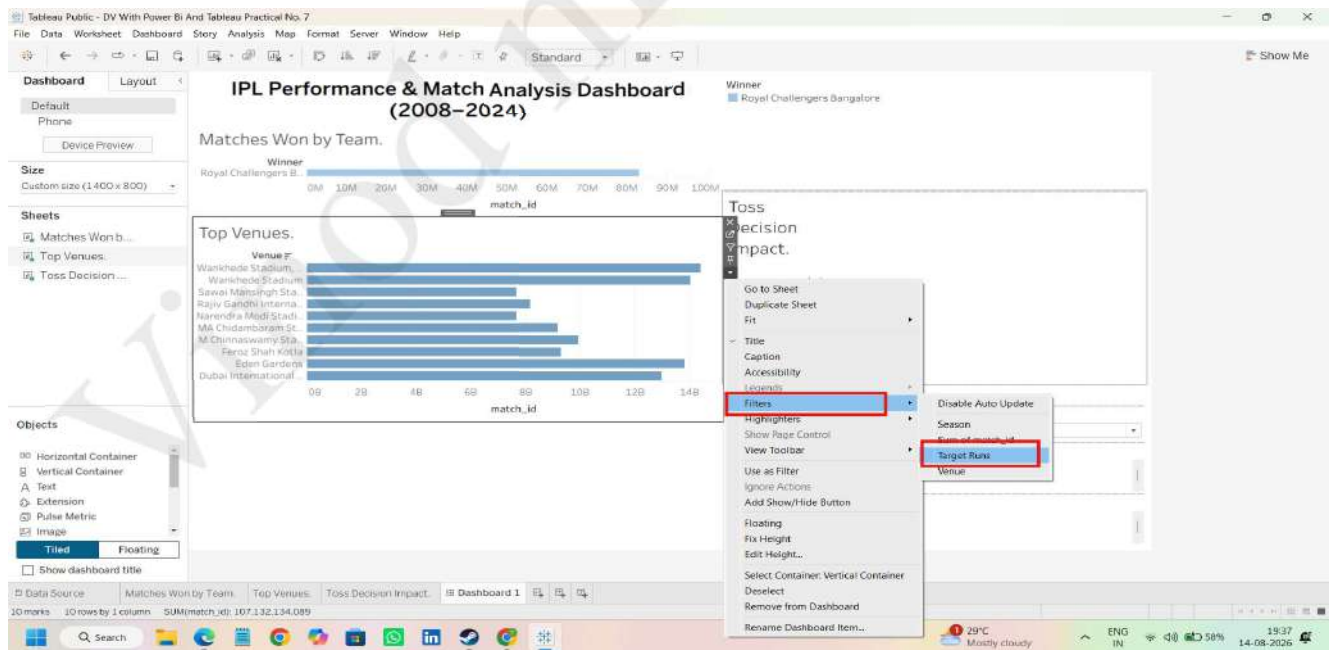

Sheth L.U.J. And Sir M.V. College of Science

Subject:- Data Visualization With Power BI And Tableau

Practical No 7

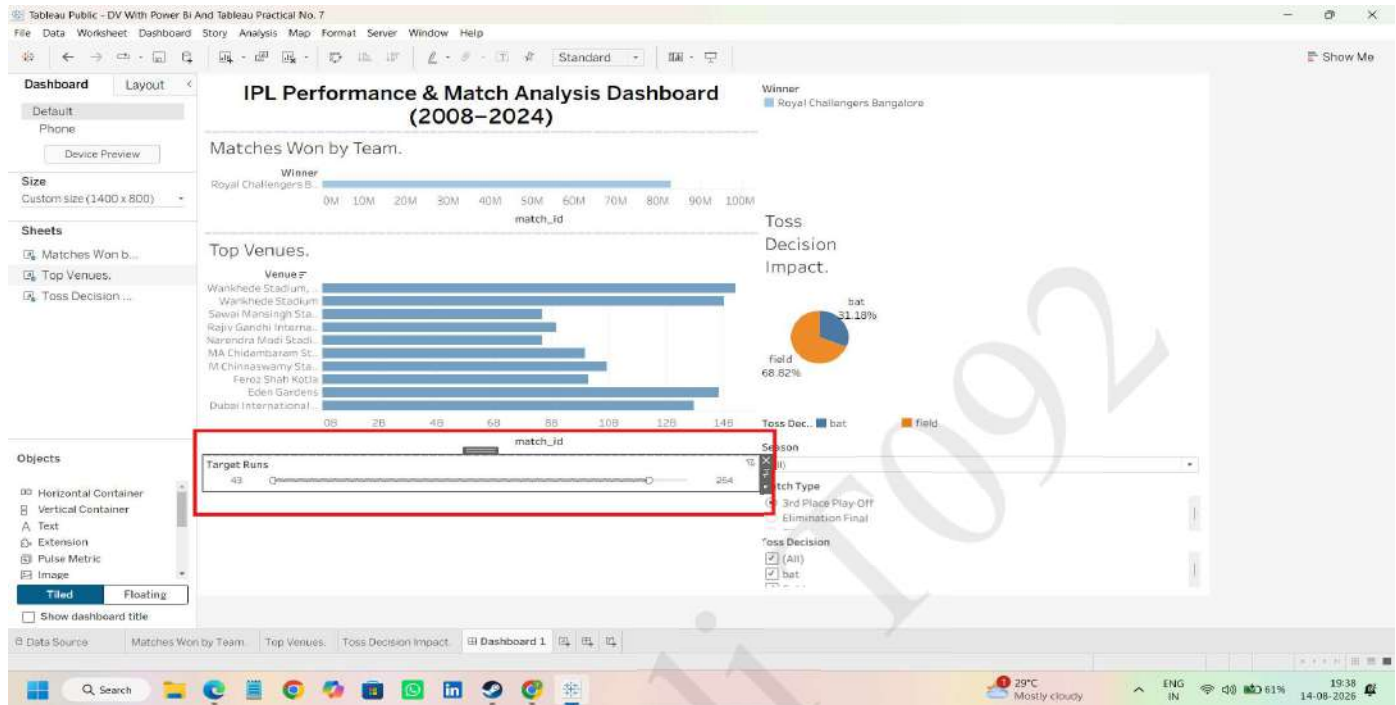

Step 8:- On the dashboard, enable the Target Runs filter from the chart's options menu.

Name:- Vinod Manohar Mali

Roll No:- T092

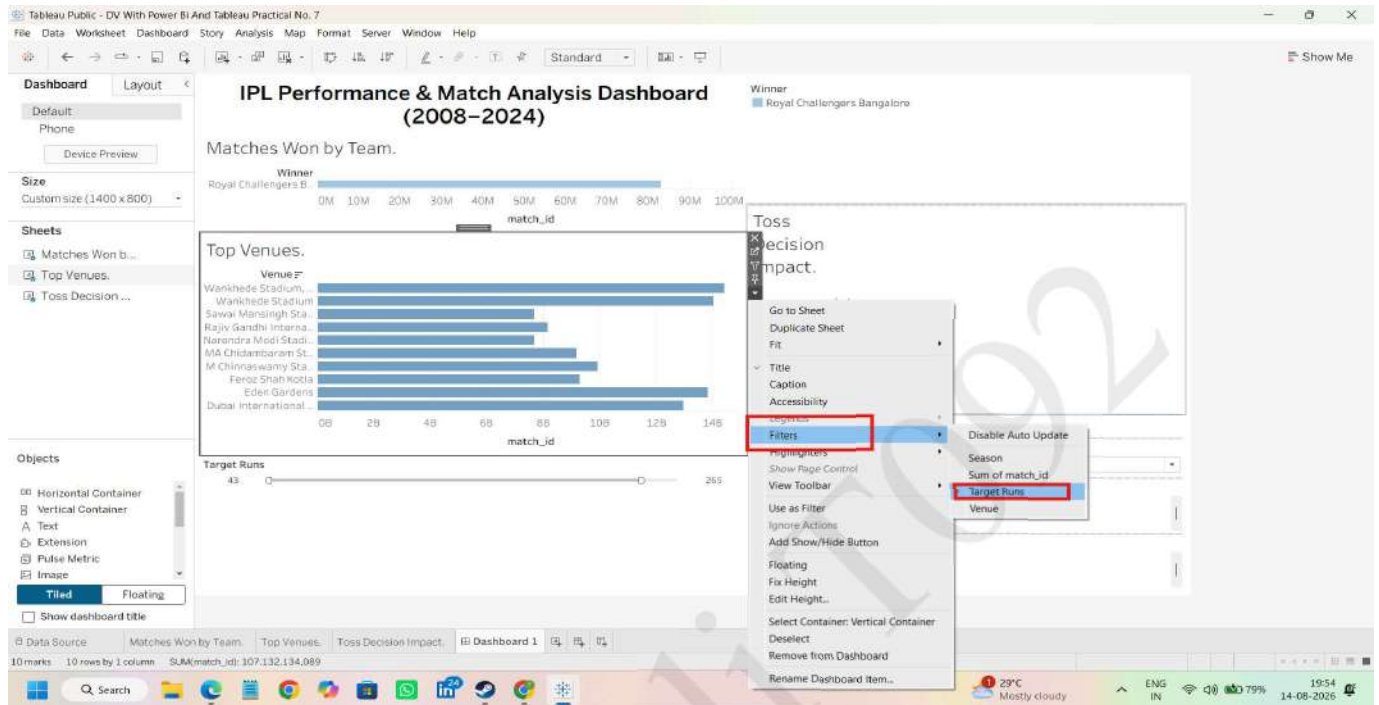

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

- Step 9:-** On your Dashboard tab, click on the Top Venues chart border box to select it.
- 2.** Look at the top-right corner of the selected blue boundary box and click the More Options drop-down arrow (the small inverted triangle).
- 3.** In the pop-up menu, go to Filters.
- 4.** Click on Target Runs (or SUM(Target Runs)).

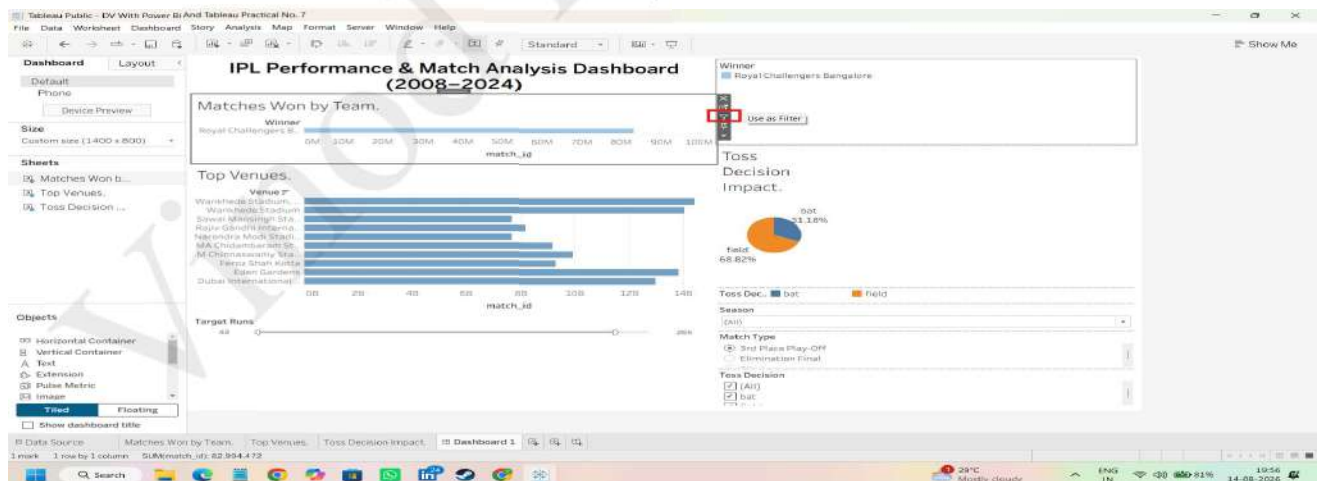

Name:- Vinod Manohar Mali
Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

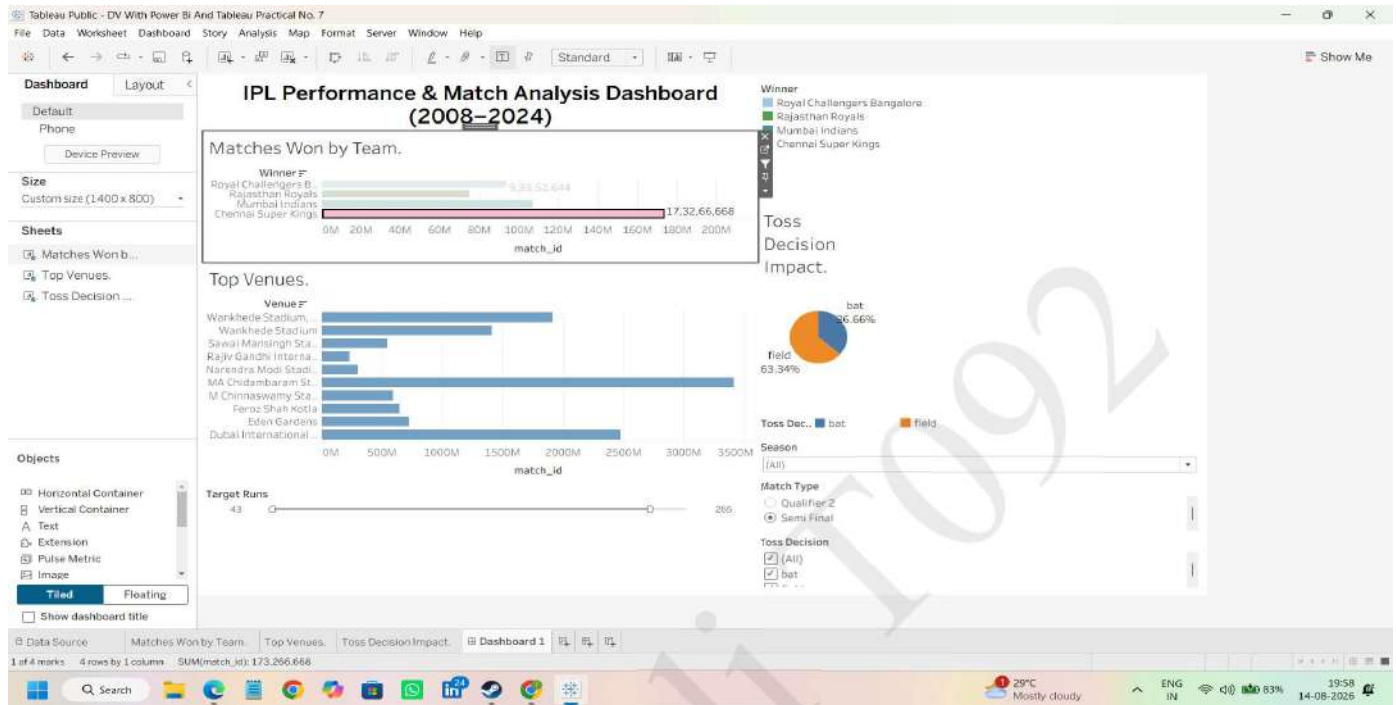

C: Implement highlight and filter actions

Step 1:- 1. Click on the Matches Won by Team chart box on your dashboard to select it. 2. Look at the small vertical toolbar that pops up on the top right side of the sheet border. 3. Click the Use as Filter icon (it looks like a small funnel symbol).

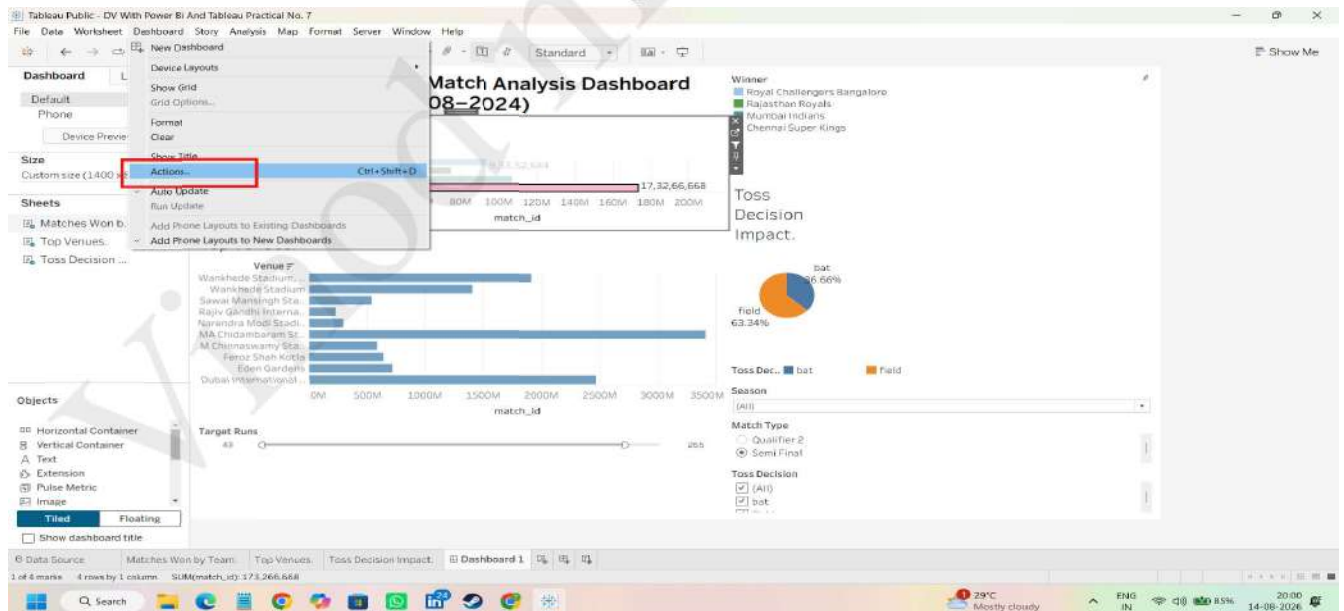

Name:- Vinod Manohar Mali
Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

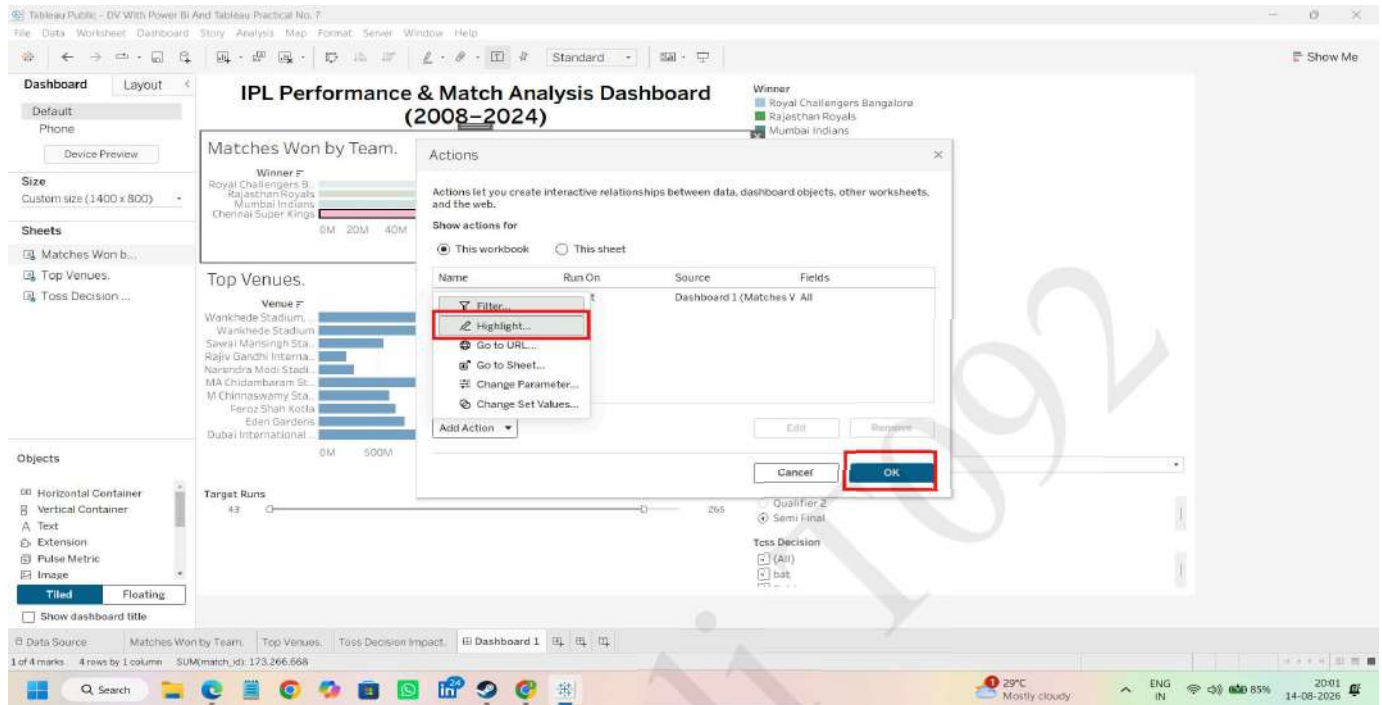

Step 2:- On the top menu bar, go to Dashboard --> Actions... 2. In the Actions window, click Add Action > and choose Highlight...

Name:- Vinod Manohar Mali
Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

Name the action: Highlight Team Across Charts.

4. Set up the rules:

- o **Source Sheets: Select Matches Won by Team.**
 - o **Run action on: Select Hover (or Select if you prefer clicking).**
 - o **Target Sheets: Select Top Venues and Toss Decision Impact.**
 - o **Target Fields: Leave as All Fields or explicitly select Winner / Team1.**
- 5. Click OK, then click OK again to save.**

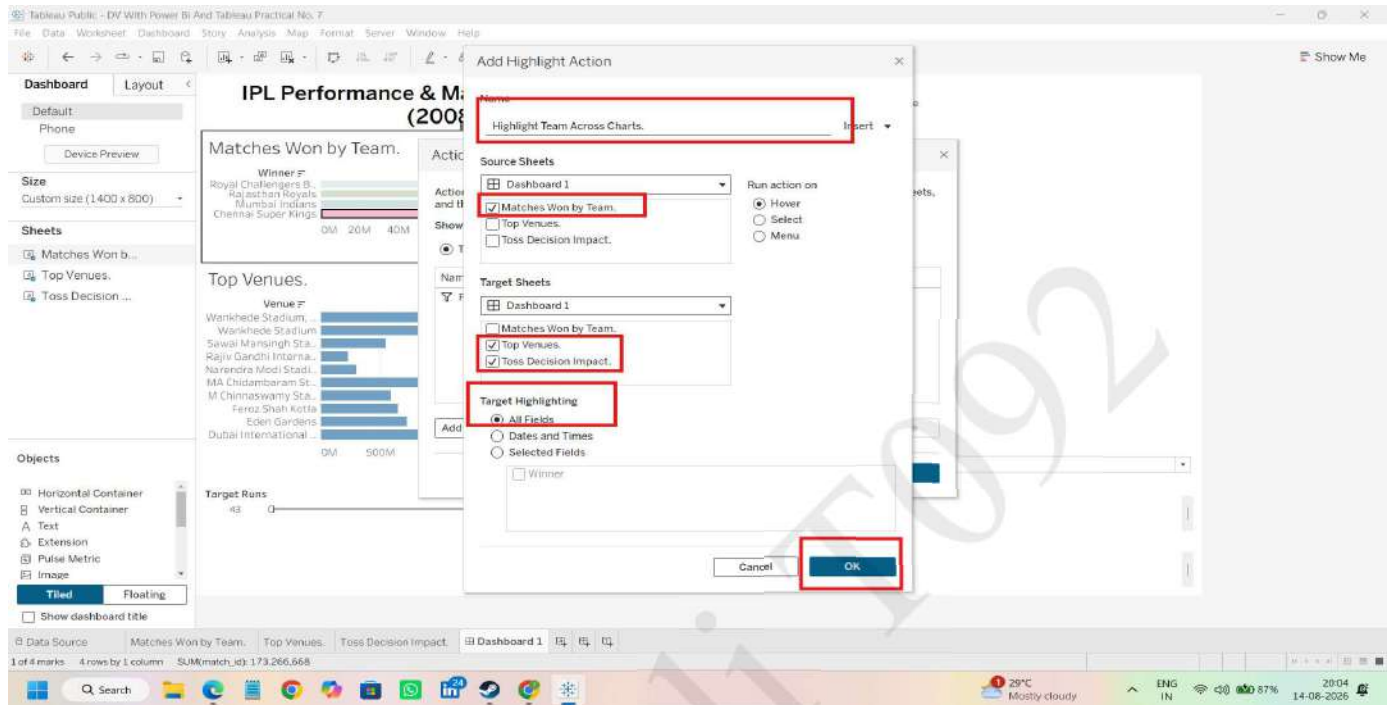

Name:- Vinod Manohar Mali

Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science

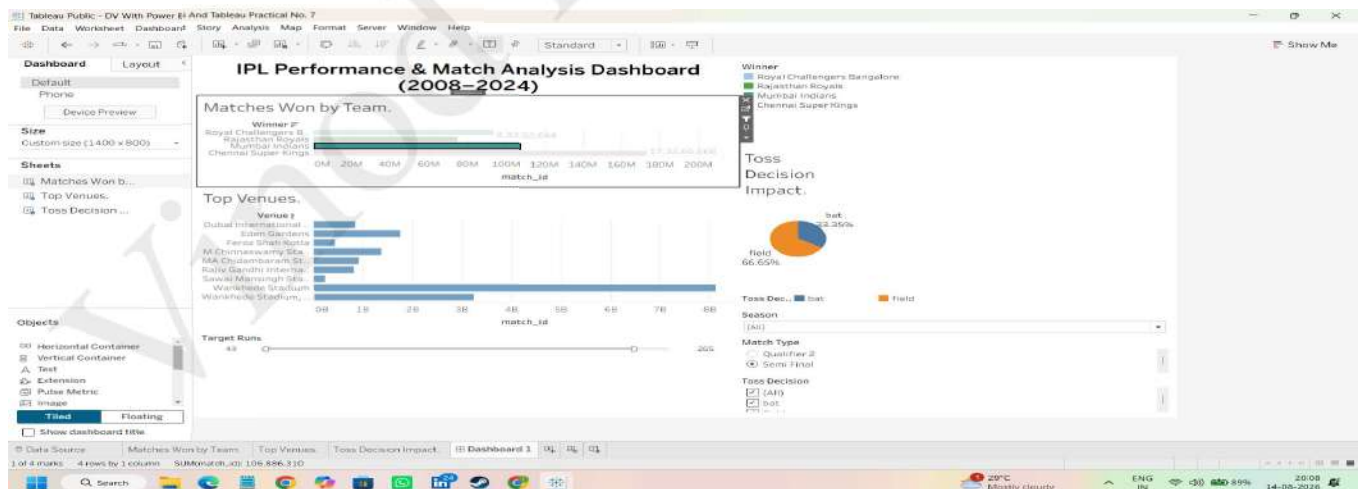

Subject:- Data Visualization With Power BI And Tableau

Practical No 7

Step 3:- Hovering: Hover your mouse over any bar in Matches Won by Team to see associated data highlight across other sheets.

Clicking: Click a venue in Top Venues (if "Use as Filter" is enabled there too) to see which teams have won the most matches at that specific stadium!

D: Use URL and set actions for interactivity

1. URL Action: Clicking a team or player name opens their official Wikipedia/ESPNcricinfo profile directly in a browser (or Web Page Object inside Tableau).

Name:- Vinod Manohar Mali

Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

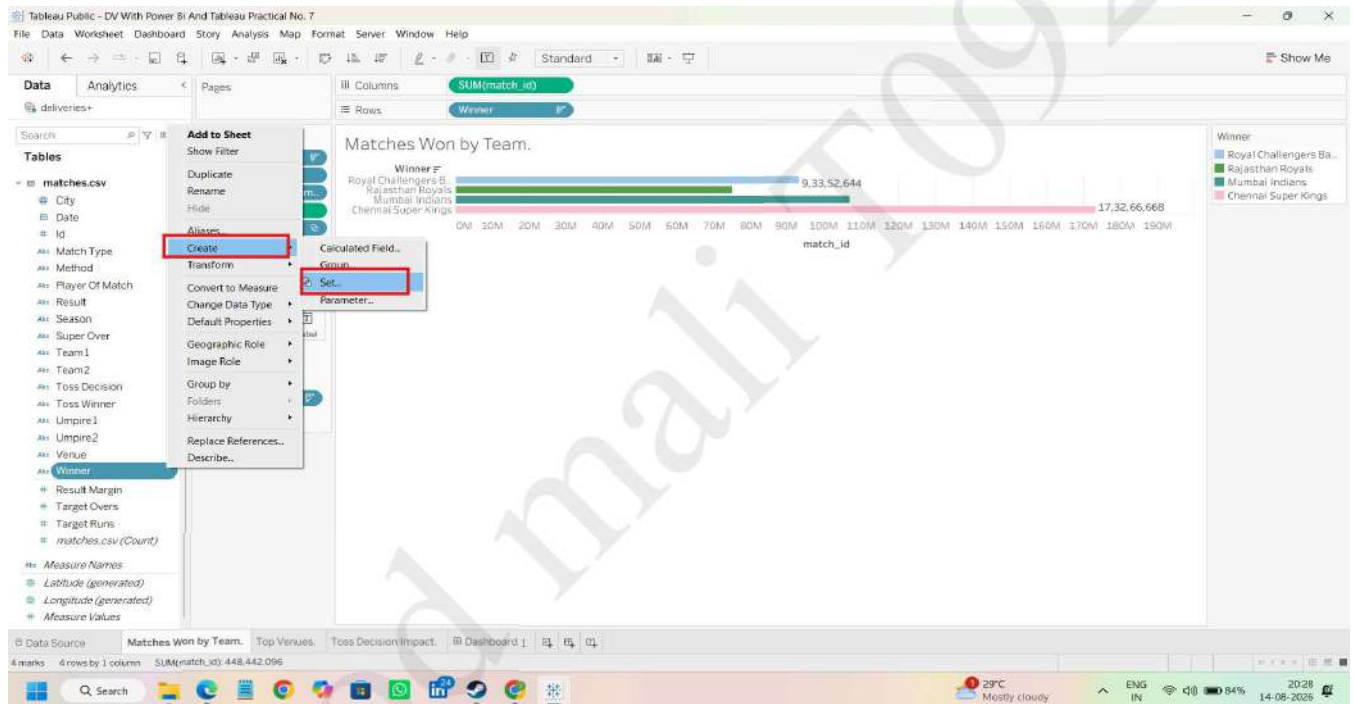

2. Set Action: Selecting one or more teams on a sheet dynamically updates a "Selected vs. Rest of League" comparison.

Step 1:- 1. Go to the Data pane on the left side of any worksheet.

2. Right-click the Winner field Create Set...

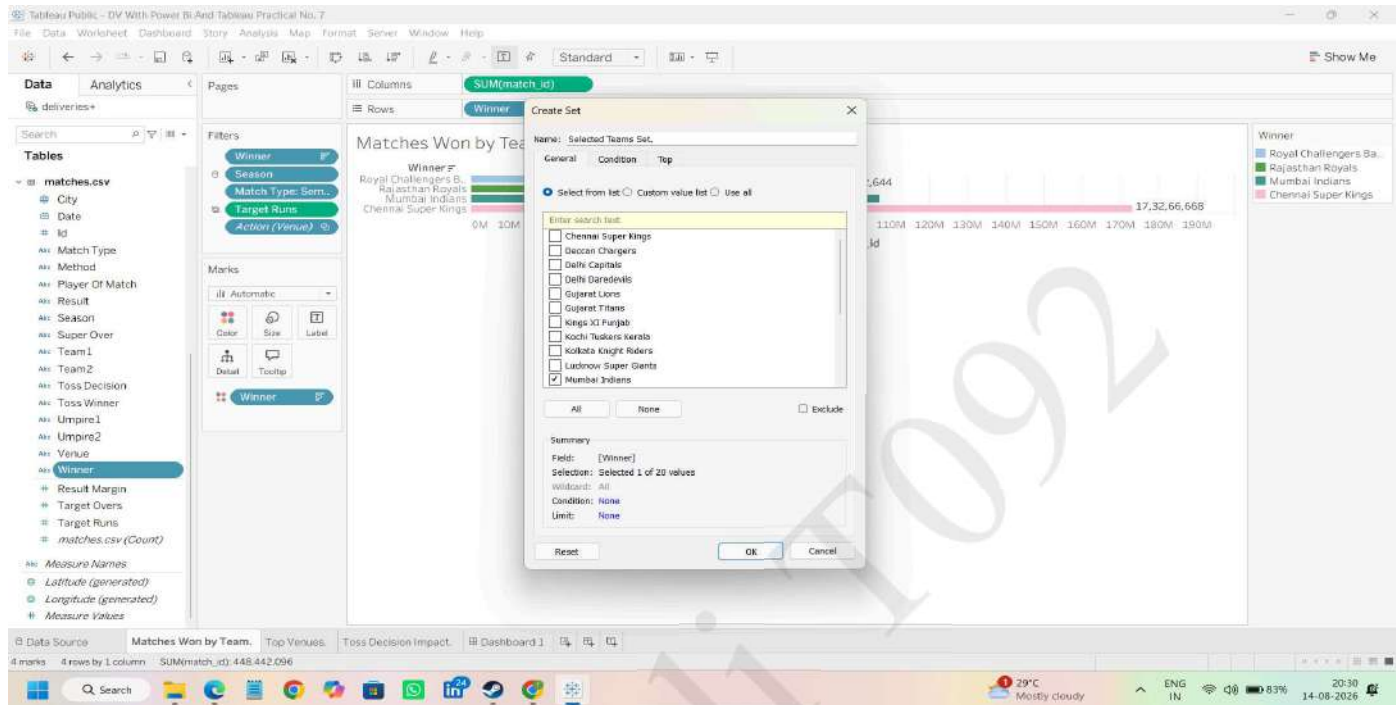

Name the set: Selected Teams Set.

4. Select any single team (e.g., Mumbai Indians) just as a temporary placeholder. click OK.

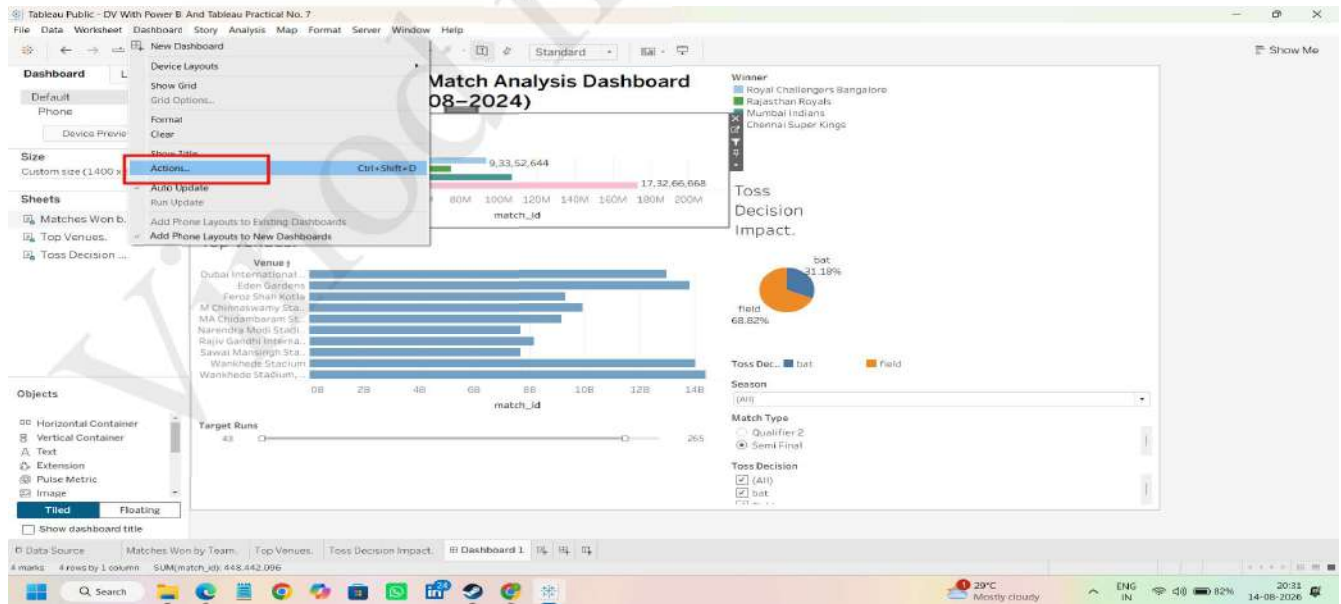

Name:- Vinod Manohar Mali
Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

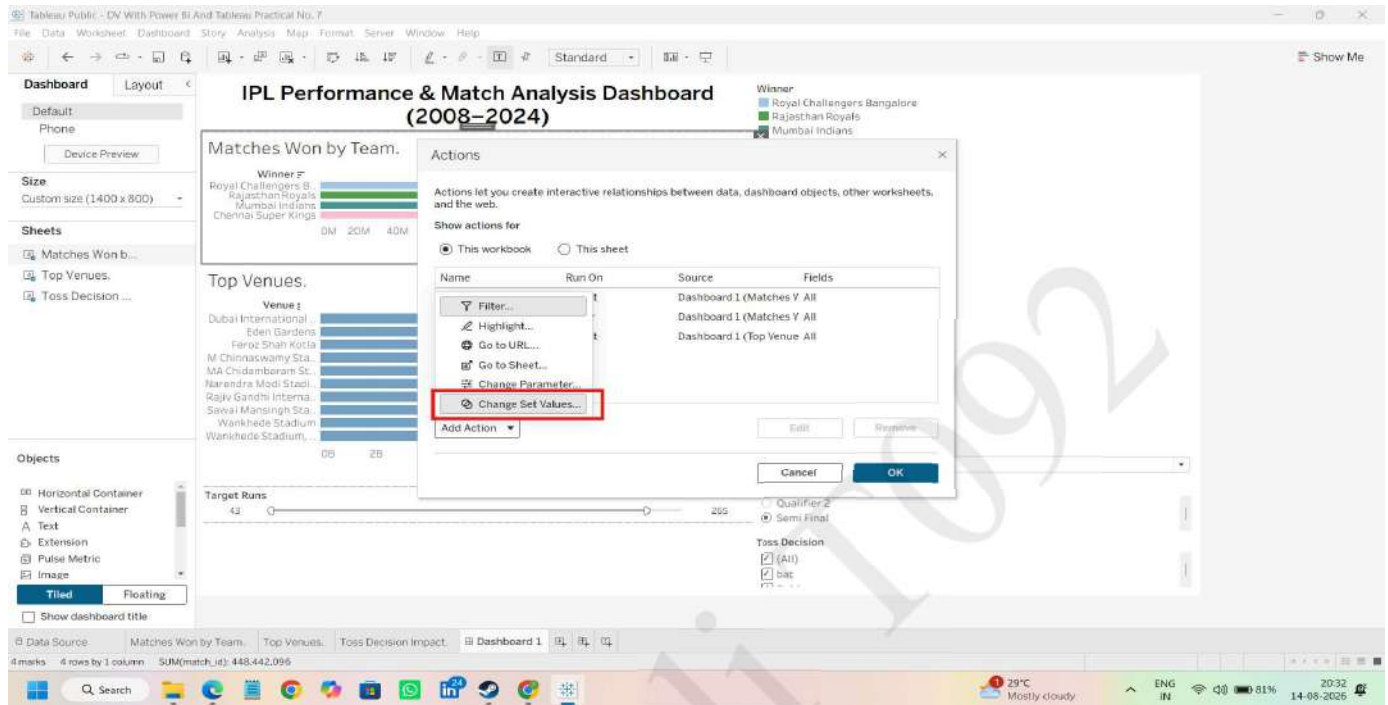

- Step 2:- 1. Return to your main Dashboard tab.
2. Go to the top menu bar: Dashboard Actions...
3. Click Add Action > select Change Set Values...

Name:- Vinod Manohar Mali
Roll No:- T092

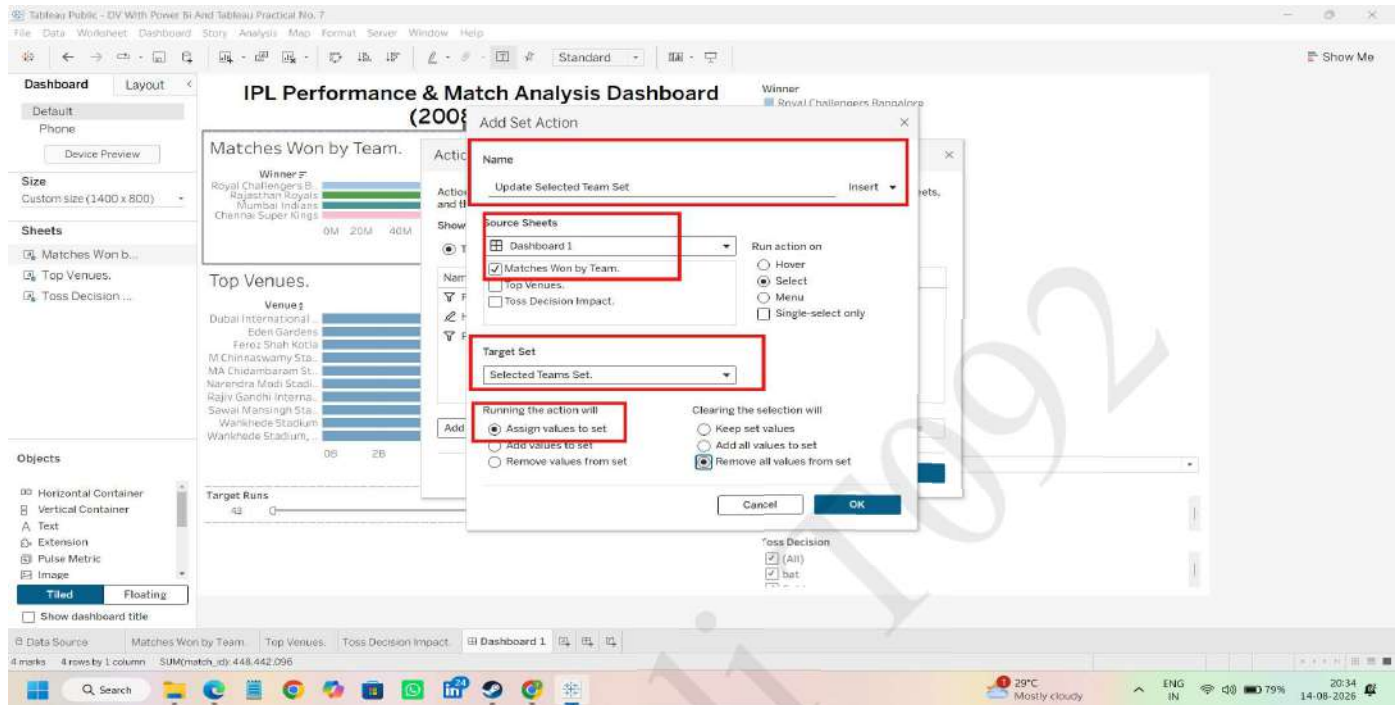

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

- Set up the details: o Name: Update Selected Team Set
 - o Source Sheets: Select Matches Won by Team
 - o Run action on: Select
 - o Target Dataset: Choose your IPL dataset/matches file.
 - o Set: Choose Selected Teams Set.
 - o Running the action will: Assign values to set
 - o Clearing the selection will: Remove all values from set (or Keep set values).
5. Click OK, then click OK again.

Name:- Vinod Manohar Mali
Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

Step 3:- Go to the top menu: Dashboard Actions...

2. Click Add Action > select Go to URL...

3. Configure the URL Action:

- o **Name:** Open Team Wikipedia Page
- o **Source Sheets:** Select Matches Won by Team
- o **Run action on:** Menu (This displays a clean clickable hyperlink inside the tooltip when a user clicks a bar, preventing accidental page loads).
- o **URL:** Paste the following dynamic URL: <https://en.wikipedia.org/wiki/>

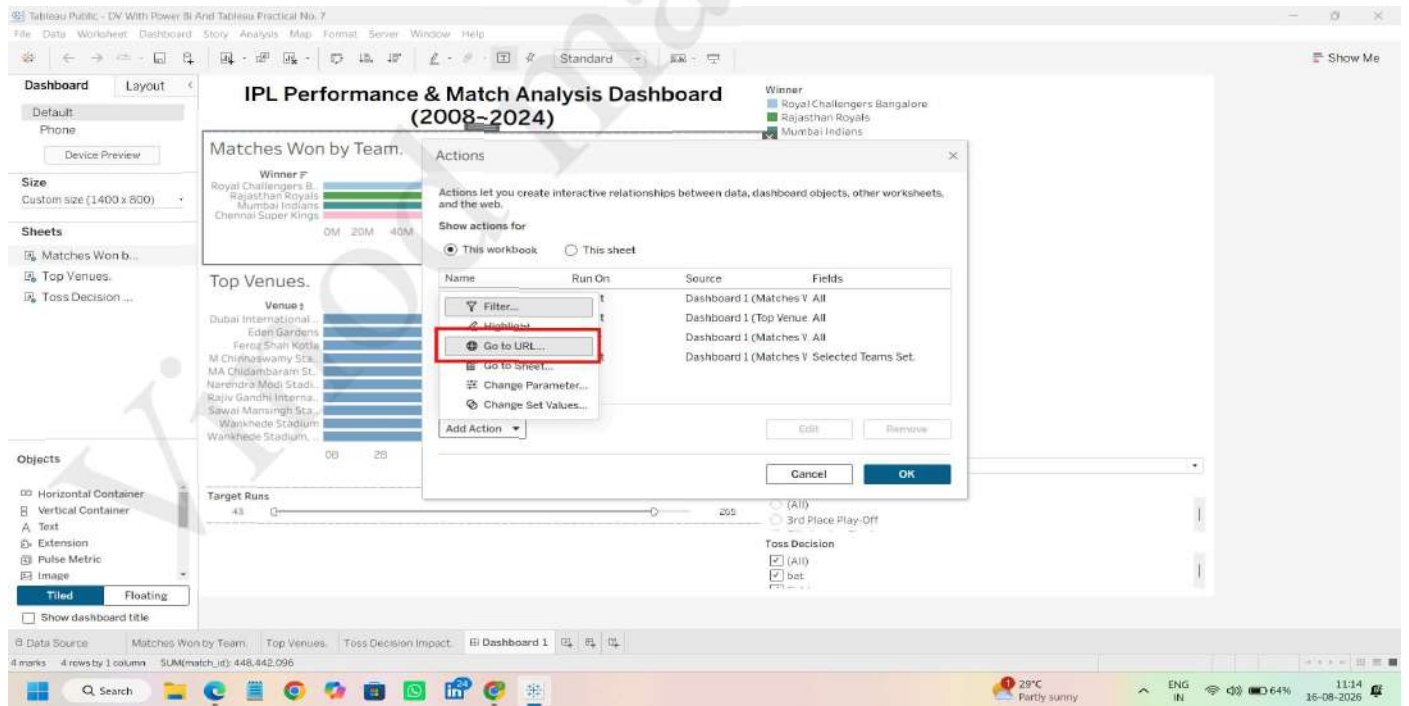

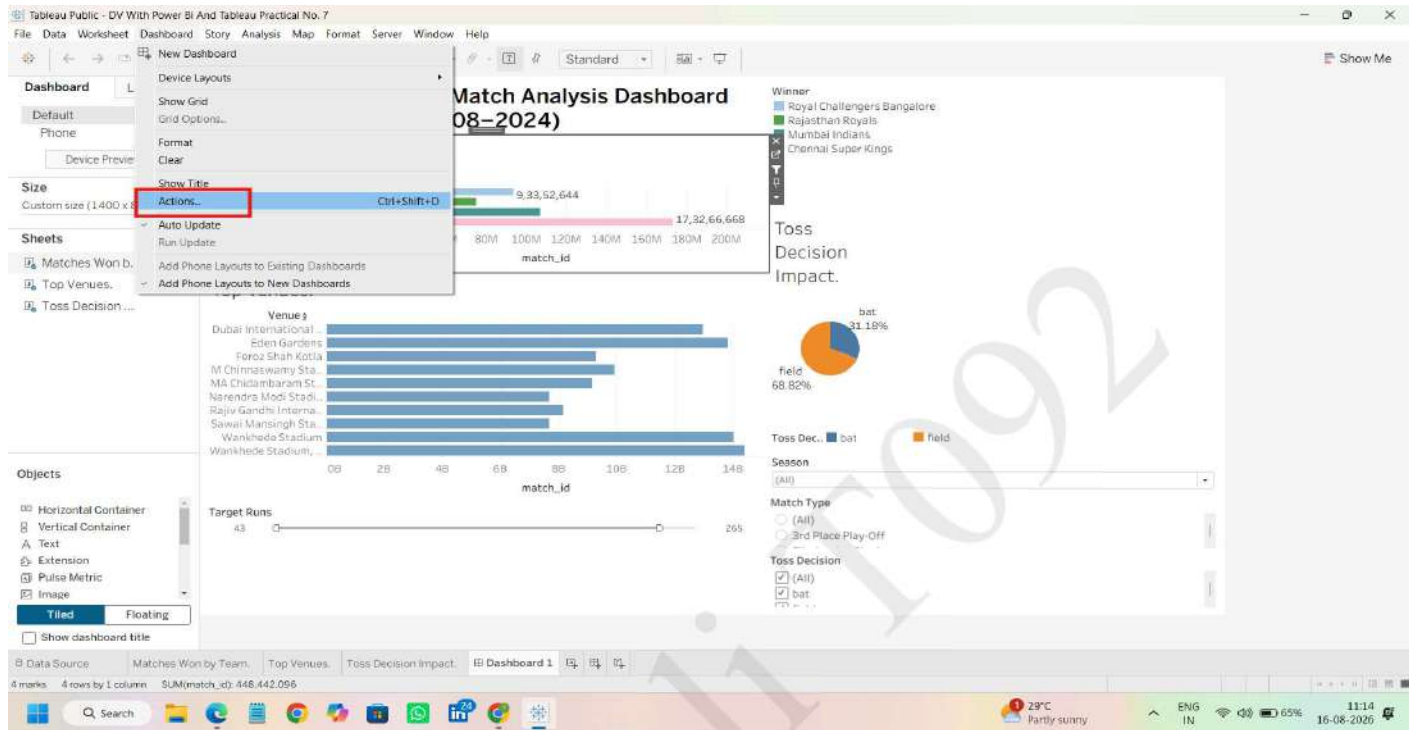

Name:- Vinod Manohar Mali

Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science

Subject:- Data Visualization With Power BI And Tableau

Practical No 7

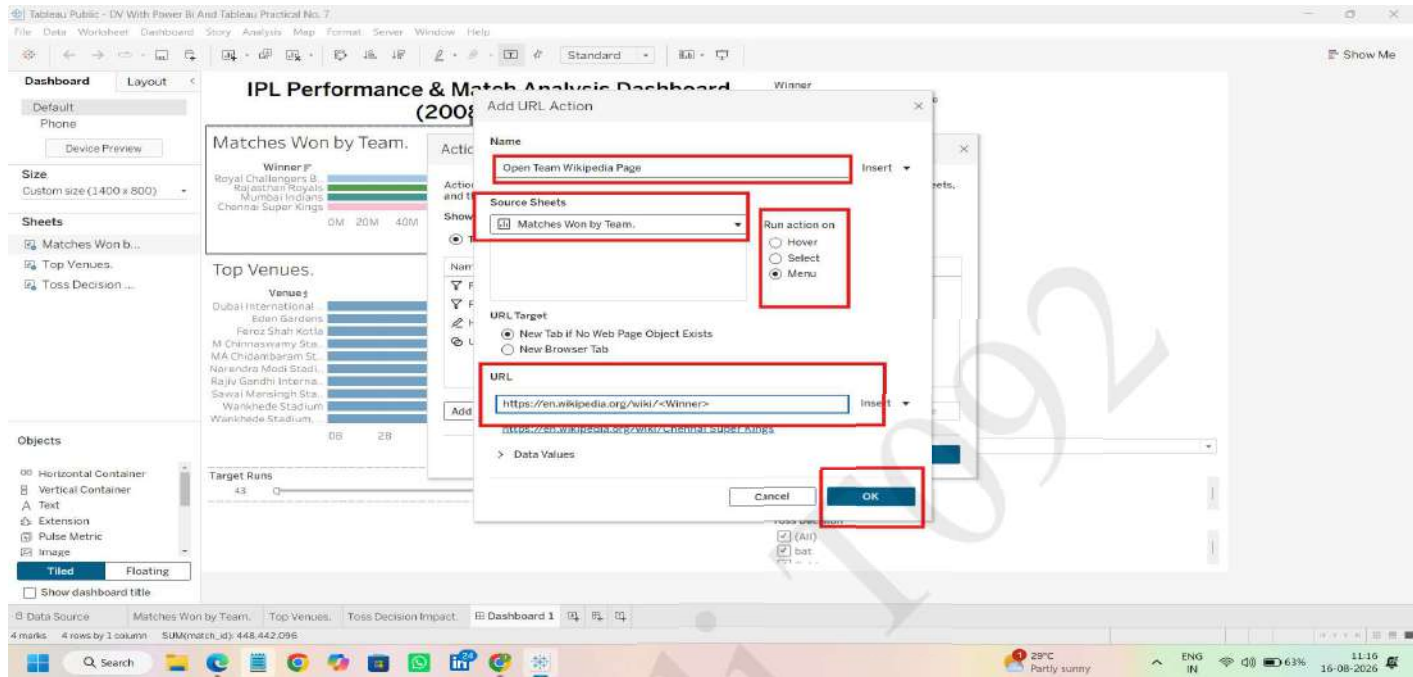

Name:- Vinod Manohar Mali

Roll No:- T092

Practical No 7

E: Create dynamic dashboards using parameters

Step 1:- Go to any worksheet (e.g., Matches Won by Team).

2. At the top of the Data pane on the left, click the small drop-down arrow next to the search bar (or right-click anywhere in the Data pane) and select Create Parameter...

Step 2:- Configure the parameter options:

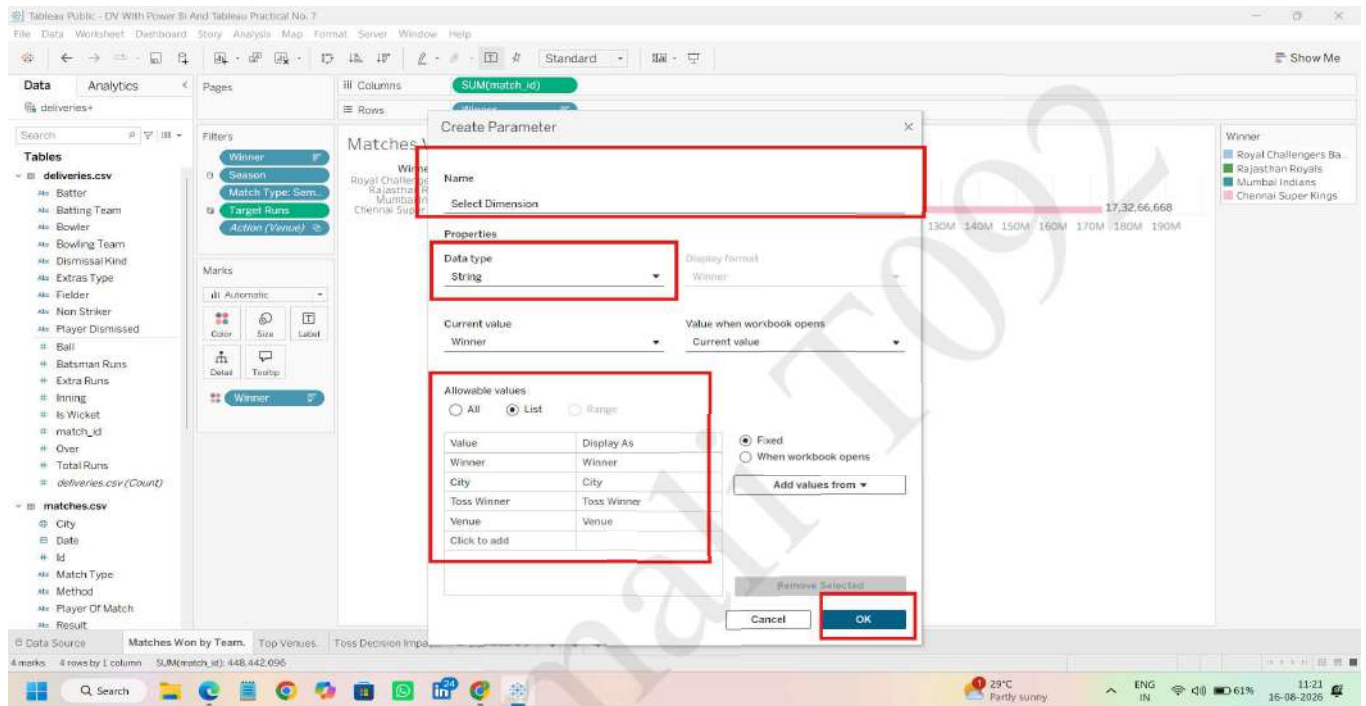

o Name: Select Dimension

Name:- Vinod Manohar Mali

Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science
Subject:- Data Visualization With Power BI And Tableau
Practical No 7

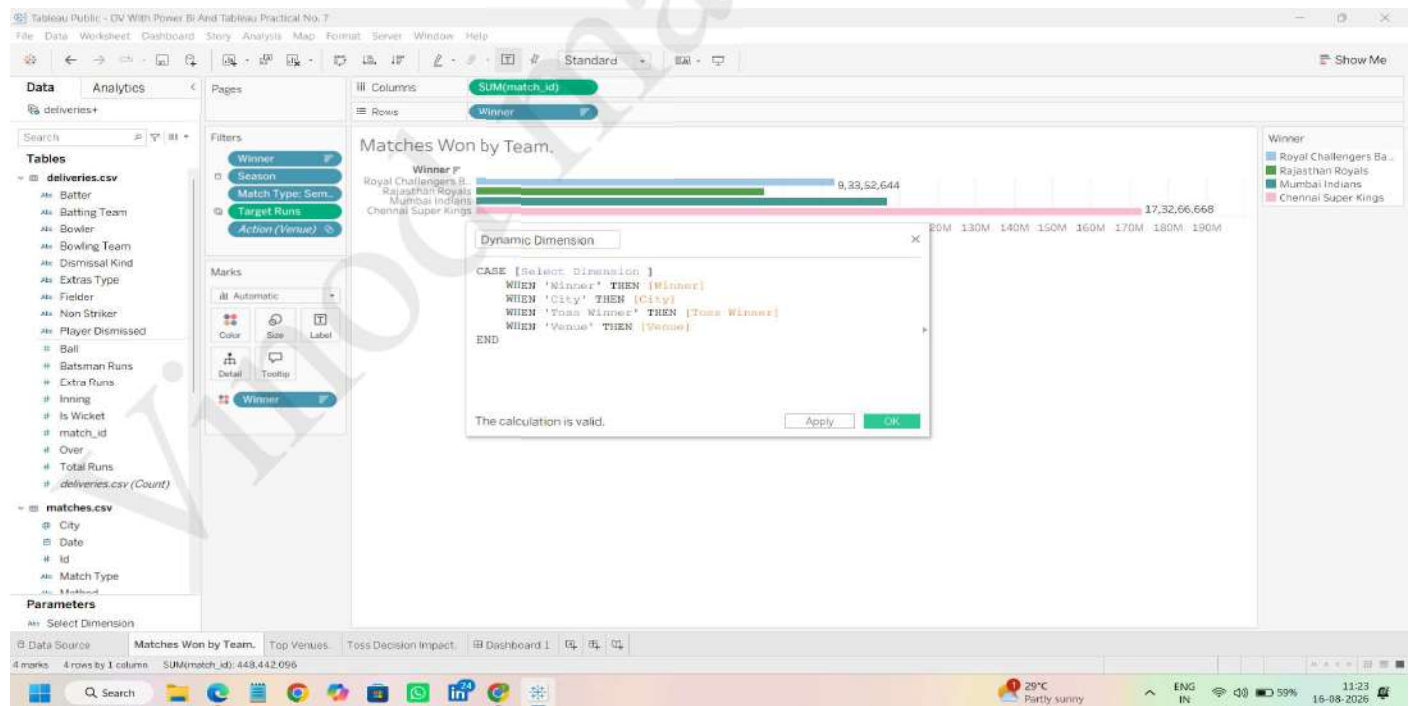

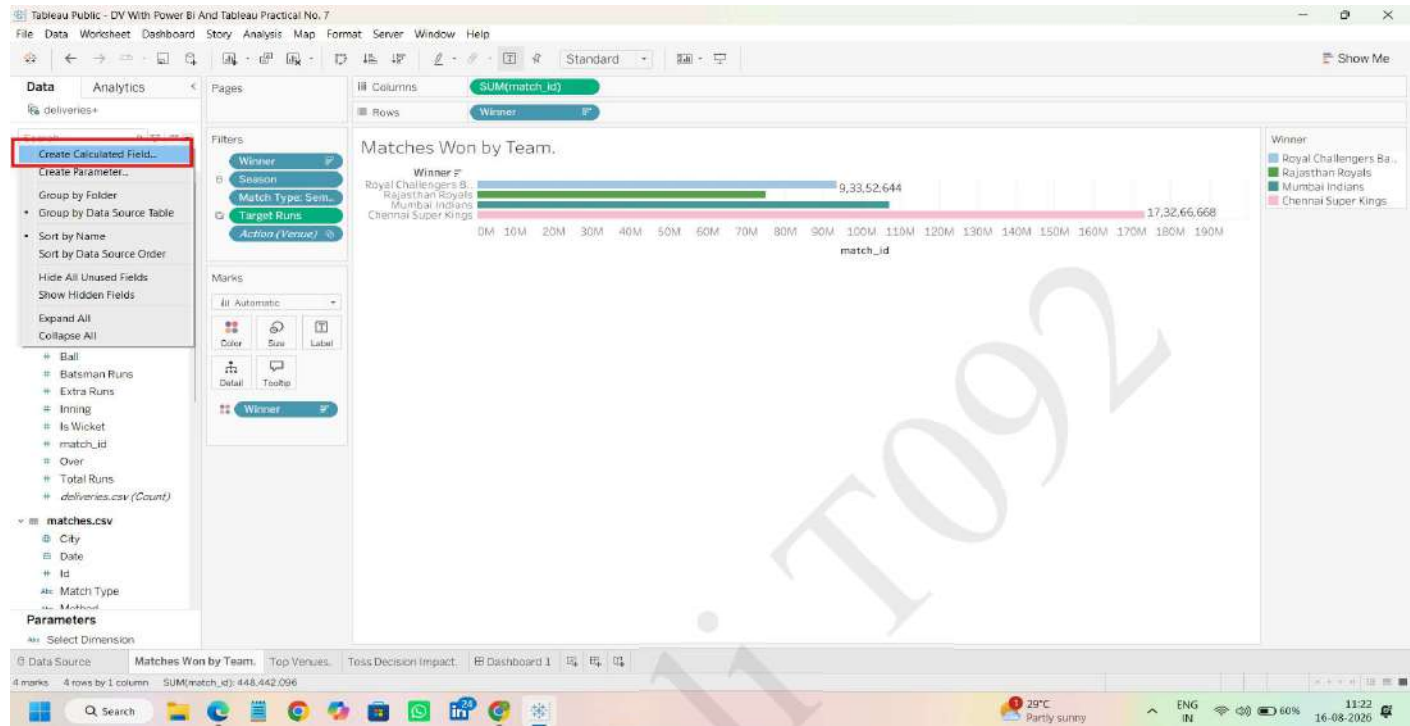

- o Data type: String o Allowable values: List
 - o List of values: Add the following exact names in the Value column: Winner City Toss Winner Venue
- And Click OK

- Step 3:- 1. Right-click in the Data pane Create Calculated Field...
2. Name the field: Dynamic Dimension
3. Enter the following formula:
- ```
CASE [Select Dimension] WHEN 'Winner' THEN [Winner] WHEN 'City' THEN [City] WHEN 'Toss Winner' THEN [Toss Winner] WHEN 'Venue' THEN [Venue] END
```
- And Click OK

Name:- Vinod Manohar Mali  
Roll No:- T092

Sheth L.U.J. And Sir M.V. College of Science  
Subject:- Data Visualization With Power BI And Tableau  
Practical No 7

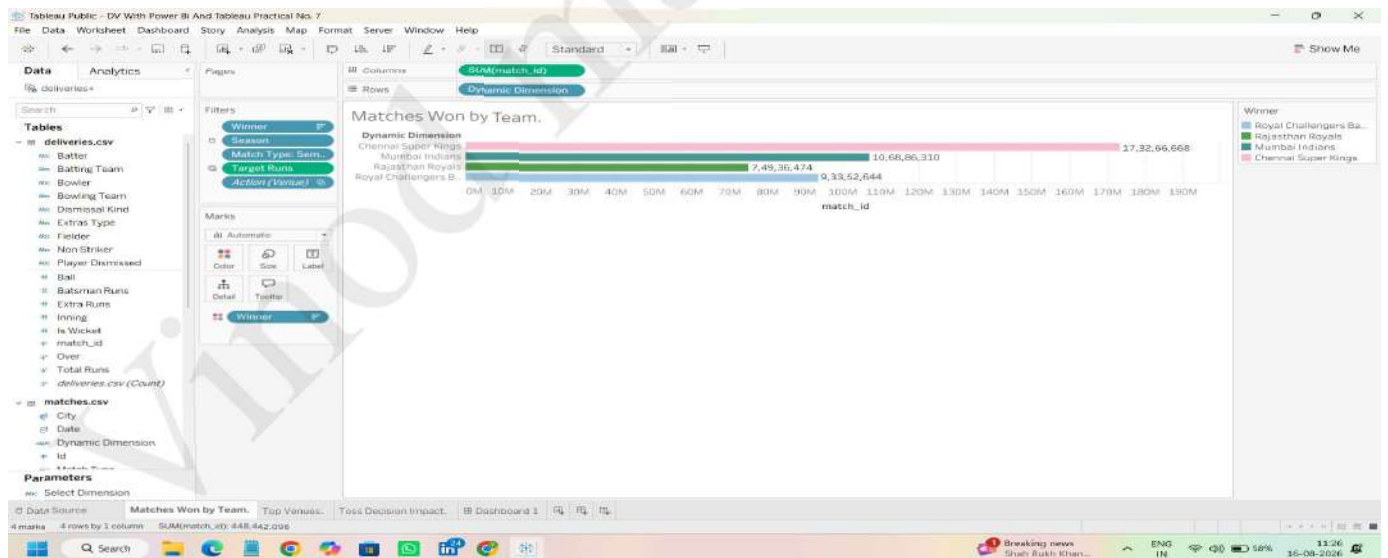

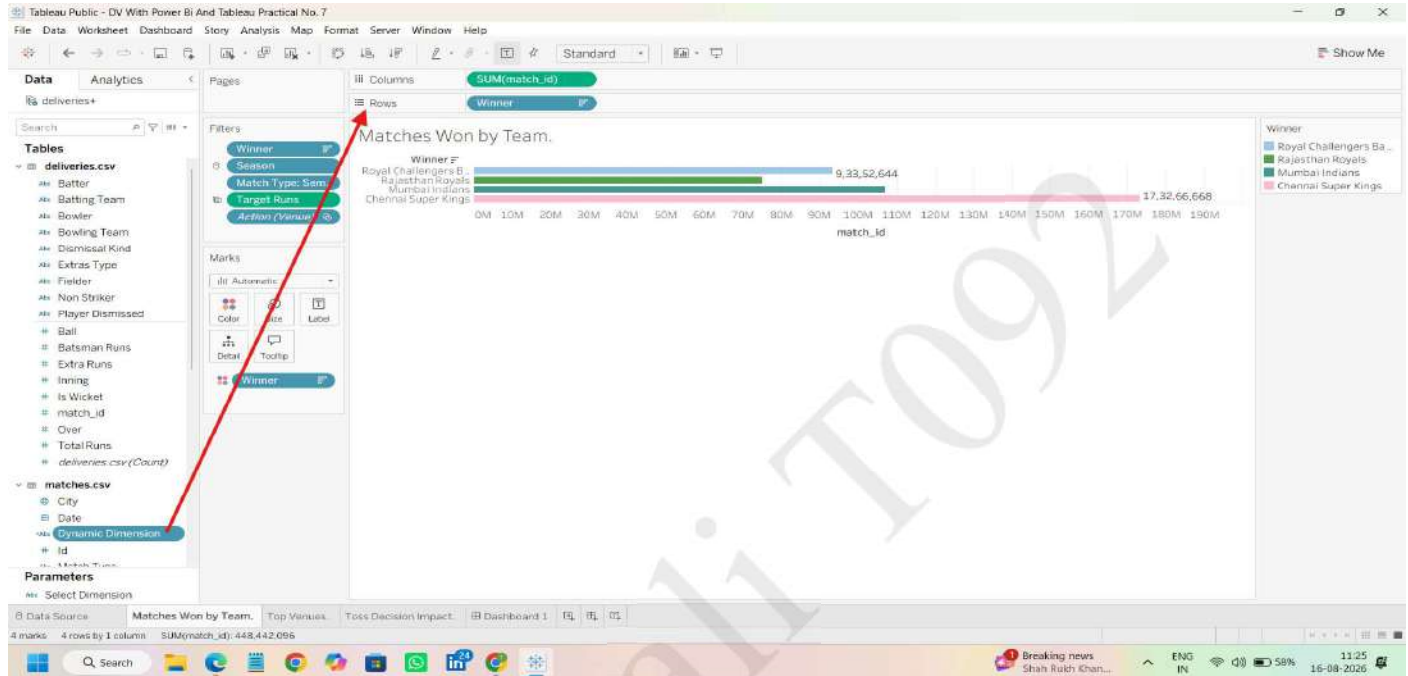

**Step 4:-** On your Matches Won by Team sheet, locate the field currently on the Rows shelf (e.g., Winner).

**Name:-** Vinod Manohar Mali

**Roll No:-** T092

Sheth L.U.J. And Sir M.V. College of Science  
Subject:- Data Visualization With Power BI And Tableau  
Practical No 7

**2. Drag Dynamic Dimension from the Data pane and drop it directly over Winner on the Rows shelf to swap them.**

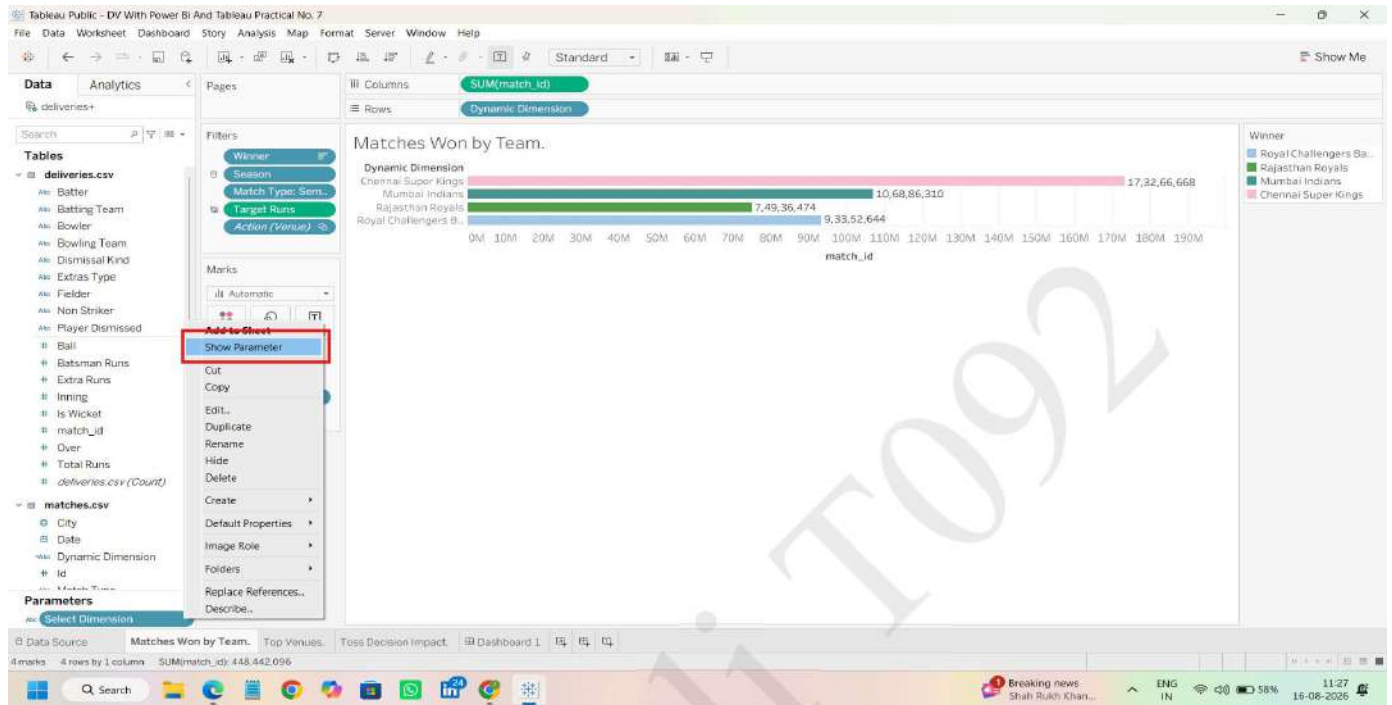

**In the Data pane under Parameters, right-click Select Dimension and check Show Parameter.**

**Name:- Vinod Manohar Mali**  
**Roll No:- T092**

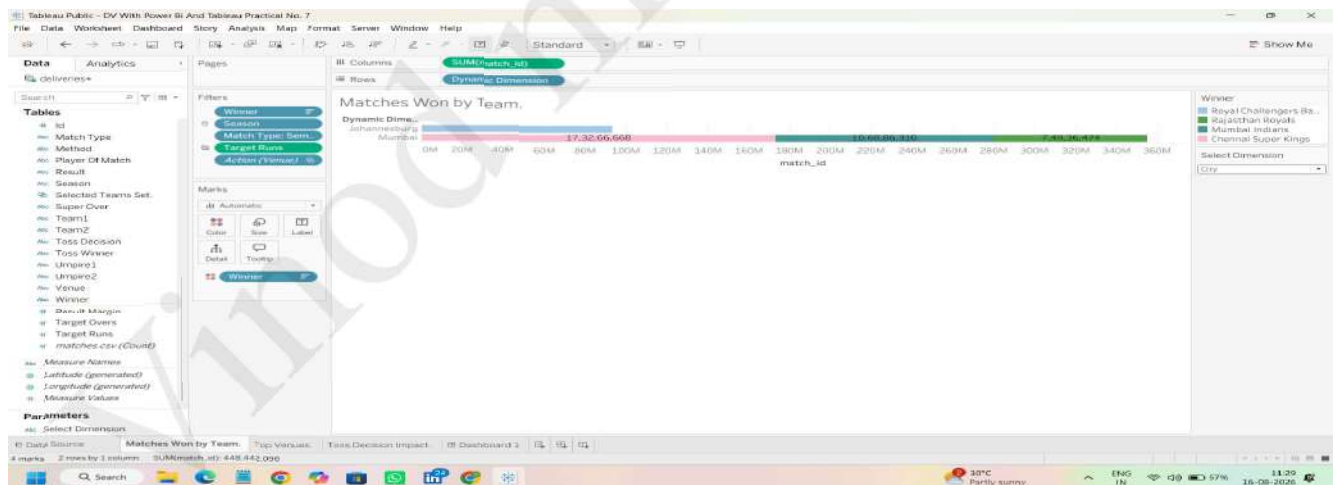

Sheth L.U.J. And Sir M.V. College of Science

Subject:- Data Visualization With Power BI And Tableau

Practical No 7

Test changing the parameter selection on the right panel, you'll see the chart instantly switch between listing Teams, Cities, Toss Winners, and Venues!

Step 5:- Switch back to your main Dashboard tab.

2. Select the dynamic chart box.

3. Click the More Options drop-down arrow in the top right corner of the chart outline box.

4. Go to Parameters select Select Dimension.

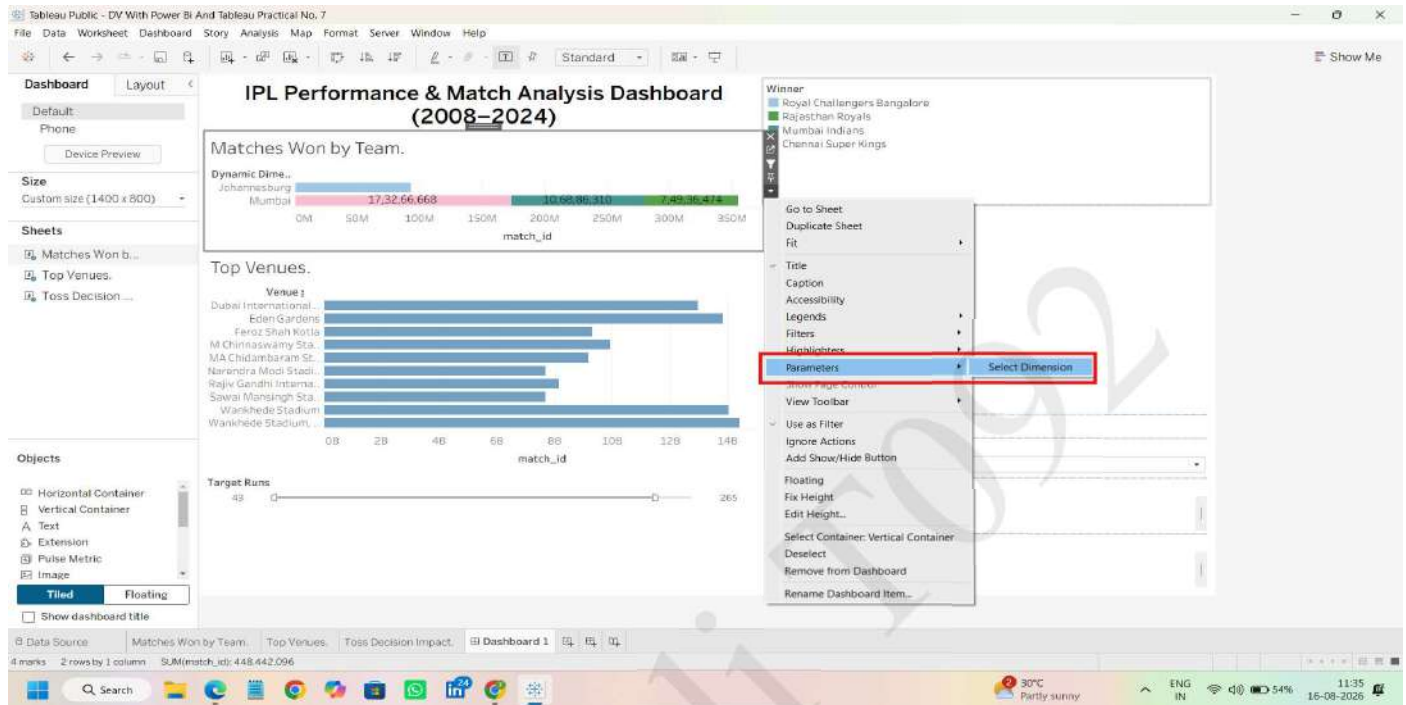

Name:- Vinod Manohar Mali

Roll No:- T092

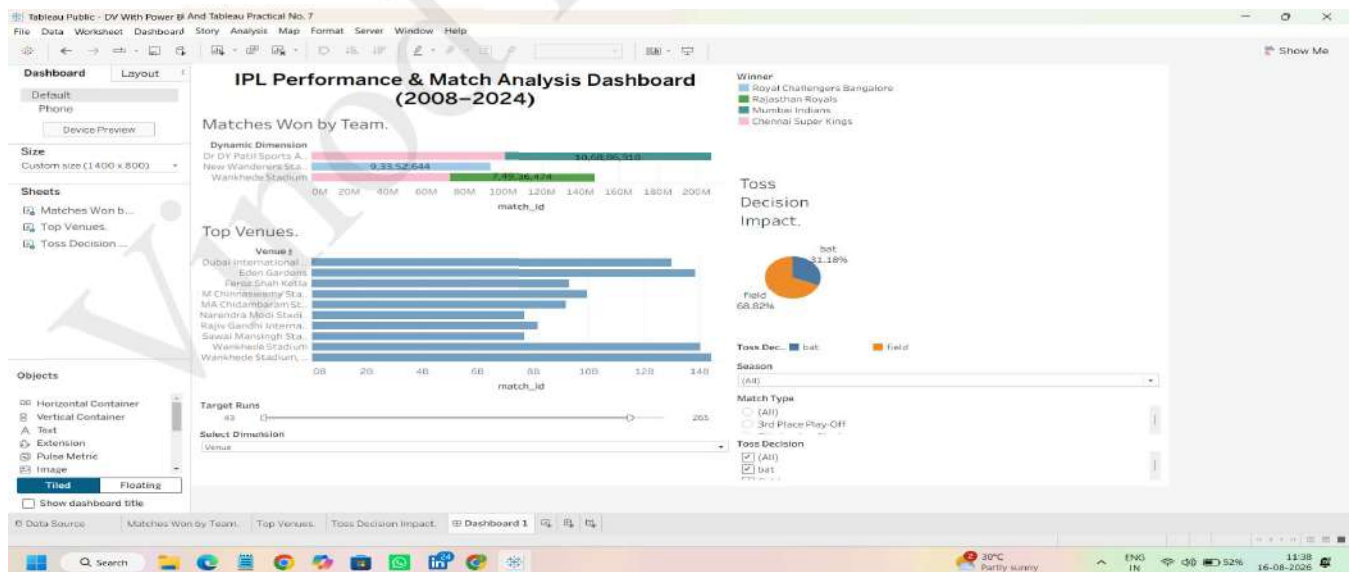

Sheth L.U.J. And Sir M.V. College of Science

Subject:- Data Visualization With Power BI And Tableau

Practical No 7

Position the new parameter control cleanly alongside your existing filters on the right sidebar.

**F: Design dashboards for multiple devices**

**Name:- Vinod Manohar Mali**

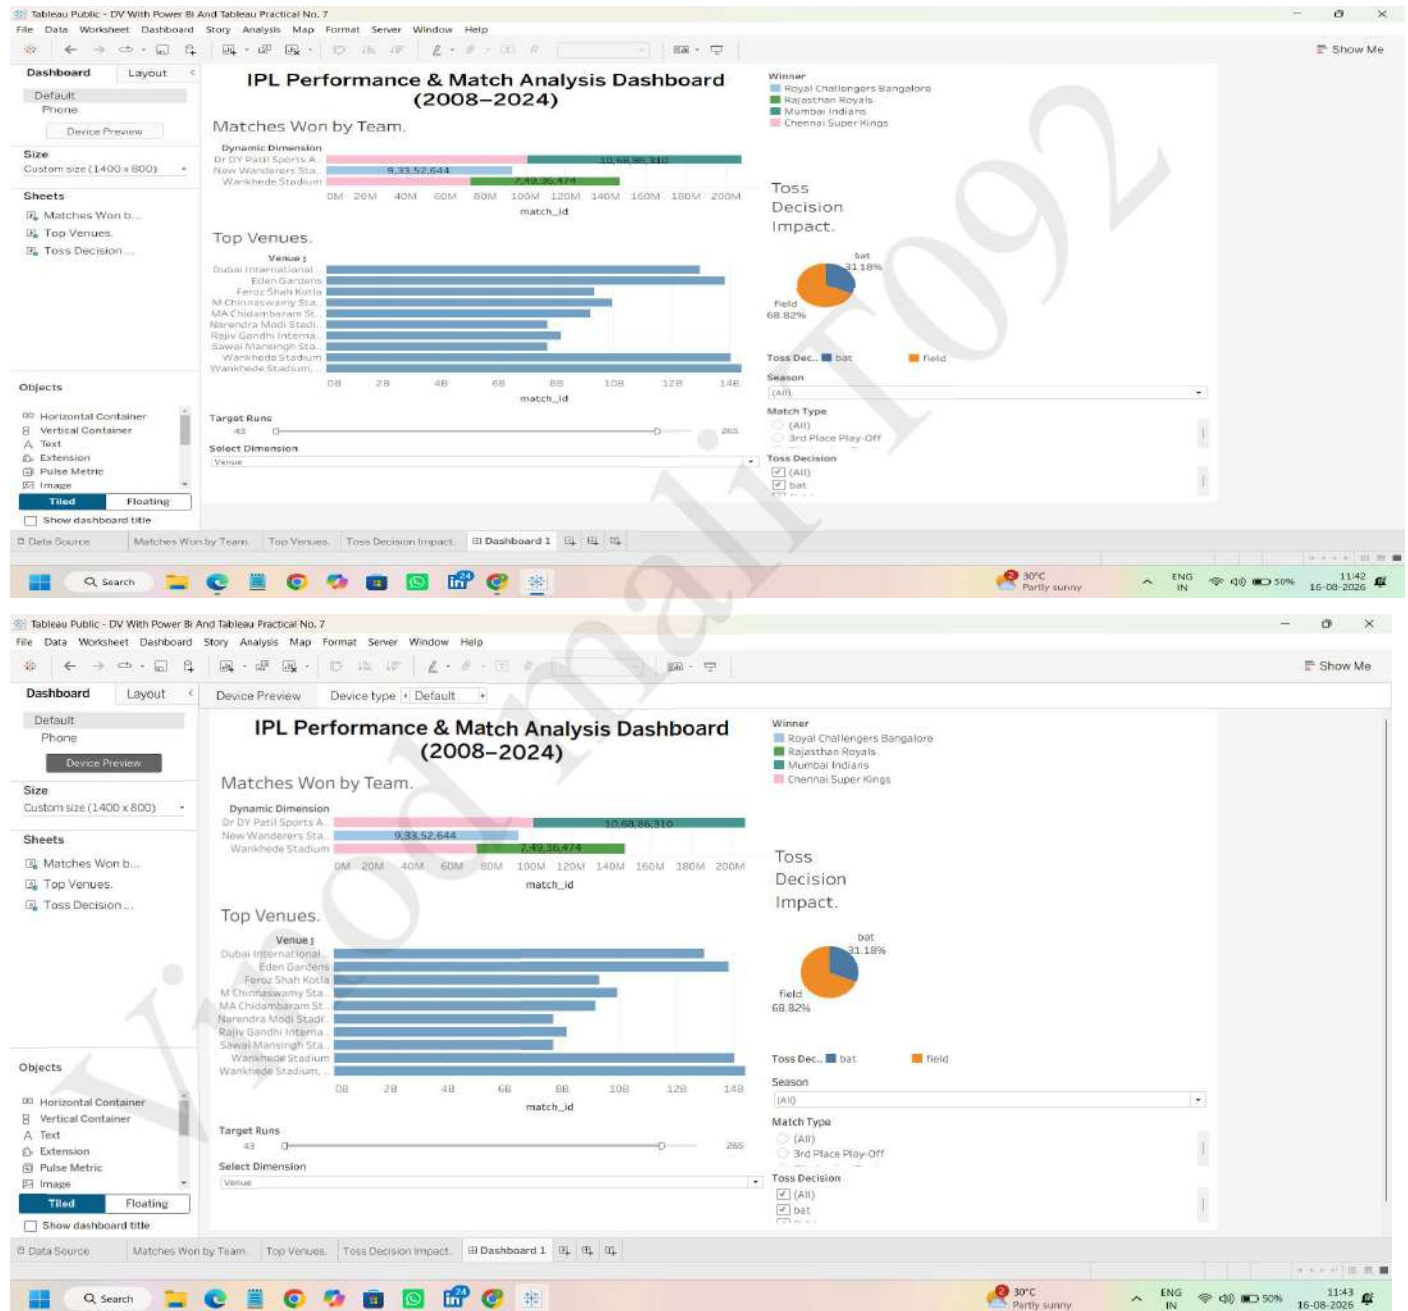

**Roll No:- T092**

Sheth L.U.J. And Sir M.V. College of Science  
Subject:- Data Visualization With Power BI And Tableau  
Practical No 7

**Step 1:- Switch to your main Dashboard tab.**

**2. In the top-left Dashboard pane, click the Device Preview button.**

**3. A device preview frame and toolbar will appear across the top of your dashboard canvas, showing how your layout looks on different screens.**

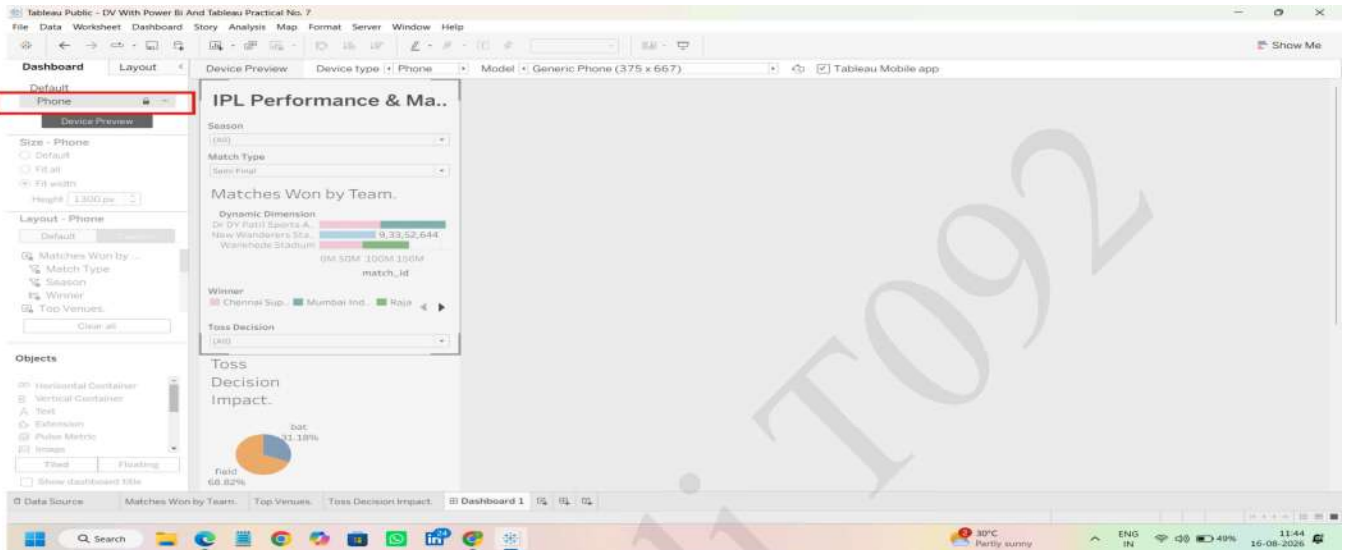

**Step 2:- In the top device preview bar, select Device type: Phone.**

**Name:- Vinod Manohar Mali**

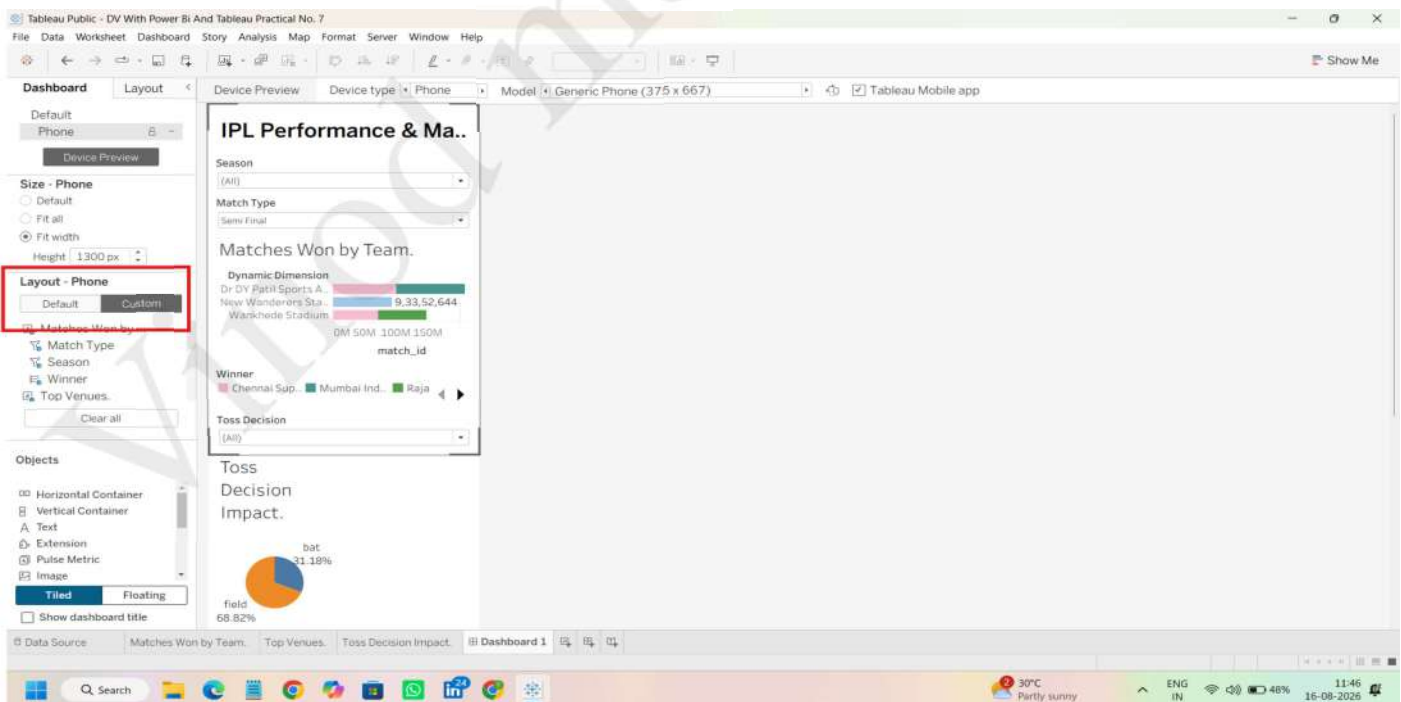

**Roll No:- T092**

Sheth L.U.J. And Sir M.V. College of Science  
Subject:- Data Visualization With Power BI And Tableau  
Practical No 7

**2. Click the Add Phone Layout button on the right side of the preview bar. 3. You will now see a new sub-tab named Phone appear under the Dashboard panel on the left.**

**Step 3:- In the left panel under the Phone layout section, change Layout from Default to Custom (this allows you to edit the phone layout without affecting your desktop view).**

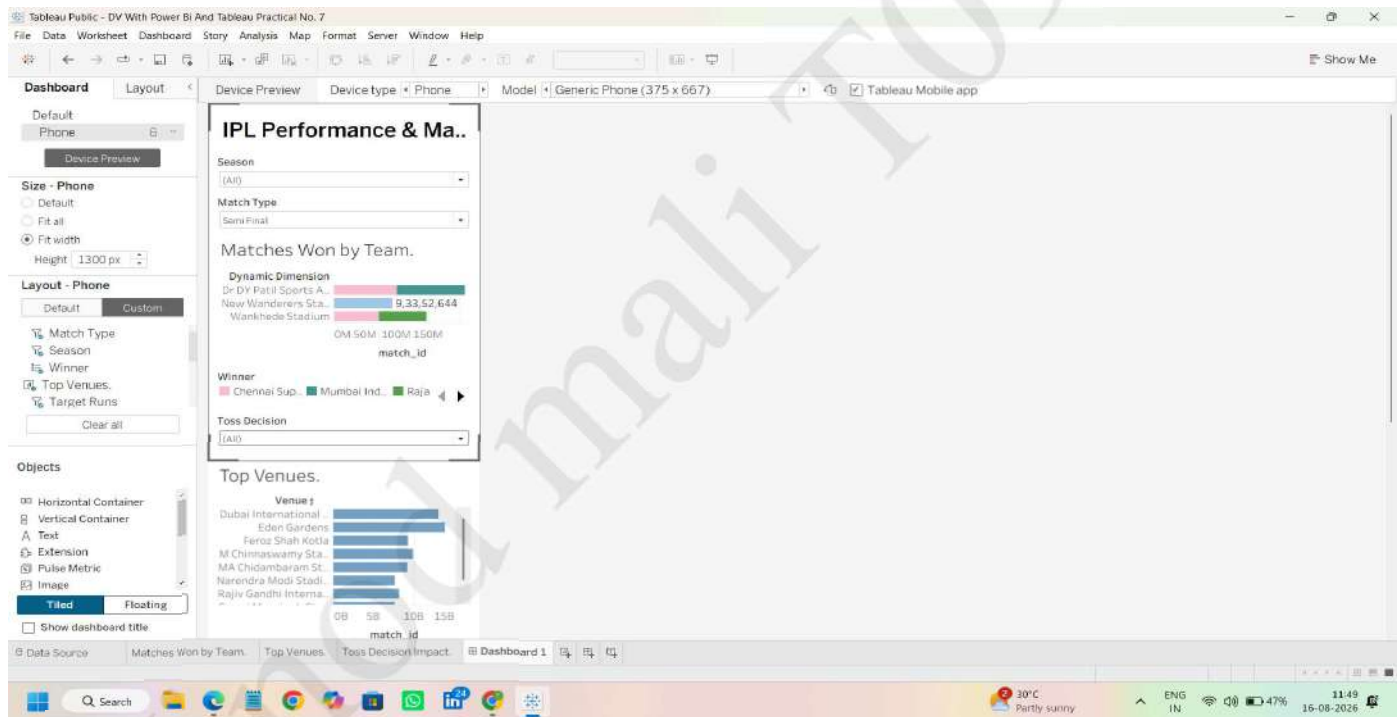

**Name:- Vinod Manohar Mali**  
**Roll No:- T092**

Sheth L.U.J. And Sir M.V. College of Science  
Subject:- Data Visualization With Power BI And Tableau  
Practical No 7

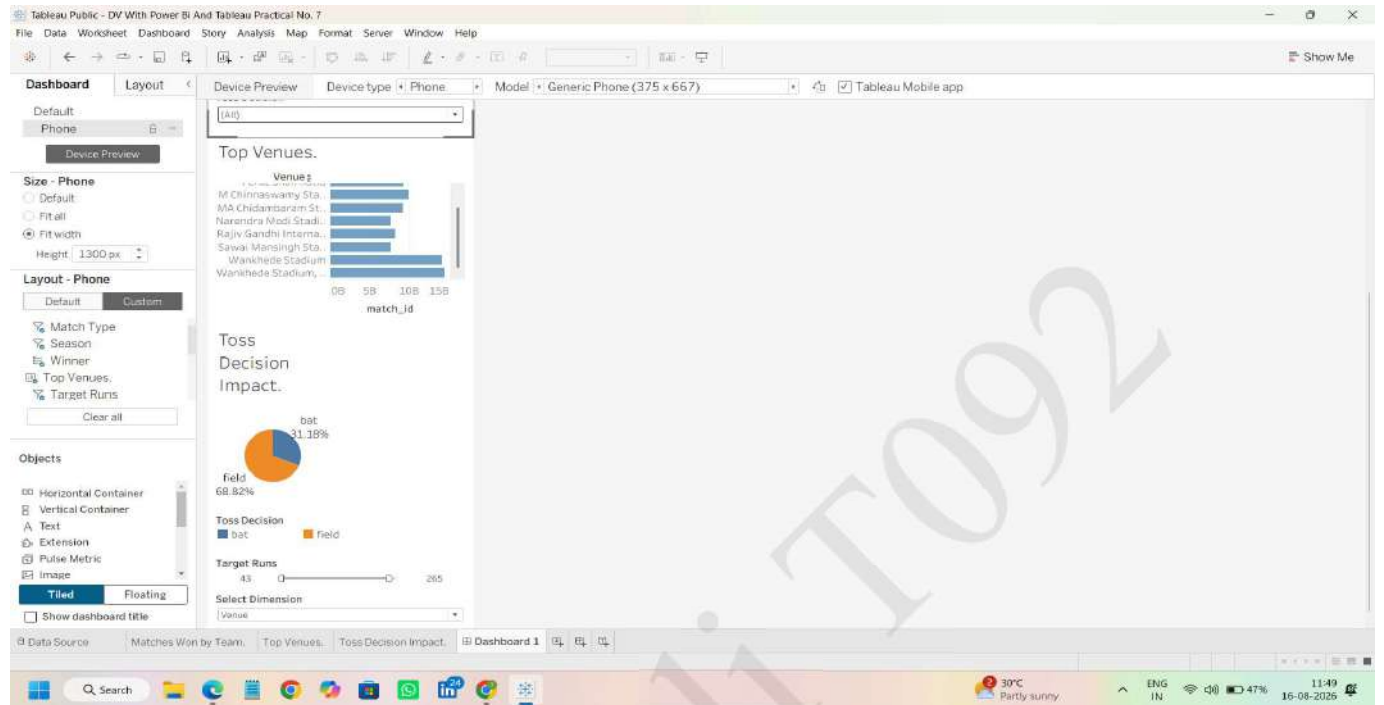

**Step 4:- Tableau will automatically generate a single-column stack. Arrange the items vertically in logical order:**

- o Title & Global Filters (Season, Dynamic Dimension parameter) at the top.**
- o Matches Won by Team (Primary high-level chart).**
- o Top Venues chart below it. o Toss Decision Impact pie chart at the bottom.**

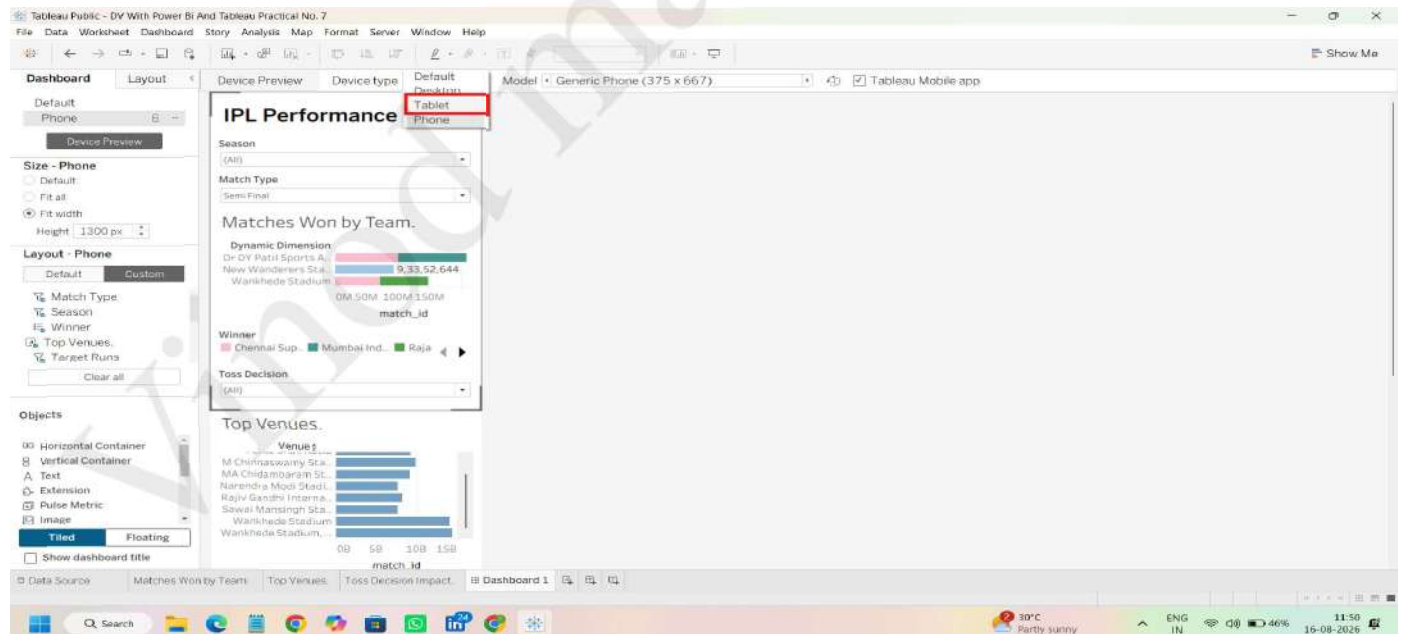

**Name:- Vinod Manohar Mali**  
**Roll No:- T092**

Sheth L.U.J. And Sir M.V. College of Science  
Subject:- Data Visualization With Power BI And Tableau  
Practical No 7

**Step 5:- Change Device type in the top bar to Tablet.**

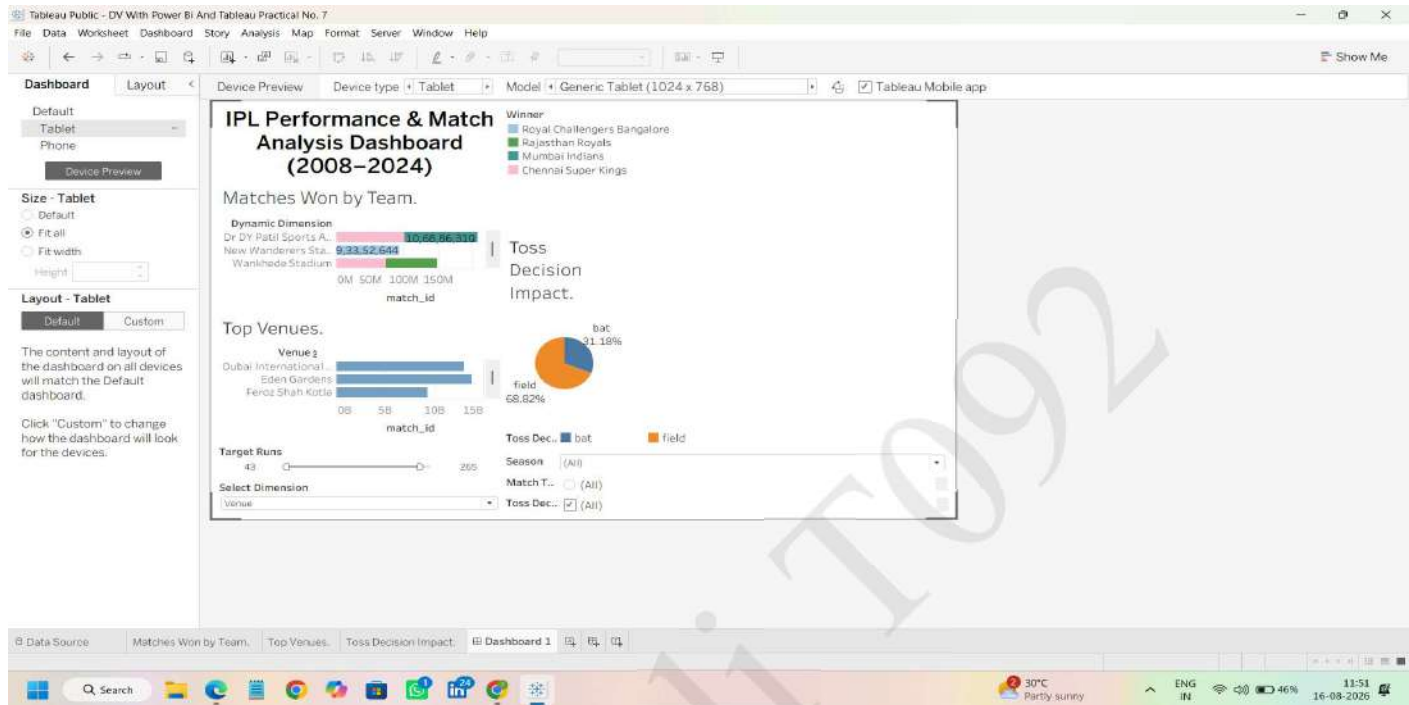

**2. Click Add Tablet Layout.**

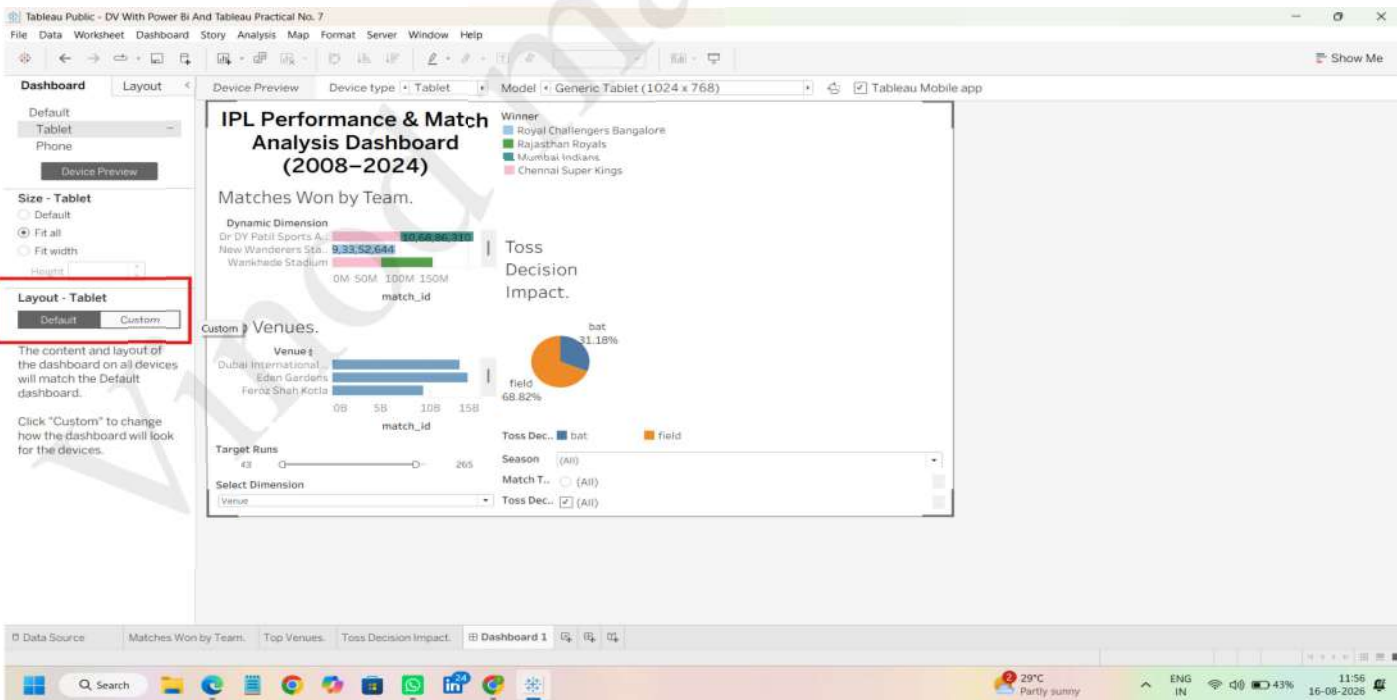

**Name:- Vinod Manohar Mali**

**Roll No:- T092**

Sheth L.U.J. And Sir M.V. College of Science  
Subject:- Data Visualization With Power BI And Tableau  
Practical No 7

**Step 6:- Set the layout to Custom and adjust the grid to a 2x2 matrix so all key metrics fit comfortably on an iPad/tablet screen size.**

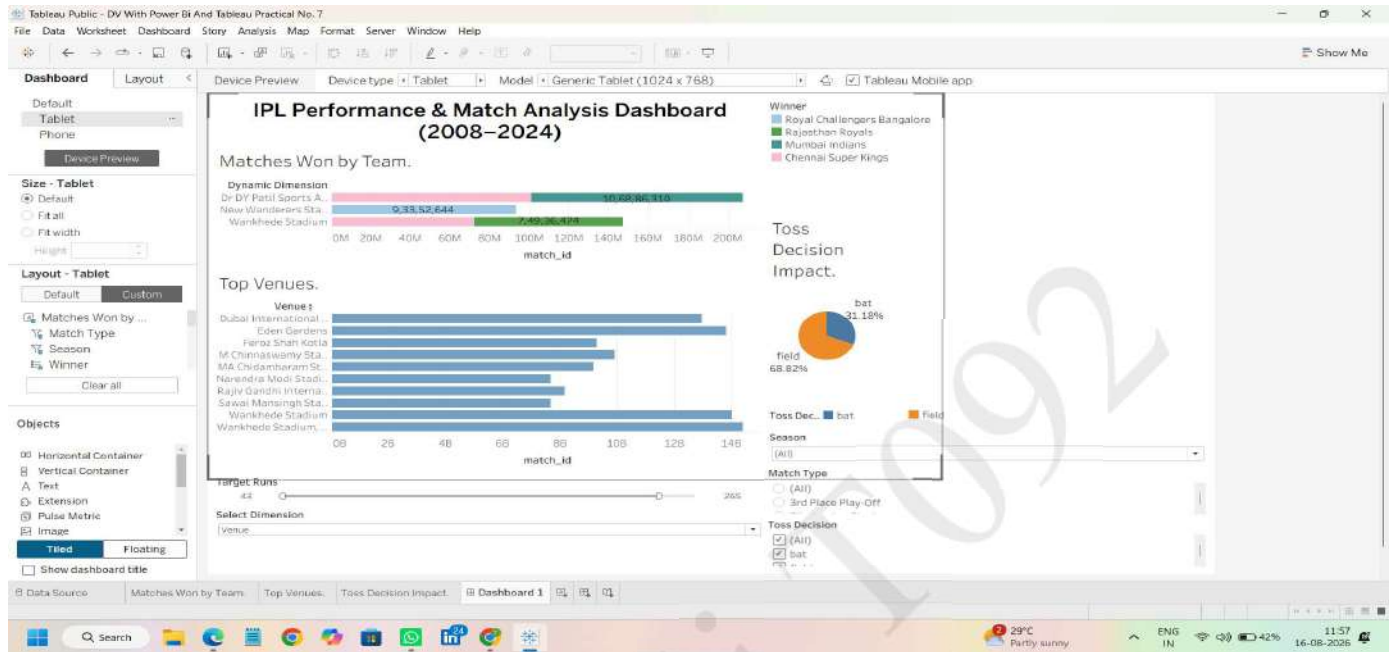

**Name:- Vinod Manohar Mali**  
**Roll No:- T092**

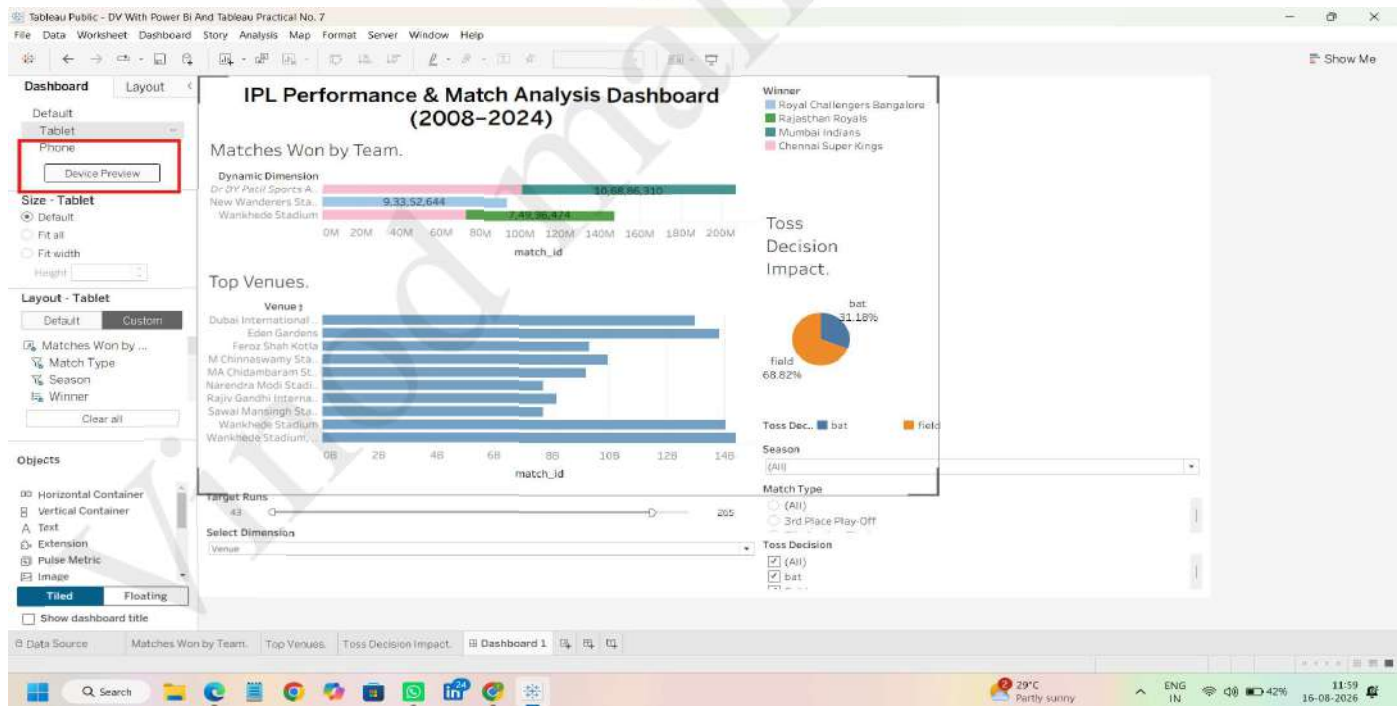

Sheth L.U.J. And Sir M.V. College of Science

Subject:- Data Visualization With Power BI And Tableau

Practical No 7

Click Close on the top Device Preview toolbar when done.

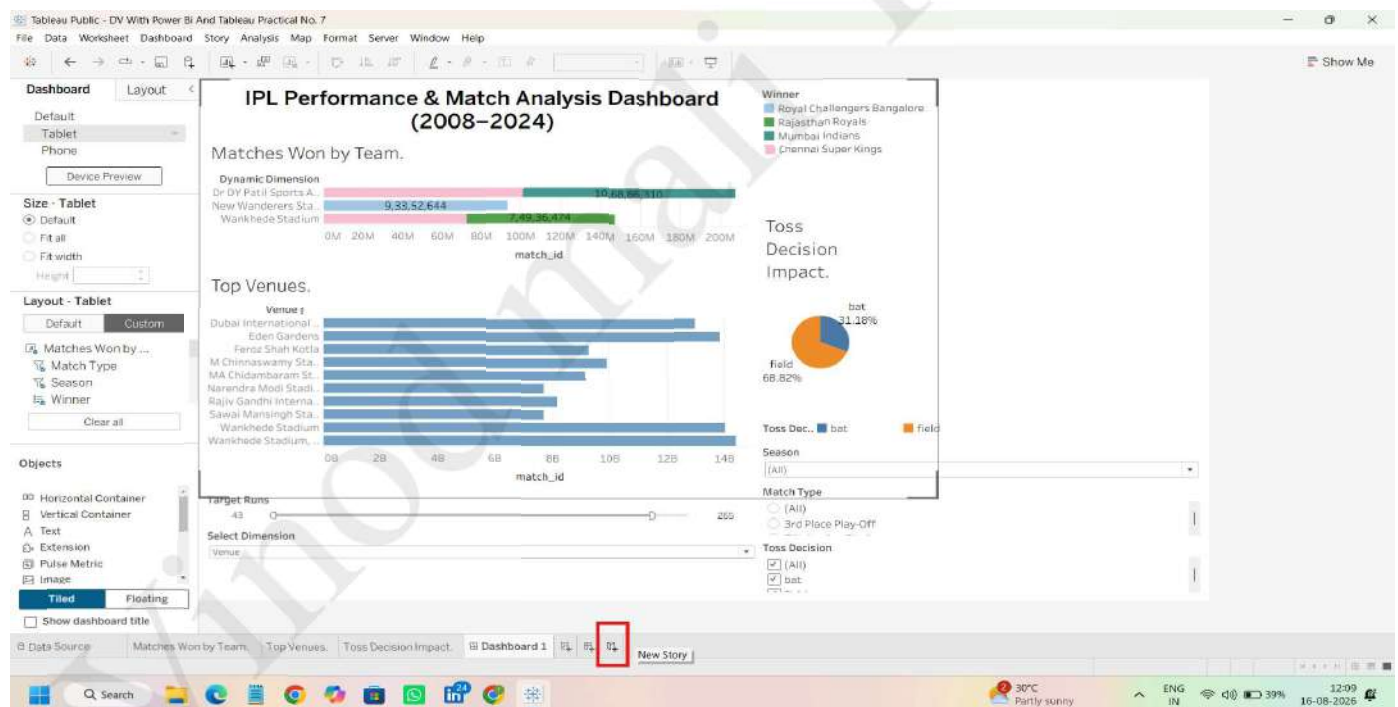

G: Build a complete data story using Story feature

Name:- Vinod Manohar Mali

Roll No:- T092

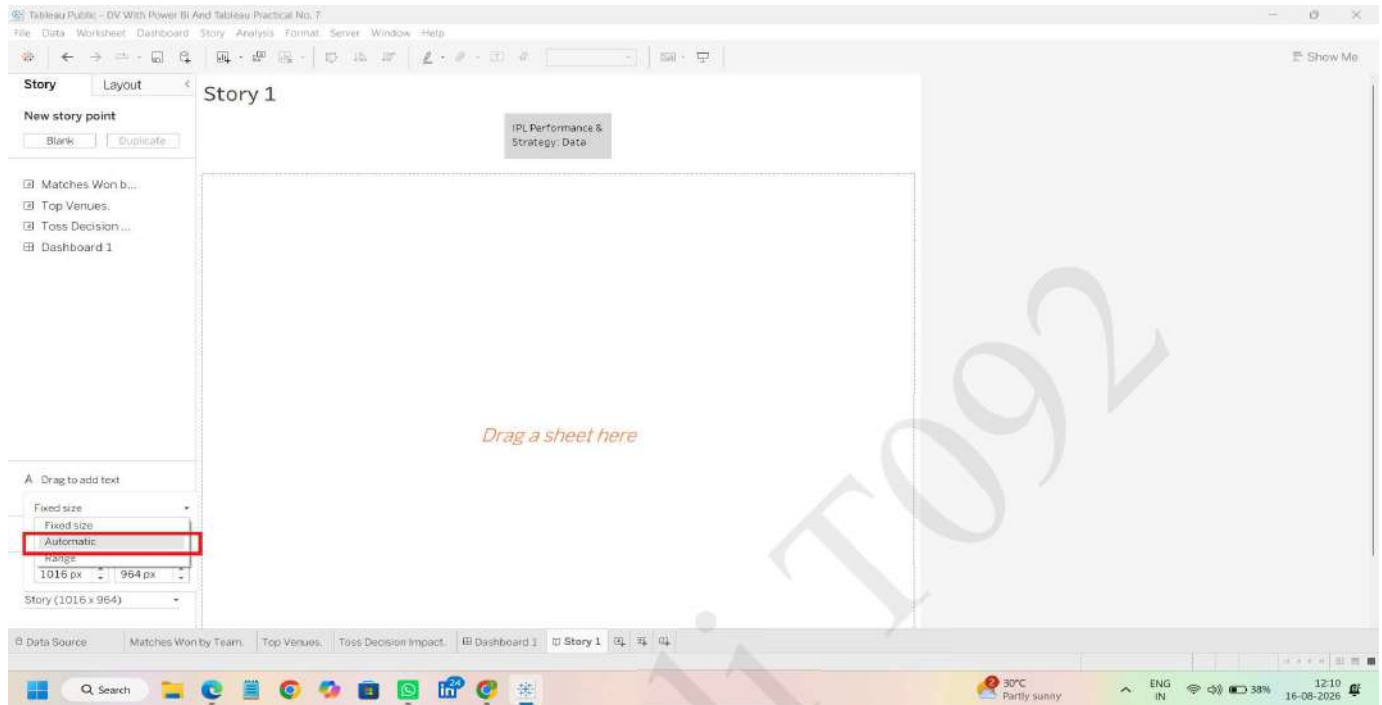

Sheth L.U.J. And Sir M.V. College of Science  
Subject:- Data Visualization With Power BI And Tableau  
Practical No 7

- Step 1:-** At the bottom of your Tableau workspace (where your Sheet and Dashboard tabs are), click the New Story tab icon (the notebook icon with a plus sign at the far right).
- 2.** Double-click the title heading at the top of the canvas and rename your story to to: **IPL Performance & Strategy: Data Story**
- 3.** Set the Story size in the left sidebar under Size to Automatic or Caption Style so it fits your screen nicely.

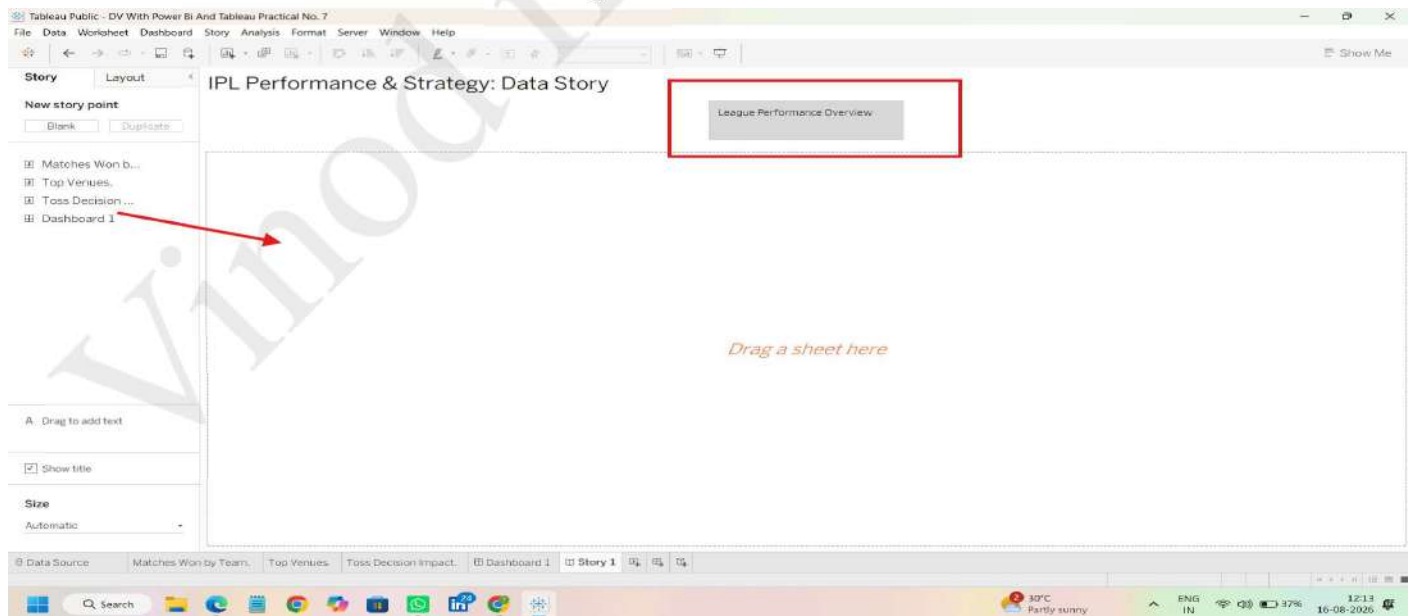

**Name:- Vinod Manohar Mali**  
**Roll No:- T092**

Sheth L.U.J. And Sir M.V. College of Science  
Subject:- Data Visualization With Power BI And Tableau  
Practical No 7

**Step 2:- From the left Story pane, drag your main IPL Dashboard onto the blank canvas.**

**2. Click inside the grey caption box above the dashboard slide (labeled "Write description text here") and type: 1. League Performance Overview**

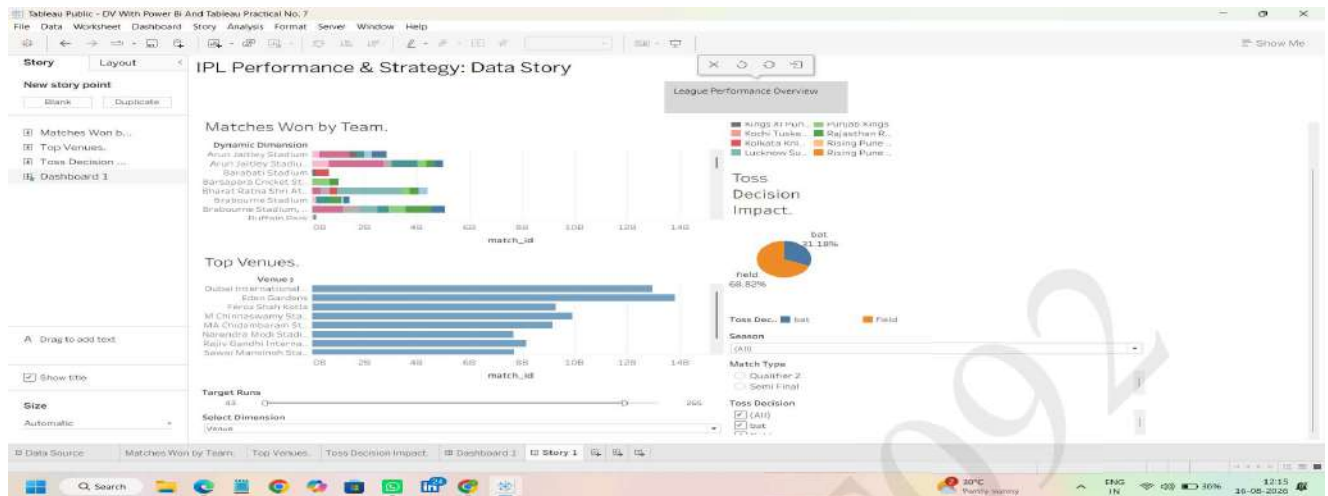

**On this slide, keep your filters set to All Seasons so it serves as an high-level executive summary of team wins and total match dynamics across the IPL.**

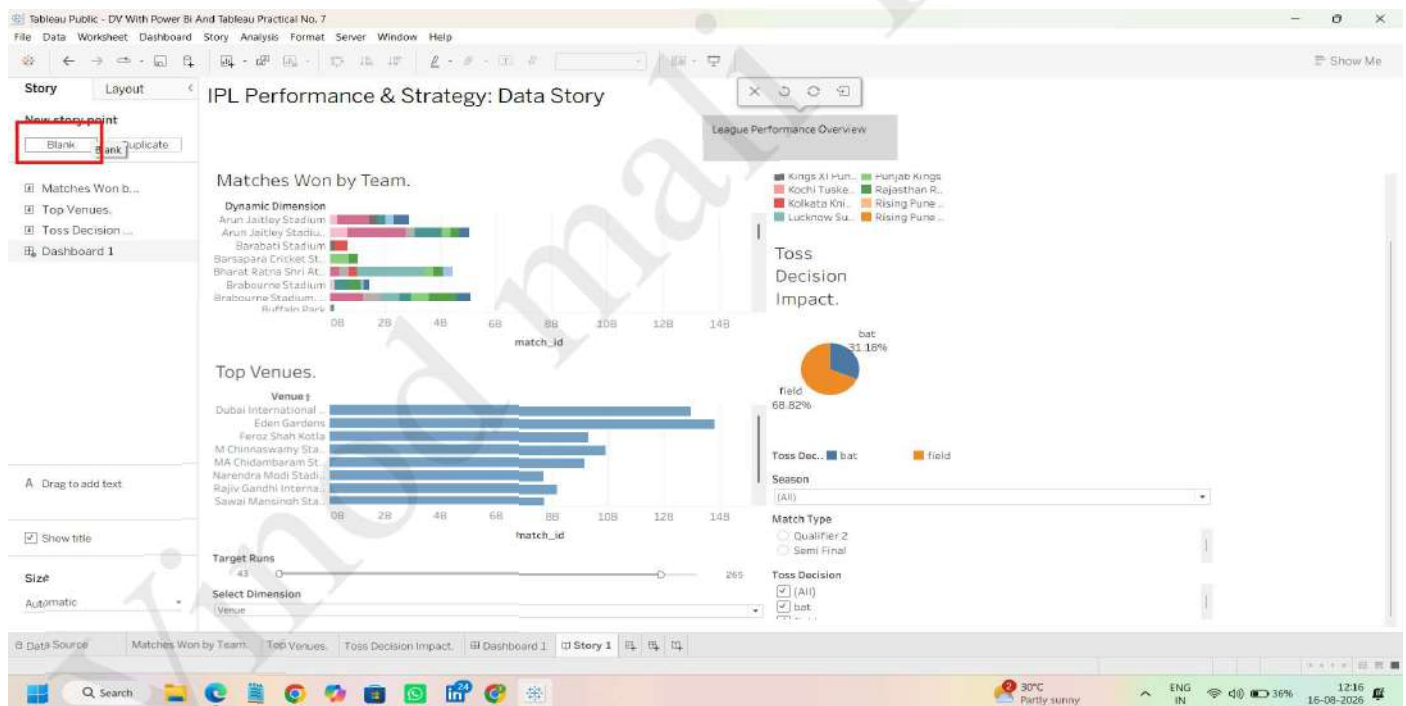

**Name:- Vinod Manohar Mali**

**Roll No:- T092**

Sheth L.U.J. And Sir M.V. College of Science  
Subject:- Data Visualization With Power BI And Tableau  
Practical No 7

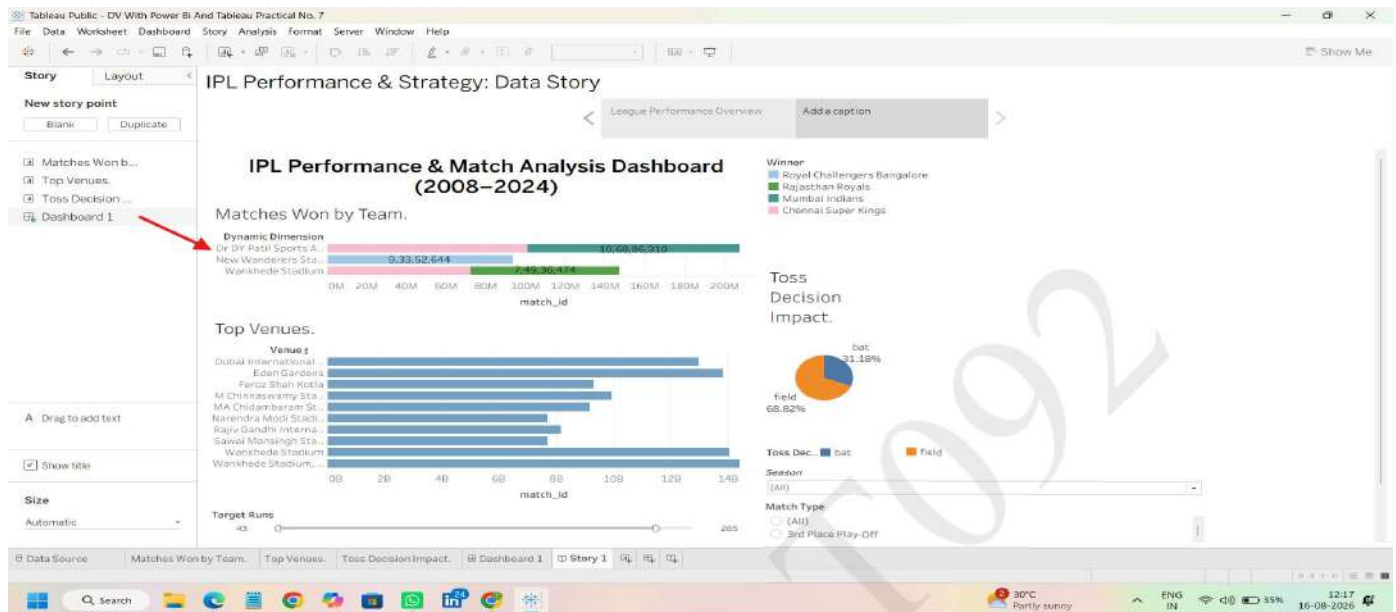

**Step 3:- Click Blank under the New Story Point section on the left sidebar to add a second slide.**

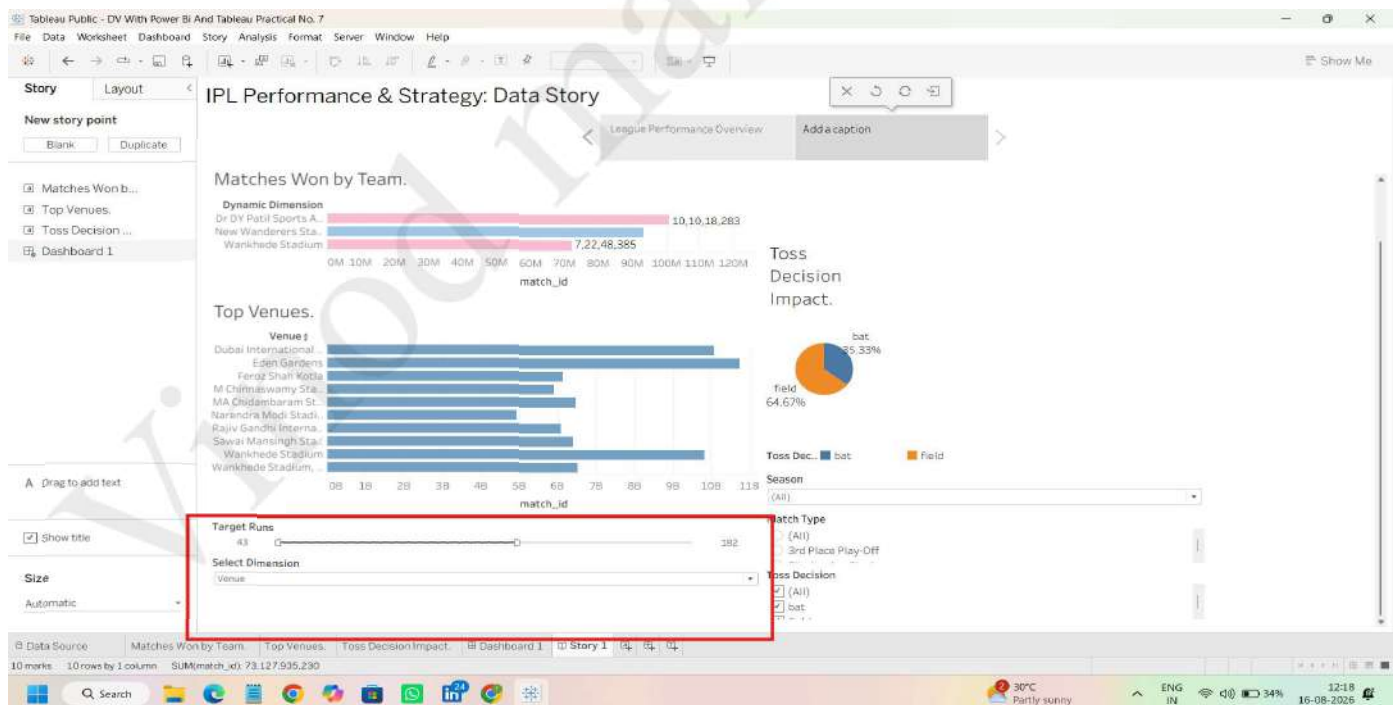

**Drag your IPL Dashboard onto the canvas again**

**Name:- Vinod Manohar Mali**  
**Roll No:- T092**

Sheth L.U.J. And Sir M.V. College of Science  
Subject:- Data Visualization With Power BI And Tableau  
Practical No 7

**Step 4:-** In this slide, use your new Select Dimension parameter dropdown to change the primary chart view to Venue, and set your Target Runs slider to focus on high-scoring matches (180+ runs).

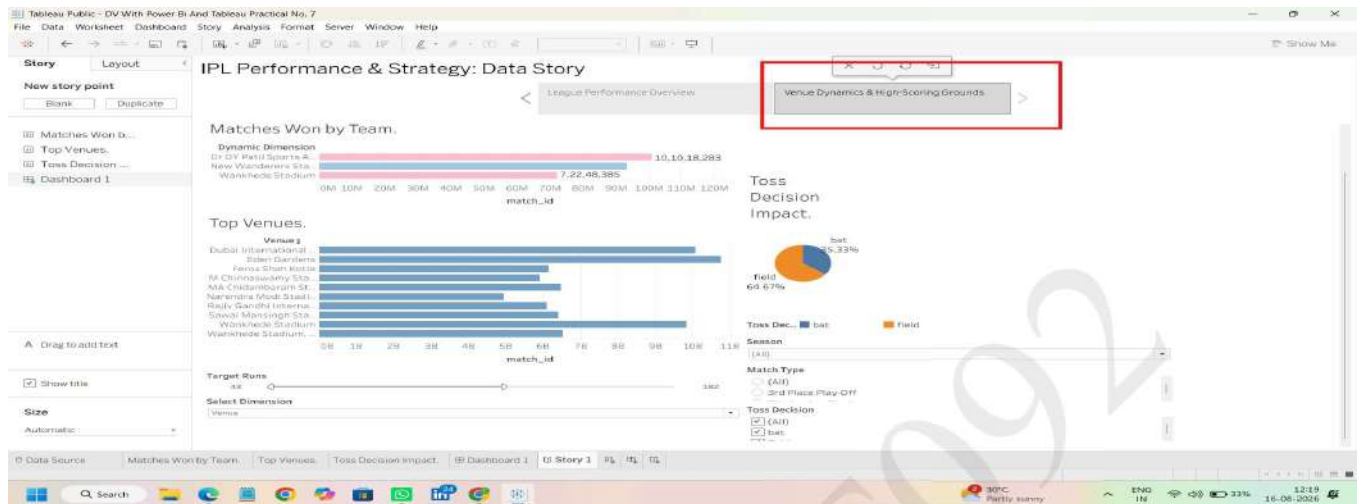

**Step 5:-** Update the top caption box for this point to: 2. Venue Dynamics & High-Scoring Grounds

**Name:-** Vinod Manohar Mali

**Roll No:-** T092

Sheth L.U.J. And Sir M.V. College of Science  
Subject:- Data Visualization With Power BI And Tableau  
Practical No 7

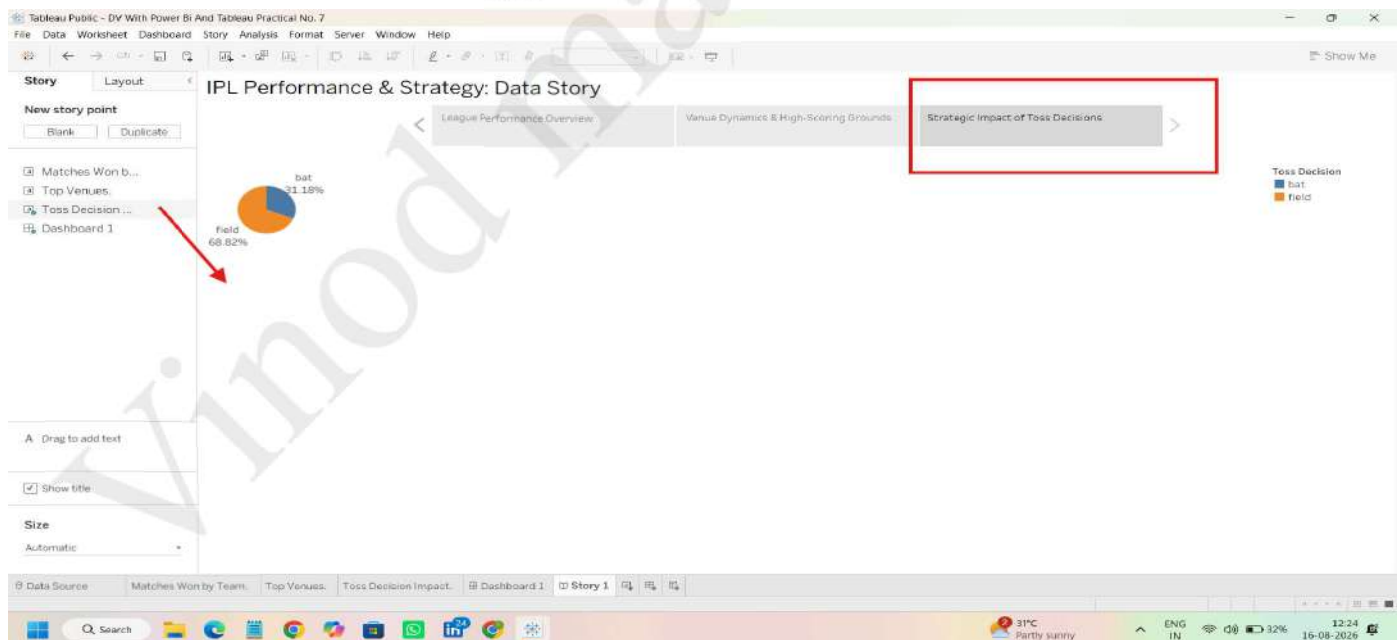

**Step 6:- Click Blank to add a third story point.**

**2. Drag the Toss Decision Impact worksheet (or the full dashboard) onto this slide.**

**3. Use the Season or City filter controls to highlight how winning the toss and choosing to bat vs. field impacts match outcomes in specific conditions.**

**4. Update the caption to:**

**3. Strategic Impact of Toss Decisions**

**Step 7:- Go to Story Point 1 or Story Point 2.**

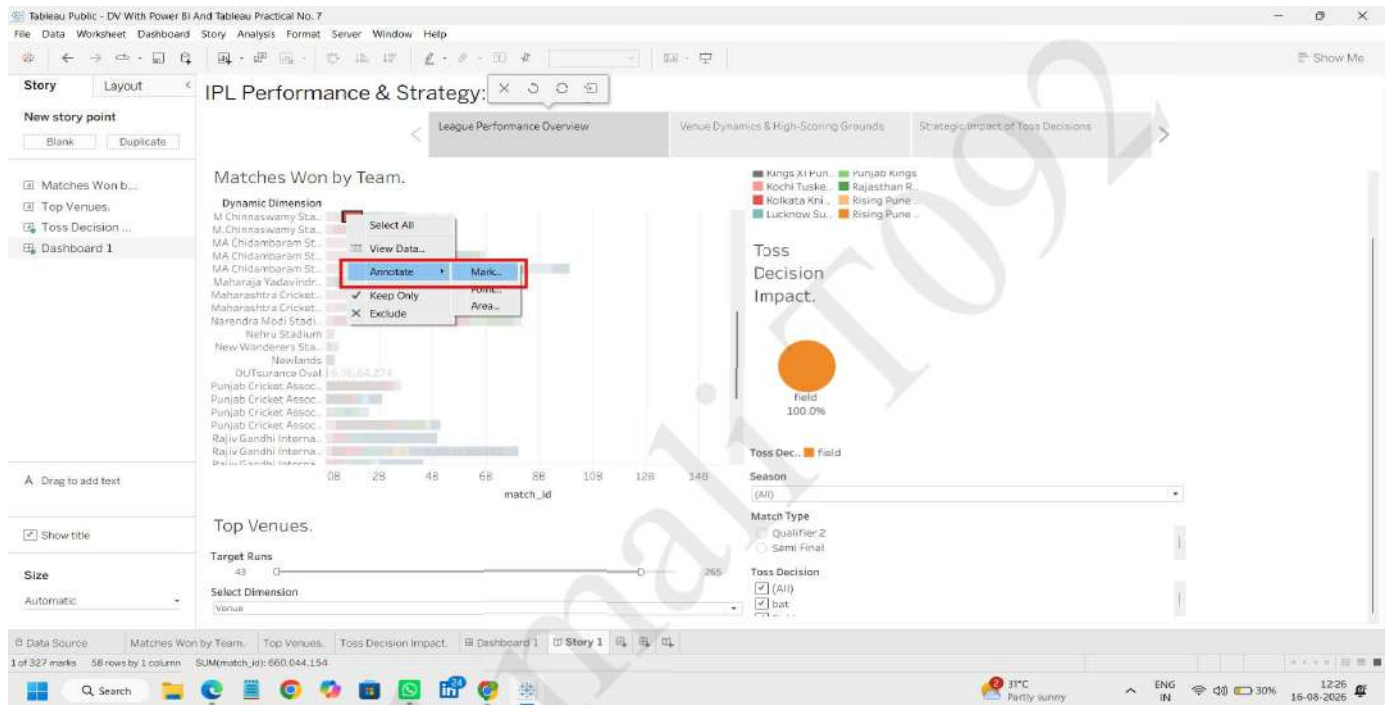

**2. Right-click a notable mark (e.g., the top team bar for Mumbai Indians or M. Chinnaswamy Stadium).**

**Name:- Vinod Manohar Mali**

**Roll No:- T092**

Sheth L.U.J. And Sir M.V. College of Science  
Subject:- Data Visualization With Power BI And Tableau  
Practical No 7

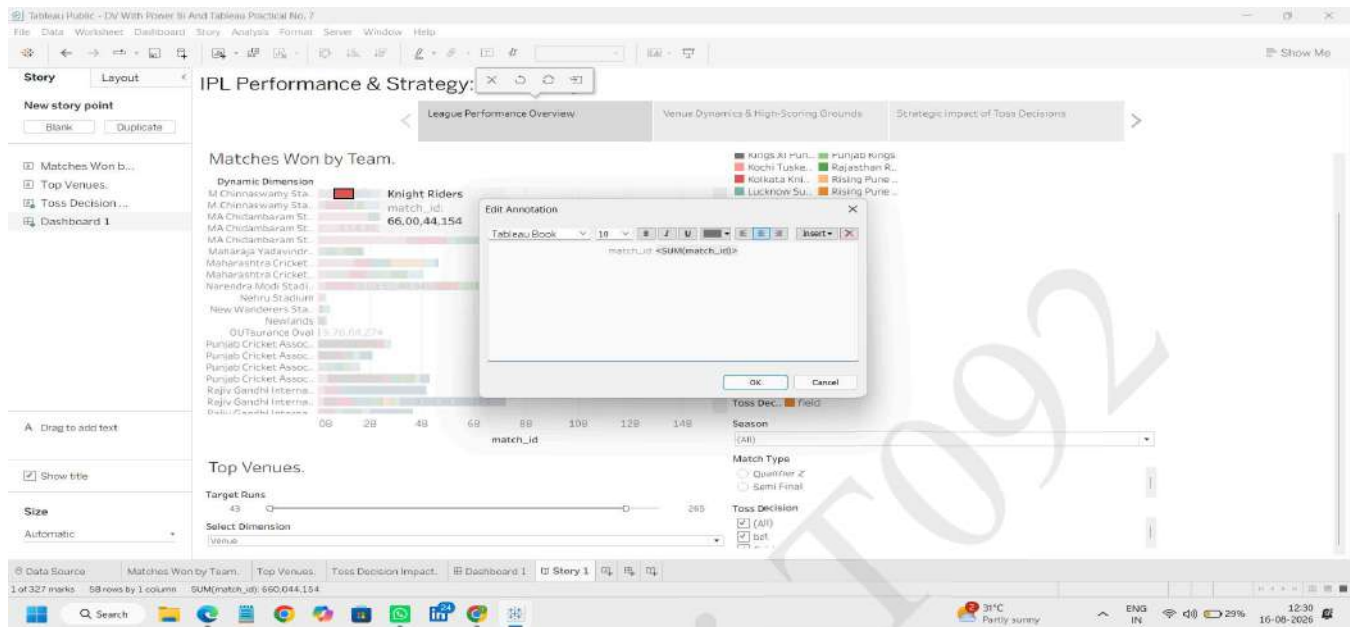

**3. Select Annotate --> Mark... (or Point...).**

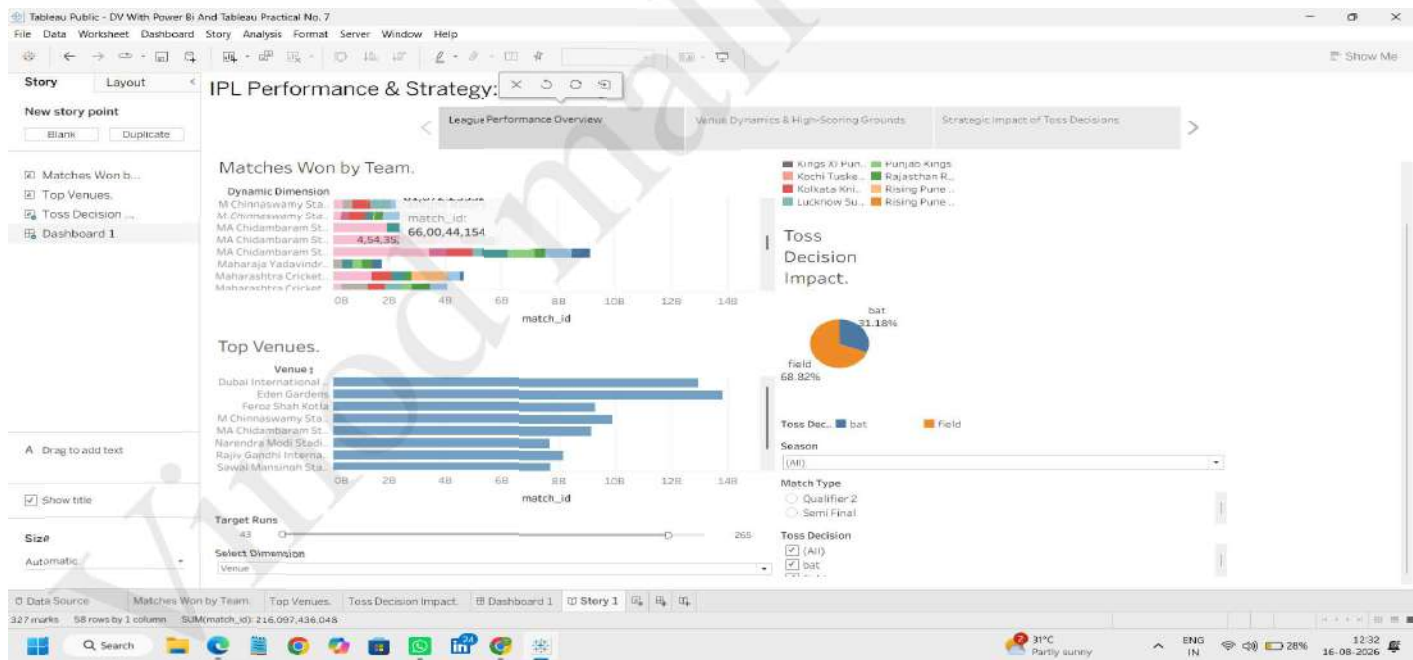

**Enter a succinct takeaway (e.g., "Mumbai Indians lead total match wins across seasons").**

**Name:- Vinod Manohar Mali**  
**Roll No:- T092**

Sheth L.U.J. And Sir M.V. College of Science  
Subject:- Data Visualization With Power BI And Tableau  
Practical No 7

**Drag the callout text box to place it clearly beside the visual element.**

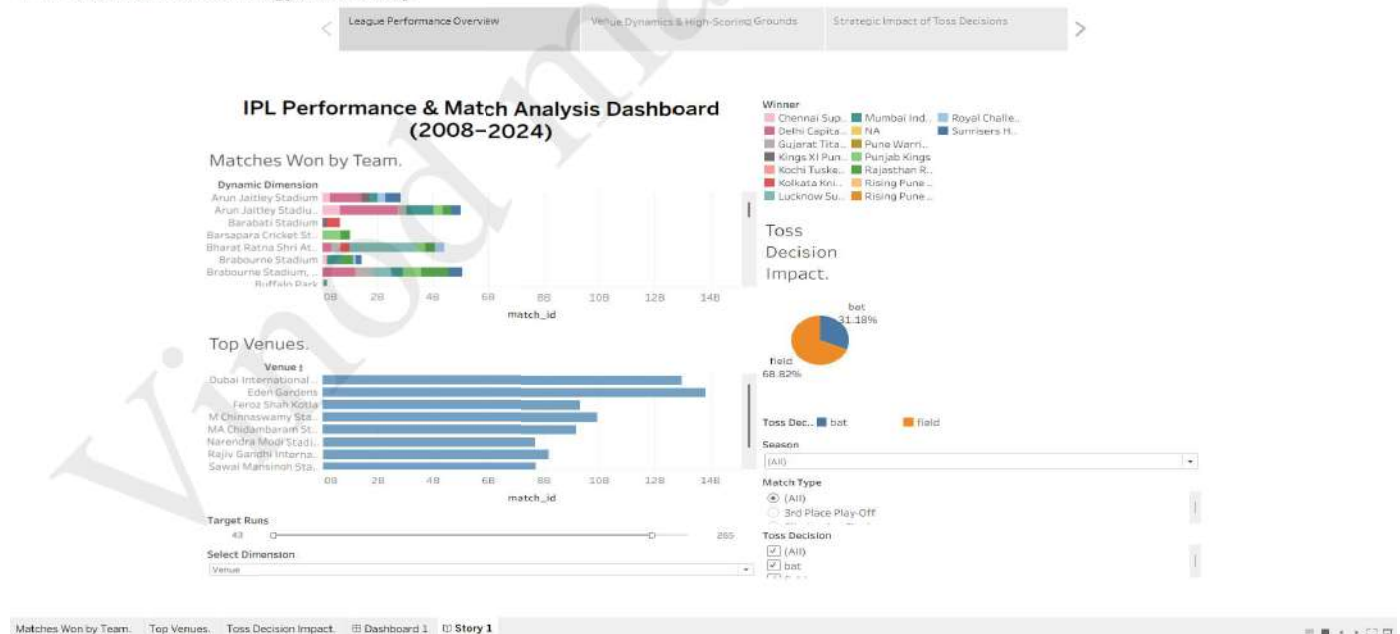

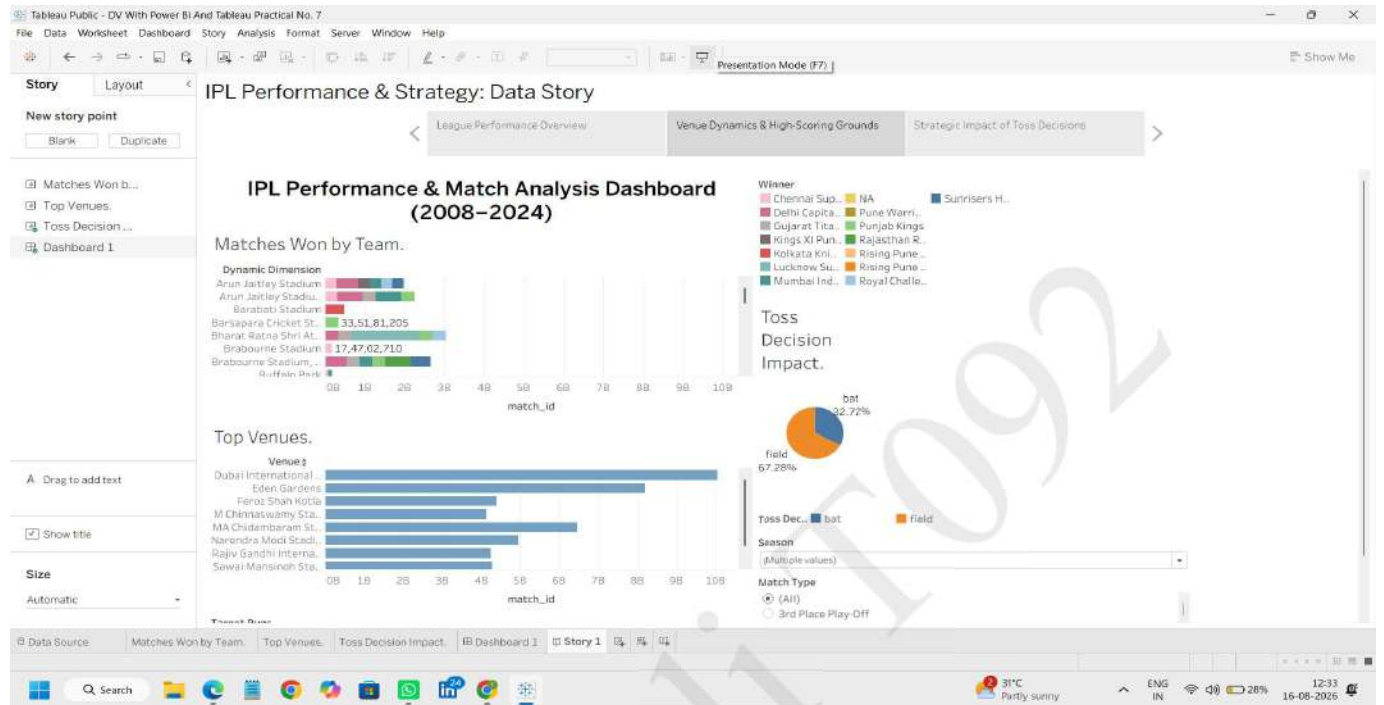

**Step 8:- Press F5 (or click the Presentation Mode icon in the top toolbar) to view your story full-screen.**

**2. Click through the story navigator buttons at the top to ensure each slide maintains its customized filter state and annotations while preserving full interactivity.**

**Name:- Vinod Manohar Mali**

**Roll No:- T092**
